

Comprehensive solutions for healthcare providers

Product catalogue

1989 tradition since

ZARYS is a family-owned company with Polish capital, operating on the market since 1989

Evolution from a small enterprise to a leader in the sourcing industry is a process that led to the creation of more comprehensive offers and solutions that facilitate the work of medics and save the lives of patients. ZARYS is currently hiring over 250 people, who are working to serve thousands of clients operating in the field of health care worldwide.

comprehensive medical supplies for hospitals

The company's customers have many product groups at their disposal, starting from medical gloves, through dressing materials, to operating kits and treatment packages. Products from different categories have individual characteristics and specific purposes. In order to facilitate the identification of materials and improve the ordering process, 13 different categories were created in addition to the latest category „ZARYS kids“.

we provide
**medical
disposable
devices**
to cover over

900%

of the hospital's needs

basic medical devices

medical gloves

dressings

medical clothing

surgical drapes and gowns

surgical sets

personal protective equipment

patient hygiene

pharmaceutical line

sports & physiotherapy products

**being a manufacturer of disposable medical equipment,
ZARYS meets the highest required standards**

Part of ZARYS production plants are located in Silesia and combine sterile production - a cleanroom with an area of over 600 m² - a place for manufacturing dedicated operating sets, a sewing room and an automated production line.

**production
made in Poland**

SURGICAL GLOVES

- 23 SafeCARE powdered **NEW**
- 23 SafeCARE pf powder-free **NEW**

BASIC MEDICAL DEVICES pp. 24-85

BASIC INJECTION EQUIPMENT

- 27 dispoFINE injection needle
- 27 dispoGUARD safety injection needle
- 28 dispoSULIN insulin pen needle
- 28 side hole needle
- 29 dicoSPIKE, dicoSPIKE Chemo withdrawal cannula
- 31 duoNEX single-use syringe, 2-part, Luer
- 31 dicoNEX SN single-use syringe, 3-part, Luer, with needle alongside the syringe
- 32 dicoNEX single-use syringe, 3-part, Luer
- 32 dicoNEX single-use syringe, 3-part, Luer-Lock
- 33 dicoNEX single-use syringe, 3-part, Luer-Lock + amber
- 33 dicoNEX single-use catheter syringe, 3-part
- 34 dicoTUBER tuberculin syringe
- 34 dicoSULIN insulin syringe

INFUSION THERAPY

- 36 SANViflon I.V. cannula
- 36 SANViflon S I.V. cannula without port
- 37 easyFLOW IS PREMIUM infusion set **NEW**
- 37 easyFLOW IS infusion set
- 38 easyFLOW IS infusion set (dual chamber) **NEW**
- 38 easyFLOW IS ECO infusion set
- 39 easyFLOW IS SAFE infusion set **NEW**
- 39 easyFLOW IS AMBER infusion set, amber **NEW**
- 40 easyFLOW IS REG infusion set with precision flow rate regulator **NEW**
- 40 precision flow regulator **NEW**
- 41 easyFLOW TS PREMIUM transfusion set **NEW**
- 41 easyFLOW TS transfusion set
- 42 easyFLOW LINE extension tube for infusion pump
- 42 needle-free valve
- 43 needle free valve with extension line **NEW**
- 43 3-way stopcock
- 44 3-way stopcock with extension tube
- 44 cannula stopper

OXYGEN THERAPY

- 46 nasal oxygen cannula
- 46 oxygen tubing
- 46 oxygen mask
- 47 non-rebreather mask
- 47 multi-vent mask
- 47 nebulizer mask
- 48 nebulizer

ANAESTHESIA PRODUCTS

- 50 endotracheal tube uncuffed
- 50 endotracheal tube uncuffed **NEW**
- 50 endotracheal tube cuffed
- 51 endotracheal tube cuffed **NEW**
- 51 reinforced endotracheal tube cuffed
- 52 intubation stylet
- 52 tracheal tube introducer
- 52 endotracheal tube holder
- 53 oropharyngeal airway/guedel airway
- 53 laryngeal mask PVC
- 54 laryngeal mask silicone
- 54 tracheostomy tube cuffed
- 55 air cushion anaesthetic mask
- 55 anaesthetic mask with open seal
- 56 catheter mount with double swivel elbow connector
- 56 dual-limb breathing circuit

SUCTION CATHETERS, STOMACH TUBES

- 58 suction catheter with vacuum control
- 58 suction catheter
- 59 suction catheter with frozen surface
- 59 feeding tube graduated, with X-ray contrast
- 60 stomach tube/duodenal tube

UROLOGICAL CATHETERS, URINE BAGS

- 62 Foley catheter 2-way, silicone-coated latex
- 63 Foley catheter 3-way, silicone-coated latex
- 63 Foley catheter 2-way with tiemann tip, silicone-coated latex
- 64 Foley catheter 2-way, 100% silicone
- 64 Foley catheter 3-way, 100% silicone
- 65 Nelaton catheter
- 65 Tiemann catheter
- 66 Pezzer catheter silicone-coated latex
- 66 samples taking urine bag
- 67 urine bag
- 67 urine bag with sample port
- 68 urine bag hanger
- 68 urine bag with sample port 2W

GENERAL SURGERY

- 70 Yankauer surgical suction cannula, standard CH21
- 70 Yankauer surgical suction cannula, bulb tip CH25
- 71 surgical suction tube
- 71 surgical suction set with Yankauer cannula, standard
- 72 surgical suction set with Yankauer cannula, bulb tip

BASIC PRODUCTS FOR GINECOLOGY

- 74 vaginal speculum, cusco type
- 74 cervical brush, standard
- 75 cervical brush, special
- 75 umbilical cord clamp

OTHER PRODUCTS

- 215 gynecological skirt, non-woven

VITAHEALTH pp. 222-223

EXAMINATION GLOVES

The device is intended for patient diagnostics, providing a barrier to the transmission of microorganisms between the operator and the patient, minimizing the risk of cross-contamination.

NITRILE GLOVES are made of synthetic acrylonitrile butadiene rubber (NBR), they are an alternative to latex gloves. They do not contain latex proteins, and the content of chemical accelerators is minimized, so they are friendly to the skin.

They are characterized by:

- high **mechanical strength** (also for puncture),
- **chemical and biological resistance** (constitute a barrier for viruses and bacteria),
- **flexibility**, thanks to which they adjust to the hand, providing the work comfort to the user.

VINYL GLOVES made of PVC (polyvinyl chloride) are intended for low-risk procedures due to limited mechanical, chemical and biological resistance. The glove material does not cause Type I allergic reactions, ZARYS vinyl gloves are free of harmful phthalates.

LATEX GLOVES made of natural rubber are recognized as the best barrier against blood borne pathogens and part of hazardous chemical substances. They are also characterized by high flexibility, providing the work comfort to the user by fitting to the hand like a „second skin“. Latex gloves, due to the natural raw material, are biodegradable.

STERILE, SURGICAL AND PROTECTIVE GLOVES

Made from natural rubber latex, intended to be worn on hands in surgical settings to provide barrier against potentially infectious fluids or other contaminants, and to protect the patient by ensuring sterility of the wound area. These gloves are intended for single use only, and are classified as Medical Devices Class IIa as well as a Personal Protective Equipment Category III. The indicated Gloves are designed to protect against substances and mixtures which are hazardous and against harmful biological agents.

ZARYS International Group prides itself on having a long lasting experience gained in the medical industry by being a leading manufacturer and supplier of single use medical devices.

A wide range of products and complex solutions makes it possible to successfully respond to our customers' needs and meet their expectations.

High standards of design, production, storing and transportation allow to maintain quality, safety and comfort of use to both the medical personnel and patients.

A wide range of single use products include basic medical devices and those dedicated to specialized procedures.

ZARYS branded products find a wide application in anesthesiology, urology, gynecology, oxygen and fluid therapy and in many other medical specialities. They make it possible to perform medical procedures including patient diagnostics, prophylaxis, treatment and care.

basic medical devices

basic injection equipment | infusion therapy
| oxygen therapy | anaesthesia products |
suction catheters, stomach tubes | urological
catheters, urine bags | general surgery
| basic products for gynecology | other products

BASIC INJECTION EQUIPMENT

dispoFINE injection needle

features

- needle tube is made of smooth and durable stainless steel
- sheath and hub made of polypropylene
- thin walls assure adequate stream pace
- tip sharpened in three surfaces (back cut)
- bevel type: LB/BL standard long bevel
- surface of needle tube covered with sliding agent (silicone)
- glued needle elements to prevent their separation (glue - epoxy resin)
- hubs coloured in accordance with ISO code allowing fast recognition of needle size
- single-use
- non-toxic, non-pyrogenic
- packaging: 1 pc./paper-foil

indication

- device designed for intravenous, intramuscular and hypodermic injections

dispoGUARD safety injection needle

features

- safety cover can be activated with one hand and it shields needle immediately after injection
- cover integrated with needle
- tip sharpened in three surfaces (back cut)
- colour coding system for size, marked on hub
- activation of safety mechanism signalized by audible click
- needle is securely closed inside activated safety cover
- single-use
- non-toxic, non-pyrogenic
- packaging: 1 pc./paper-foil

indication

- device designed for intravenous, intramuscular and hypodermic injections

dispoSULIN

insulin pen needle

features

- made of polypropylene, polyethylene and stainless steel
- triple-point needle blade allows easy and atraumatic skin penetration
- covering the needle with silicone lubricant reduces resistance during injection
- thin walls of needle ensure easy flow of medicine and the right flow rate
- coloured cap and paper cover of packaging make it easy to quickly recognize size of needle
- available in various sizes, allowing you to adapt to individual needs
- universal, compatible with all pen models
- single-use
- non-pyrogenic, non-toxic
- packaging: 100 pcs/box

indication

- for subcutaneous injection
- dedicated for use with pre-filled pens (insulin pens)

side hole needle

features

- made of stainless steel
- the needle hub ideally suited for Luer and Luer-Lock (to ensure full tightness of the connection with syringes)
- CE sign comply with PN-EN-ISO 7864
- individual packaging comply with PN-EN 556 and PN-EN 868, type blister-pack
- coloured cap and paper cover of packaging make it easy to quickly recognize
- single-use

indication

- made of high quality materials, using the latest technology, which guarantees its high quality and failure-free, intended usage
- special design needle with a pencil cut with a side hole, designed to withdraw medication from a vial, including vials with a rubber stopper
- needle construction prevents from accidental, unintended production of rubber scrubs, in order to avoid contamination of the drug
- side hole with special cut, placed on the top of the needle enables free dissolution of the drug and limits foaming by directing the fluid directly onto the walls of the vial

dicoSPIKE, dicoSPIKE Chemo

withdrawal cannula

features

- easy to use, ergonomic shape
- body with knurled surface for a secure grip
- sharp receiving spike enabling tight and safe connection with containers of different capacity
- receiving spike groove guarantees complete emptying of the container
- hermetic self-Locking cap securing the connector against contamination
- available in version with air filter and in version with air and particle filter
- air filter protects against microbiological contamination and against harmful aerosols
- particle filter is an effective barrier to protect drugs and liquids from contamination
- female Luer-Lock connector compatible with products with either male or female Luer-Lock
- non-pyrogenic
- single-use
- packaging: 1 pc./ paper-foil

indication

- device for needle-free dissolving and / or withdrawing drugs from multi-dose packages (bottles, vials, etc.) - in both directions
- dicoSPIKE Chemo model is designed for medicines releasing dangerous aerosols such as cytostatics

single-use syringe, 2-part, Luer

features

- white line
- transparent barrel allows full visual control of content
- white contrasting plunger
- Luer nozzle centrally located in 2 ml syringe, eccentric in 5, 10, 20 ml syringes
- smooth plunger sliding
- limitation flange securing against accidental removal of plunger
- clear, legible and permanent black graduation facilitating dosage, adequately:
 - every 0,1 ml for capacity of 2 ml
 - every 0,2 ml for capacity of 5 ml
 - every 0,5 ml for capacity of 10 ml
 - every 1 ml for capacity of 20 ml
- extended graduation that includes a 10% extension of the nominal capacity
- name of syringe and manufacturer's logo placed on barrel
- non-pyrogenic, non-toxic
- packaging: 1 pc./paper-foil

indication

- 2-piece syringe for subcutaneous, intramuscular and intravenous infusions intended for drawing up and administering of medicines/liquids to patient and collecting body fluid samples from patient

INFUSION THERAPY

SANViflon

I.V. cannula

features

- needle (stylet) made of stainless steel with back-cut blade
- cannula catheter made of Teflon (FEP), equipped with 4 radiopaque lines
- cannula equipped with wings and hand-closed cap of the upper port colour coded according to size
- handle that allows you to insert with one hand
- valve that prevents blood leakage to outside after inserting the cannula into the vessel
- flashback chamber secured with a Luer-Lock cap
- available in various sizes from 14 G to 26 G
- single-use
- packaging: 1 pc. – hard blister (PVC + lacquered paper) with a colour print in accordance with the colour identification of the size

indication

- for cannulation of intravenous, peripheral vessels to:
- multiple injections of intravenous drugs
- intravenous infusion of solutions and parenteral nutrition suitable for peripheral veins
- maintain the patient's hydration and / or reduce dehydration if the patient is unable to take sufficient fluid orally
- blood transfusions and blood-like preparations
- ensuring vascular access in the event of the need for rapid drug delivery, especially during diagnostic and therapeutic procedures

- air-vent with anti-bacterial filter and blue flap
- flexible droplet chamber, size 6 cm, equipped with additional pressure wings to facilitate insertion into containers with liquids
- dropper: 20 drops = 1 ml ± 0,1 ml
- hydrophilic filter Liquid Lock with a mesh size of 8 µm, which automatically stops the flow when the chamber is emptied. Prevents air from entering the tubing to prevent air embolism
- soft, flexible drain with additional port for drug application
- precise safe roll clamp with integrated spike holder and with a holder for securing the drain
- universal Luer-Lock tip
- Air Pass plug with hydrophobic filter, which allows filling of the tubing without accidental contamination and protects against fluid leakage
- single-use
- non-pyrogenic, non-toxic
- individual packaging: paper-foil with a coloured code (blue) identifying the device type

indication

- device for fluid transfer in infusion therapy

REF	version	length
IS-BF-S	without phthalates	180 cm

bulk packaging:
100 pcs

easyFLOW IS ECO infusion set

features

- made of high quality materials
- 2-way sharp closure-piercing device of the drip chamber that guarantees tight and reliable connection with fluid containers
- air inlet with anti-bacterial filter and colored (blue) flap
- pliable drip chamber, size 4cm
- dropper: 20 drops = 1 ml +/- 0,1 ml
- fluid filter protecting against larger particles with pore size 15 µm
- soft, flexible tubing
- universal Luer-Lock conical fitting
- precise safe flow regulator
- both tips of the device additionally secured with protective caps
- packaging: 1pc./foil bag
- single-use
- non-pyrogenic, non-toxic

indication

- device for fluid transfer in infusion therapy

REF	version	length
IS-E*	with phthalates	150 cm
IS-BF-E**	without phthalates	150 cm
NEW IS-BF-E-180**	without phthalates	180 cm

bulk packaging:
400 pcs

easyFLOW IS AMBER infusion set, amber

NEW

features

- amber colouring of the tubing and drip chamber
- double-channel, sharp spike of the drip chamber with a matted surface with non-slip Surface guaranteeing tight and reliable connection with fluid containers/bags
- air inlet with anti-bacterial filter and coloured (blue) flap
- flexible drip chamber with length 6 cm, equipped with additional pressure wings to facilitating puncture into containers with liquids
- dropper: 20 drops = 1 ml +/- 0,1 ml
- fluid filter protecting against larger particles with pore size 15 µm
- soft and flexible drains with additional port for drug application
- precise safe roll clamp with integrated spike holder and with a holder for securing the drain with name of the manufacturer placed on the roll clamp
- single-use
- non-pyrogenic, non-toxic
- universal Luer-Lock tip
- packaging: 1 pc./paper-foil

indication

- device for fluid transfer photosensitive medicinal and other body fluids in infusion therapy

REF	version	length
IS-BF-A	without phthalates	150 cm

bulk packaging:
100 pcs

easyFLOW IS REG

infusion set with precision flow rate regulator

features

- 2-way, sharp closure-piercing device of the drip chamber with anti-slip surface that guarantees tight and reliable connection with fluid containers
- adjustable from 5 to 250 ml/h (dark blue digits on white background) for viscosities below 10% and adjustable from 5 to 200 ml/h (white digits on dark blue background) for viscosities 10%-40%
- ability to completely close (OFF) and open (ON) the flow rate
- air-inlet with anti-bacterial filter and coloured (blue) flap
- dropler chamber and drain made of phthalate-free PVC
- dropper: 20 drops = 1 ml ± 0.1 ml
- fluid filter protecting against larger particles with pore size 15 µm
- soft, flexible drain with additional port for drug application
- universal Luer-Lock tip secured by an Air Pass plug with a hydrophobic filter, which allows the drain to be filled without accidental contamination and prevents fluid leakage
- precise safe roll clamp with integrated spike holder and with a holder for securing the drain
- name of the manufacturer placed on the roll clamp
- both tips of the device additionally secured with protective caps
- single-use
- non-pyrogenic, non-toxic
- individual packaging: paper-foil with a coloured code (blue) identifying the device type

indication

- device intended for connection to an intravenous line for the administration of fluids, photosensitive medicinal products solutions and other body fluids during infusion therapy with adjustable flow control

REF	version	length
IS-RP-BF	without phthalates	180cm

bulk packaging:
100 pcs

precision flow regulator

features

- precision regulator to set the exact desired flow rate within a range of 5-250 ml/h with the possibility to completely close or open the flow rate
- two adjustment scales, differentiated by colour
- adjustment from 5 to 250 ml/h (dark blue digits on white background) for viscosities below 10% and adjustment from 5 to 200 ml/h (white digits on dark blue background) for viscosities of 10%-40%.
- additional Y port for drug administration
- luer lock termination
- both ends of the tube protected by protective caps
- single-use
- non-pyrogenic, non-toxic
- unit packaging: 1 piece paper/foil

indication

- dual scale regulator for precise administration of drugs and fluids as well as parenteral nutrition
- compatible with any infusion set model

REF	version	length
REG-BF-001	without phthalates	50 cm

bulk packaging:
200 pcs

conallhealth
Your Partner In Healthcare

easyFLOW TS PREMIUM

transfusion set

features

- 2-way sharp spike of the drip chamber with matted surface that guarantees tight and reliable connection with fluid containers
- air-vent with anti-bacterial filter and a coloured (red) flap
- flexible droplet chamber
- dropper: 20 drops = 1 ml +/- 0.1ml
- special blood filter with large area, pore size 200µm
- soft, flexible drain
- universal luer-lock drain tip secured by an Air Pass stopper with a hydrophobic filter that allow the drain to be filled without accidental contamination and protects against fluid leakage
- precise safe roll clamp with integrated spike holder and with a holder for securing the drain
- name of the manufacturer placed on the roll clamp
- both tips of the device additionally secured with protective caps
- single-use
- non-pyrogenic, non-toxic
- individual packaging: blister-pack with a coloured code (red) identifying the device type

indication

- device intended for connection to an intravenous line for the administration of blood and blood products

REF	version	length
TS-BF-P	without phthalates	150 cm

bulk packaging:
250 pcs

easyFLOW TS

transfusion set

features

- 2-way sharp closure-piercing device of the drip chamber with anti-slip surface that guarantees tight and reliable connection with containers/bags
- air inlet with anti-bacterial filter and a coloured (red) flap
- pliable drip chamber
- dropper: 20 drops = 1 ml +/- 0,1 ml
- special blood filter with large area, pore size 200 µm
- soft, flexible tubing
- universal Luer-Lock fitting at the end of tubing
- precise safe flow regulator with integrated holder for the closure-piercing device and with hook for securing the tubing
- name of the manufacturer placed on the flow regulator
- both tips of the device additionally secured with protective caps
- single-use
- non-pyrogenic, non-toxic
- packaging: 1 pc./paper-foil with a coloured code (red) identifying the device

indication

- device used for the administration of blood and blood products

REF	version	length
TS*	with phthalates	150 cm
TS-BF**	without phthalates	150 cm

bulk packaging:
250 pcs

easyFLOW LINE

extension tube for infusion pump

features

- tubing made of PVC
- device available in a transparent and amber version for photosensitive medicines
- diameter of the tubing - outer: 2,4 mm; inner: 1,24 mm
- Luer-Lock fitting - male and female
- single-use
- non-pyrogenic, non-toxic
- packaging: 1 pc./paper-foil

indication

- device used to extend infusion line

REF	colour of tube	length	intermediate packaging
P450-BF	transparent	45 cm	50 pcs
P1500-BF	transparent	150 cm	50 pcs
PB1500-BF	amber	150 cm	50 pcs

bulk packaging:
24 x 50 pcs

needle free valve

with extension line

features

- housing made of transparent material - polycarbonate
- high-quality silicone membrane allows multiple port injections
- flat injection surface - smooth and evenly ended port membrane that facilitates disinfection
- extension line made of transparent polyurethane
- metal-free, suitable for MRI examination
- extension lines fitted with sliding clamps
- male connector protected with applicator
- total length 15 cm
- can be used for 7 days or 350 activations
- filling volume of needle-free port 0.09 ml
- dead space 0.001 ml
- resistance to injection fluid pressure 3 bar (44 PSI)
- resistance to back pressure 2 bar (29 PSI)
- single-use
- packaging: 1 pc. / paper-foil

indication

- device used to close infusion ports for multiple, needle-free injections and to protect the infusion line from contamination
- does not require using safety caps
- dedicated for standard Luer and Luer Lock connectors

REF	diameters of extension lines	flow	number of needle-free ports
PB-T/1-27	1,0 x 2,7 mm	115 ml/min	1

PB-T/4-27	1,0 x 2,7 mm	65 ml/min	4
PB-T/4-40	3,0 x 4,0 mm	135 ml/min	4

bulk packaging:
20 x 50 pcs

needle-free valve

features

- body made of transparent material - polycarbonate
- high-quality silicone membrane allows multiple port injections
- flat injection surface - smooth and evenly ended port membrane that facilitates disinfection
- metal-free, suitable for MRI examination
- male connector of the transparent port is secured with a cap allowing for aseptic removal of the item from the packaging*
- may be used for 7 days or up to 350 activations
- priming capacity: 0.09 ml
- high flow rate: 350 ml/min
- withstands injection fluid pressure of 3 bars (44 PSI)
- withstands back pressure of 2 bars (29 PSI)
- single-use
- packaging: 1 pc./paper-foil

indication

- intended for closing infusion ports
- device intended for multiple, needle-free injections (liquid drug administration, blood sample taking)
- protects infusion lines from contamination and infection during infusion therapy
- does not require using safety caps
- dedicated for standard Luer and Luer Lock connectors

REF	colour	intermediate packaging
PB-N	blue	100 pcs
PB-T	transparent	100 pcs

bulk packaging:
20 x 100 pcs

3-way stopcock

features

- made of polycarbonate
- transparent housing
- clear optical identifier of open/close position (marked flow directions) operating in 360 degrees
- consistent, straight flow channels and an optimal internal diameter ensure correct pressure measurement
- rotating male Luer-Lock
- all inlets protected with caps
- resistant to lipids
- single-use
- non-pyrogenic, non-toxic
- packaging: 1 pc./paper-foil

indication

- device designed for managing the flow of infusion fluids during administration
- enables switching the infusion flow path
- for blood pressure monitoring
- for direct medicine/fluid supply

REF	colour	intermediate packaging
KT-002	blue	50 pcs

bulk packaging:
20 x 50 pcs

3-way stopcock with extension tube

features

- three-way stopcock with an extension tube of various lengths (from 7 cm to 100 cm)
- transparent housing
- clear optical identifier of open/close position (marked flow directions)
- three-way stopcock made of polycarbonate, extension tube made of PVC
- all inlets protected with caps
- resistant to lipids
- single-use
- non-pyrogenic, non-toxic
- packaging: 1 pc./paper-foil

indication

- device designed for managing the flow of infusion fluids during administration
- enables switching the infusion flow path
- for blood pressure monitoring
- for direct medicine/fluid supply

cannula stopper

features

- precisely and safely closes standard ports
- Luer-Lock stopper has only one male tip
- combi stopper with male and female tip especially dedicated for securing Luer Lock fitting in infusion and transfusion sets
- single-use
- non-pyrogenic
- packaging: 1 pc./paper-foil

indication

- as a stopper of intravenous cannulas, ports and catheters
- intended to be used in combination with other devices during infusion therapy, protecting against the outflow of blood through the cannula and protecting against contamination and infection

REF	type	intermediate packaging	bulk packaging
KDKLL	Luer-Lock	250 pcs	10 x 250 pcs

OXYGEN THERAPY

nasal oxygen cannula

features

- made of medical PVC
- very soft tips with smooth edges
- fastening under the chin with a soft, sliding adjustment ring
- various spacing of the nasal part of the cannula depending on the size
- universal connector compatible with any source of oxygen
- tubing with star cross-section that is resistant to bending
- available in 3 sizes: for adults, for children and for infants with 140 cm, 200 cm, 300 cm and 500 cm long tubing
- single-use
- packaging: 1 pc./foil

indication

- designed to deliver oxygen through the nose

REF	length of tubing	purpose	intermediate packaging	bulk packaging

non-rebreather mask

with tubing

features

- made of transparent, non-toxic PVC
- adjustable nose metal plate and rubber fastening
- equipped with a 210 cm (+/- 5%) long tubing with universal connectors
- tubing with star cross-section that is resistant to bending
- 1000 ml oxygen reservoir
- revolving connector that allows adjusting to patient's position
- silicone valves on the connector and ventilation openings
- single-use
- packaging: 1 pc./paper-foil

indication

- designed to deliver oxygen with precise regulation of concentration, for high oxygen concentration

REF	length of tubing	size
MTW-S	210 cm +/- 5%	S

MTW-L	210 cm +/- 5%	L
MTW-XL	210 cm +/- 5%	XL

bulk packaging:
50 x 1 pc.

oxygen tubing

features

- made of transparent, non-toxic PVC
- tubing with star cross-section that is resistant to bending, with reinforcing straps along the entire length
- standardized connectors at the end of the tubing allowing connection to oxygen devices
- single-use
- packaging: 1 pc./paper-foil

indication

- for transporting oxygen from an oxygen source to another medical device for oxygen supply, e.g. oxygen mask

REF	length of tubing	bulk packaging
DT2100	210 cm +/- 2%	100 x 1 pc.
DT4260	426 cm +/- 2%	50 x 1 pc.

multi-vent mask

with tubing

features

- made of transparent, non-toxic PVC
- adjustable nose metal plate and rubber fastening
- equipped with a 210 cm (+/- 5%) long tubing with universal connectors
- tubing with star cross-section that is resistant to bending
- equipped with 2 jets - white to set mid flow concentration (35%, 40% and 50%) and green to set low concentration (24%, 26%, 28% and 30%)
- single-use
- packaging: 1 pc./foil

indication

- designed to deliver oxygen with precise regulation of concentration, regardless of way of patient's breathing

REF	length of tubing	size
MTVR-L	210 cm +/- 5%	L
MTVR-XL	210 cm +/- 5%	XL

bulk packaging:

nebulizer mask

with tubing

features

- made of transparent, non-toxic PVC
- adjustable nose metal plate and rubber fastening
- equipped with a 210 cm (+/- 5%) long tubing with universal connectors
- tubing with star cross-section that is resistant to bending
- 8 ml nebulizer (graduated every 1 ml)
- average size of the molecule at a flow of 6l/min - 3,23 µm
- single-use
- packaging: 1 pc./paper-foil

indication

- for producing aerosol containing a comminuted medicine, that can be delivered directly to the respiratory system as the patient breathes

REF	length of tubing	size
MTN-S	210 cm +/- 5%	S
MTN-M	210 cm +/- 5%	M
MTN-L	210 cm +/- 5%	L
MTN-XL	210 cm +/- 5%	XL

bulk packaging:
50 x 1 pc.

nebulizer

with T F/M adaptor, mouthpiece,
corrugated tube and tubing

features

- made of non-toxic materials
- 210 cm long, bend-resistant tubing with star-shaped cross-section
- nebuliser with a 6ml capacity (graduated every 1ml), producing particles with an average size of MMAD = 3.91 µm at a flow rate of 6 l/min.
- nebuliser, tubing, T-adaptor, mouthpiece, one-way valve and corrugated tube included in a kit
- universal T-adaptor with a diameter of 22M/15F - 22F enables the kit to be connected to endotracheal, tracheostomy tube or breathing circuit and perform nebulisation on mechanically ventilated patients
- the universal (detachable) mouthpiece allows nebulisation to be given to patients who are breathing on their own
- silicone one-way valve (detachable) reduces medication waste during nebulisation
- single-use
- packaging: 1 pc./foil

indication

- device is designed to produce an aerosol containing fragmented medication, which can be delivered deep into the respiratory system with the patient's inhalation
- enables nebulisation to be carried out in mechanically ventilated patients by connecting directly to the endotracheal tube, tracheostomy tube or inspiratory arm of the ventilator breathing system
- allows you to perform nebulisation in patient „on one's own breath“

REF	length of tubing
NUTR	210 cm +/- 5%

 bulk packaging:
100 x 1 pc.

bulk packaging:
10 x 20 pcs

intubation stylet

features

- made of PVC-coated aluminium
- special material for both stiffness and pliability
- intended for use during difficult intubation
- size and diameter markings
- soft distal tip
- single-use
- packaging: 1 pc./paper-foil

indication

- allows you to give the endotracheal tube the right curvature
- introduced to the endotracheal tube facilitates intubation in routine and difficult cases, when the laryngeal inlet is not visible

REF	size	diameter	length	tube size	intermediate packaging
PRI-06	6 Fr	2,0 mm	310 mm (±10)	from 2,0 to 4,0	20 pcs
PRI-10	10 Fr	3,3 mm	390 mm (±10)	from 4,5 to 6,5	20 pcs
PRI-14	14 Fr	4,7 mm	390 mm (±10)	from 7,0 to 10,0	20 pcs

bulk packaging:
20 x 20 pcs

tracheal tube introducer

curved

features

- made of medical grade low density polyethylene
- curved and rounded tip enables safe intubation without damaging the soft tissues
- optimum flexibility and rigidity facilitate correct insertion and safe removal of the introducer after intubation
- imprint of the size, diameter and manufacturer's name on the device
- bright yellow body for increased visibility of the introducer in the tracheal tube canal
- clear, easy to read graduation every 1 cm
- available in three sizes and lengths
- single-use
- PVC free
- packaging: 1 pc./paper-foil

indication

- for use during difficult intubation procedures
- as an aid to facilitate the insertion of the endotracheal tube during standard intubation

REF	size	diameter O.D.	total length	tube size	graduation	intermediate packaging

endotracheal tube holder

features

- made of high-quality materials
- universal Velcro fasteners enabling fast and effective fixing of the holder around the head
- adjustable handle allows for easy and fast fixation of every size of endotracheal tube
- special design of the bite-piece prevents patient trauma or damaging the tube (by biting)
- additional opening allows for chyme, saliva and blood suction from the oral cavity
- single-use
- packaging: 1 pc./paper-foil

indication

- to stabilize the position of the endotracheal tube after its insertion into the trachea

REF	version	colour
SRI-N	horizontal fixation	blue-red
SRI-A	vertical fixation	green

bulk packaging:
100 x 1 pc.

oropharyngeal airway/guedel airway

features

- made of high quality PE (polyethylene), free of PVC
- distinctive anatomical curve of airway tube allows for the opening of the upper respiratory tract and the free flow of anaesthetic gases, air
- colour coded sizes
- numeric marking of the size on the airway
- single-use
- packaging: 1 pc./foil

indication

- used during artificial ventilation procedures to ensure the airway patency
- as a tool for paramedic to assist in the management of a casualty's airway which increases the effectiveness of the rescue operation
- facilitates the stabilization of the endotracheal tube and protects it against biting

laryngeal mask

PVC

features

- made of medical PVC
- elastic mask body with description (size, cuff volume, suggested patient's weight)
- elliptic shape, flexible sealing cuff and universal, transparent connector: 15 mm
- colour-coded valve protection makes it easy to quickly recognize size
- single-use
- compatible with magnetic resonance (MR)
- no metal elements
- packaging: 1 pc./paper-foil

indication

- device inserted through the mouth, up to the back of the throat, forms a seal at the top of the glottis in order to:
 - direct protecting the patient's airway patency
 - artificial ventilation also during cardiopulmonary resuscitation
 - maintaining airway patency in: short-term surgical procedures, without the need of muscles relaxation, when endotracheal intubation is not necessary and under anesthesia for diagnostic procedures

tracheostomy tube

cuffed

features

- made of medical, flexible PVC
- swivel 15 mm connector
- flexible neckplates with slits for strap insertion to secure tube position
- soft, low-pressure, thin-walled cuff
- pilot balloon in contrasting colour clearly indicates the level of the cuff's inflation
- 2 fixation straps protected with foil
- clear size marking on the neckplates
- atraumatic, soft rounded tip, curved cannula
- radiopaque line
- equipped with obturator
- single-use
- packaging: 1 pc./rigid blister

indication

- to control respiratory tracts in people after tracheostomy
- introduced to the airways by a surgical incision of the tracheal's front wall to allow ventilation
- provides free breathing bypassing the nose, throat and larynx

air cushion anaesthetic mask

features

- due to the high quality of materials used, ventilation is conducted in an atraumatic and safe way for the patient
- anatomically shaped inflatable cuff, ensures perfect tightness of the mask with minimal pressure
- device, when applied to the face, tightly covers the patient's mouth and nose without compressing the eyes
- clear shell provides continuous visual observation of the patient
- colour-coded retaining rings, easy for size recognition
- retaining ring can be removed when it is not needed
- full size range allows to properly choose the size of the mask depending on the age of the patient
- all sizes are equipped with inflatable check valve to adjust air amount for best cushion fitting auto patient's face
- single-use
- packaging: 1 pc./foil

indication

- intended for the administration of a gas mixture coming through devices for artificial ventilation
- enables performing medical procedures including artificial ventilation, administration of anesthetic gas and carrying out emergency treatment of an unconscious patient

REF	size	age of patient/size	colour	bulk packaging
MAP-0	0	neonate	white	200 x 1 pc.

anaesthetic mask with open seal

features

- due to the high quality of materials used, ventilation is conducted in an atraumatic and safe way for the patient
- anatomically shaped open seal made of TPE ensures perfect tightness of the mask with minimal pressure
- polypropylene, transparent mask dome allows continuous visual observation of the patient
- device, when applied to the face, tightly covers the patient's mouth and nose without compressing the eyes
- size embossed on the body and colour-coded seal
- full size range allows to properly choose the size of the mask depending on the age of the patient
- single-use
- packaging: 1 pc./medical foil

indication

- device intended for the administration of a gas mixture coming through devices for artificial ventilation
- enables performing medical procedures including artificial ventilation, administration of anesthetic gas and carrying out emergency treatment of an unconscious patient
- device used in hospitals (operating theaters, intensive care units, emergency departments) as well as during pre-hospital care by rescue teams carrying out rescue operations in an unconscious patient

catheter mount with double swivel elbow connector

features

- smooth bore type made of medical PVC
- expandable type made of high quality PE, EVA
- universal patient connection: 22M/15F
- ventilation device side connector: 15M or 22F
- expandable version characterized by shape memorizing and by the ability to control the position of the connector
- double swivel elbow connector
- port for suctioning and bronchoscope secured with a stopper
- available in versions: smooth bore and expandable
- single-use
- packaging: 1 pc./paper-foil

indication

- used to connect the tracheostomy tube or endotracheal tube with the breathing circuit of the ventilation device
- provides greater mobility and rotation of the connection, increasing patient comfort and safety

REF	type	connection	length (without connectors)	intermediate packaging
PM-15-G	smooth bore (not expandable)	22M/15F-15M	15 cm	10 pcs

PMR-22-K	expandable	22M/15F-22F	8-15 cm	10 pcs

 bulk packaging:
10 x 10 pcs

dual-limb breathing circuit

features

- made of high quality EVA material, without PVC
- 15F/22M and 22F universal connector fits compatible products and devices for mechanical ventilation or anesthesia machine
- expandable arms with maximum length of 160 cm
- adjustable length of circuit enabling adjustment of length of respiratory system and optimization of dead space
- equipped with latex-free breathing bag: 3l (for adults) or 1l (for children)
- additional expandable tube, length: 100 cm
- elbow with Luer-Lock port
- single-use
- packaging: 1 pc./foil

indication

- for patient's mechanical ventilation
- it enables transporting breathing mixture from equipment (ventilator, anesthesia machine) to respiratory protection device (e.g. tracheal tube, tracheostomy mask) and vice versa

with bag

REF	purpose	capacity of bag	bulk packaging

SUCTION CATHETERS, STOMACH TUBES

suction catheter with vacuum control

features

- made of soft and flexible PVC, that is resistant to bending and kinking
- frozen surface prevents the catheter from sticking to the wall of the endotracheal tube
- full control over the suction
- atraumatic, soft rounded, open tip
- tip with two alternating lateral eyes with smooth edges
- colour-coded connectors for size recognition, numerical size identification on the packaging
- single-use
- packaging: 1 pc./paper-foil

indication

- device designed for suction of secretions from the upper respiratory tract

suction catheter with frozen surface

features

- made of soft and flexible PVC, that is resistant to bending and kinking
- frozen surface enabling easy insertion
- atraumatic, soft rounded, open tip
- tip with two opposite lateral eyes with smooth edges
- colour-coded connectors for size recognition, numerical size identification on the packaging
- single-use
- packaging: 1 pc./paper-foil

indication

- device designed for suction of secretions from the upper respiratory tract
- recommended for source of suction with its own suction force regulation

feeding tube graduated, with X-ray contrast

features

- made of soft PVC with a frosted surface, resistant to bending and kinking due to the appropriate degree of hardness
- atraumatic, soft rounded, closed tip facilitates precise insertion of catheter
- two alternate end holes with gently stretched edges
- connector compatible with the conical tip of Luer syringe
- integrated stoper allows the tube to be closed tightly
- colour-coded connectors for size recognition, numerical size identification on packaging
- radiopaque line along the entire length of the catheter
- digital depth graduation every 1 cm (from 5 cm to 40 cm)
- length 50 cm
- name of the manufacturer placed on the catheter
- individually packed straight
- single-use
- packaging: 1 pc. / paper-foil

indication

- device inserted through patient's nose or mouth to perform enteral nutrition

stomach tube/duodenal tube

features

- made of PVC
- made of material that is resistant to bending and kinking due to the appropriate degree of hardness
- atraumatic, soft rounded closed tip
- four lateral eyes with smooth edges
- colour-coded connectors for size recognition, numerical size identification on packaging
- stomach tube is available in 3 lengths: 80 cm, 100 cm, 125 cm and duodenal tube is available in 150 cm length
- single-use
- packaging: 1 pc./paper-foil

indication

- inserted through nose or mouth into stomach or duodenum
- drainage of stomach/intestinal content
- decompression of stomach (air or food evacuation)
- gastric lavage
- taking samples of stomach content
- control of bleeding from the upper section of digestive tract
- evaluation of secretory function
- administration of medicines, fluids and/or food content into stomach or duodenum

UROLOGICAL CATHETERS, URINE BAGS

Foley catheter

2-way, silicone-coated latex

features

- made of soft and flexible latex, that is resistant to bending and kinking
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- silicone-coated surface that allows atraumatic insertion of the catheter
- easy to fill and to empty, tear-resistant balloon of various capacities
- plastic or rubber valve to ensure balloon tightness
- CH 6, CH 8, CH 10 size has a guide to facilitate catheterization
- single-use
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- to drain urine from the bladder

with plastic valve

Foley catheter

3-way, silicone-coated latex

features

- made of soft and flexible latex, that is resistant to bending and kinking
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- additional inlet for flushing out the bladder
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- silicone-coated surface that allows atraumatic insertion of the catheter
- easy to fill and to empty, tear-resistant balloon
- plastic valve to ensure balloon tightness
- single-use
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- to drain urine from the bladder

Foley catheter

2-way with tiemann tip, silicone-coated latex

features

- made of soft and flexible latex, that is resistant to bending and kinking
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- angled tip makes it easier to overcome obstacles in the urinary tract
- tip with two lateral eyes with smooth edges
- silicone-coated surface that allows atraumatic insertion of the catheter
- easy to fill and to empty, tear-resistant balloon
- plastic valve to ensure balloon tightness
- single-use
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- to drain urine from the bladder in the case of a narrowed urethra

Foley catheter

2-way, 100% silicone

features

- made of soft and flexible silicone, that reduces the allergic reaction of the mucous membranes and increases the patient's comfort
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- radiopaque line along the entire length of the catheter
- easy to fill and to empty, tear-resistant balloon of various capacities
- plastic valve to ensure balloon tightness
- CH 6, CH 8, CH 10 size has a nylon guide to facilitate catheterization
- available in version with 10 ml sterile water pre-filled syringe with 10% glycerin to seal the balloon
- separately packed Catheter Spigot inside the packaging
- single-use
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil
- intermediate packaging: 10 pcs for REF: CFNS-2D-XX-XX-P, 5 pcs for REF: CFNSG-2D-XX-XX-P

urine bag

features

- latex-free 2000 ml bag made of 0,22 mm thick PVC (double wall)
- double sealed PVC for maximum protection against tearing the bag
- effective non-return valve
- tight T-valve, that can be easily operated with one hand
- connecting tubing with universal stepped connector, standard tubing length 90 cm and 150 cm
- tubing made of material that is resistant to bending and kinking and which ensures a free and effective urine outflow
- precise, easy-to-read scale (every 100 ml), adequate for diuresis measurement
- strengthened holes for hanging, matching standard hangers
- white back wall making urine easy to notice
- single-use
- packaging: 1 pc./foil

indication

- for 24-hour extracorporeal collection of urine and other body fluids
- maximum time of use - 24 hours

urine bag

with sample port 2W

features

- latex-free 2000 ml bag made of medical grade PVC
- white back wall making urine easy to notice
- effective non-return valve
- tight T-valve, that can be easily operated with one hand and which can be folded and tucked in a hard sheath
- Pasteur type droplet chamber providing a „dry“ air barrier
- two hydrophobic air filters (in a bag and chamber), which prevent sucking, balancing the pressure inside the system
- 120 cm long, large diameter tubing, ensuring a free and effective urinary outflow with a universal stepped connector
- self-tightening port for sample taking at the end of tubing
- tubing equipped with a sliding clamp and a fastening pin to stabilize the tubing
- at the place where the tubing connects to the chamber, an additional reinforcing element prevents bending and kinking the tubing
- precise, easy-to-read scale, adequate for diuresis measurement, with high measurement accuracy, every 25 ml from 25 ml to 100 ml and every 100 ml from 100 ml to 2000 ml
- tag to describe the patient's details and date
- integrated universal hanger system matching the round and square bed rails
- additional fixing with a string
- single-use
- packaging: 1 pc./paper-foil

indication

- device is intended for 14-days urine collection in a closed system

REF	capacity	length of tubing

50 x 1 set

surgical suction set

with Yankauer cannula, bulb tip

CANNULA

- cannula with bulb tip with four lateral eyes, which prevent the tip from sticking to the tissues and one central opening
- completely transparent for full possibility of observing the sucked secretion
- light and perfectly balanced handle ensures high comfort of work and reduces hand fatigue
- perfectly smooth inner surface prevents blocking or retaining the sucked content, ensuring correct and optimal flow
- cannula with double bend of curvature
- universal stepped connector ensures tight connection with a wide range of suction connecting tubes

TUBE

- made of soft and flexible PVC
- along the tube a special longitudinal reinforcement to prevent bending and sucking of the tube
- perfectly smooth inner surface of tube prevents the sucked content from settling on the walls, ensuring correct and optimal flow
- connector type funnel-funnel cut-to-fit with the possibility of cutting in the marked places of the connector and matching to any type of medical suction device (for the diameter of 8 mm to 18 mm)
- funnel connector equipped with a special bending system, enabling convenient manipulation of the tube
- tube connectors compatible with the standard suction cannulas, enabling their reliable, effective and tight connection

features

- available with or without suction control
- single-use
- packaging: 1 set/double packaging: internal- foil, external- paper-foil

indication

- evacuating secretions and body fluids from the operating field in general surgery

BASIC PRODUCTS FOR GYNECOLOGY

vaginal speculum

cusco type

features

- both blades made of transparent polystyrene
- locking bolt made of polyethylene
- blades position blocked by a quarter turn of the Locking bolt (without screwing in the bolt)
- perfectly smooth and streamlined edges
- colour coded bolts depending on the size
- single-use
- packaging: 1 pc./foil

indication

- device designed for gynecological examination of the cervix and vagina

REF	width	colour	size
WG-XXS	16 mm	yellow	XXS

umbilical cord clamp

features

- made of polypropylene
- safe clamping teeth with rounded edges do not cut the umbilical cord
- serrated clamping surface of the arms stabilize the clamp on the umbilical cord, after closing it is not possible to open the clamp again
- double Lock catch prevents accidental opening
- universal size
- single-use
- non-pyrogenic
- packaging: 1 pc./paper-foil

indication

- device is designed for clamping the umbilical cord of a newborn in a labour ward in order to close the lumen of the umbilical blood vessels after cutting it off of the placenta

OTHER PRODUCTS

ID wristband

features

- durable wristband coating characterized by high humidity resistance and resistance to the activity of soaps, hand disinfectants and other liquids used in hospitals
- made of soft and delicate vinyl
- flexible, delicate, very light and easy to put on
- rounded edges prevent from injuring
- high tensile strength
- colour marking depending on the purpose
- single-use fastening resistant to accidental break
- hypoallergenic, latex-free, phthalate-free
- available in a version with a description field directly on the band and with an insert card
- packaging: 100 pcs/box

indication

- for identification of patients in hospital wards

REF	purpose	colour	version	intermediate packaging

entrance mat

features

- blue mat consisting of 30 layers - thin sticky sheets
- each of the sticky sheets made of polyethylene resin
- does not contain heavy metals
- excellent adhesive properties
- the first and last sheets secured with a non-adhesive foil
- low mat profile: app. 2 mm thick
- the bottom surface adheres very well to the floor over the entire surface, preventing adverse movement of the mat, allowing trouble-free passage of trolleys with equipment or beds, without the risk of curling up the mat or tearing
- no need to clean the mat - as soon as the surface of the mat is contaminated, it should be torn off to uncover a new, clean sheet
- there is numbering of sheets on a white non-adhesive material in the mat corner facilitate quick identification and easy removal of subsequent sheets
- light, easy to spread

indication

- preventing spreading of contamination brought on shoe soles and wheelchairs to operating rooms

enema bag

features

- bag with a capacity of 1750 ml with two holes for hanging
- made of medical PVC
- scaled from 50 ml to 1750 ml
- linear scale every 100 ml, digital scale every 200 ml
- tube with a length of 150 cm with a sliding clamp, ended with an atraumatic opening and one lateral opening
- tube end is secured with a tube cap
- upper part of the bag is reinforced with an additional flange stabilizing the inlet during filling with liquid
- flange is equipped with a non-return valve
- single-use
- packaging: 1 pc./foil

indication

- bag that allows introduction of fluid into the large bowel through the anus to remove fecal material and stimulate peristaltic bowel movement

REF

vomit bag

features

- bag is made of durable, transparent blue foil, enabling the observation of secretions
- total bag capacity: 2000 ml
- exact measuring graduation (from 10 ml to 100 ml every 10 ml and from 100 to 2000 ml every 100 ml) placed on the bag allows accurate estimation of fluid volume
- direction of graduation reading for small volumes is marked with the tip
- wide bag inlet protected by a plastic collar
- circle-shaped collar ensures a firm grip, makes it easier to maneuver the bag, reducing the risk of content contamination
- collar equipped with a special incision to close the bag and hygienic disposal of the vomit - „twist and hook“
- device name, manufacturer's name and pictorial instructions for use printed directly on the bag
- single-use
- class I non-sterile medical device
- packaging: 20 pcs/foil bag

indication

- recommended in uncomfortable situations, in cases of gastroesophageal reflux requiring immediate action
- used in hospitals, outpatient departments, ambulances, etc.

safeLANCE

pressure-activated safety lancet

features

- easy to use, minimizes unpleasant feelings
- special construction allows lancet tip to be automatically inserted into finger pad and then to be retracted so that needle is not visible before or after puncturing
- correctly matched size of lancet allows you to get optimal amount of blood with minimal patient's pain
- design ensures safety for medical personnel and patient by eliminating accidental puncture and infection
- perfect guidance of lancet needle inside housing reduces vibration, thus decreases patient's pain and prevents damage to skin tissue
- available in two sizes:
 - 23 G, puncture depth 1,8 mm - green, dedicated for women and children
 - 21 G, puncture depth 2,4 mm - pink, dedicated for men
- single-use
- packaging: 100 pcs/box

indication

- capillary blood sampling from fingertip or ear flap for testing, for example, glucose level

tactical tourniquet CAT

features

- made of soft and breathable material to prevent chafing and skin burns
- additional element to secure the tourniquet and control blood flow
- locking system to prevent accidental opening of the tourniquet
- one-handed mechanism
- durable loop system with internal, free-moving strap that provides circumferential compression to the limb
- the unique double fastening system allows to avoid the use of screws and clips
- high quality of workmanship
- place to write down the time of establishment
- weight: 82g
- folded dimensions: 16 cm x 6 cm x 4cm
- unfolded dimensions: 96 cm x 4 cm
- individually wrapped in foil packaging
- single-use

indication

- tactical tourniquet used in case of limb injuries with massive arterial or venous bleeding that cannot be controlled by traditional techniques

REF	dimensions	intermediate packaging
ST-001	96 cm x 4 cm	1 pc.

 bulk packaging:

medical waste container

features

- blow-moulded container made of high density polyethylene (HDPE), lid made of polypropylene (PP)
- lid equipped with a rosette insertion hole and two holes to separate blades from handles, needles from syringes, etc.
- dual-function lid for temporary or permanent closure of the container
- high resistance to mechanical deformation
- manufactured in red warning colour, other colours (yellow, blue) available on request
- supplied with a BML-type label, injected during blowing, with an international warning sign and place for easily writing the waste data, even with a pen
- resistant to UV radiation, formalin and ethyl alcohol
- it is approved by the National Institute of Public Health
- according to the requirements of the standards: ASTM F2132-01 (puncture resistance) and EN ISO 175 (resistance to immersion in liquid chemicals)
- single-use
- MOQ 5000 pcs

indication

- intended for the collection of solid, hazardous medical waste such as needles, intravenous cannulas, syringes, disposable gloves, etc.
- the container enables the safe storage, transport and disposal of medical waste, ensuring safety in terms of hygiene and sanitary standards, as well as mechanical safety to prevent unwanted events such as punctures and cuts when medical staff dispose of sharp waste

Dressing materials have for years been the core of patient care. Constant development in this field causes more advanced products to appear next to the basic ones.

Dressing does not translate into using only the basic compresses and tapes any more. Naturally the function of each dressing depends on the requirements, overall patient health and the conditions in which the product is to be used.

The offer of ZARYS International Group falls into few categories and encompasses a complex range of solutions such as:

- gauze and non-woven dressings, compresses and drapes whose main function is to absorb the exudate and dress the wound in hospital and home care conditions,
- adhesive tapes made of various materials used for dressing and drain fixation as well as dressings with absorbent pads that enable fast dressing of minor injuries,
- special purpose dressings composing of solutions dedicated to specific conditions such as the dressing of post-operative wounds, cannula and drain fixation,
- supporting dressings- including products such as knitted and elastic bandages and tapes,
- stiffening dressings- including padding and P.O.P. bandages.

dressings

traditional dressings materials | adhesive tapes and plasters with dressing | special purpose dressings | stabilizing dressings | specialist dressings | additional products

GAUZE AND NON-WOVEN DRESSINGS

DRESSING GAUZE

features

- 100% hydrophilic cotton
- bleached with the use of hydrogen peroxide
- soft and very absorbent
- increase in absorption capacity with increasing number of gauze threads
- homogeneous structure through a strong twist of fibers eliminates the risk of loose fibers on the surface

indication

- general wound dressing in out-patient clinics, surgical sites, procedure department

dressing gauze, zig-zag folded

GAUZE LAP SPONGES

features

- 100% hydrophilic cotton
- bleached with the use of hydrogen peroxide
- with a sewed in X-ray detectable thread or chip, which enables fast and non-invasive identification of the lap sponge left in the operating field
- with a belt to fix the lap sponge beyond the operating field

indication

- as a surgical invasive dressing material for intraoperative absorption of large amounts of blood and body fluids from surgical wounds

Before used on open wounds, the device must be sterilized in accordance with a validated sterilization method. It can be sterilized with steam or ethylene oxide.

ABSORBENT WOUND DRESSINGS

features

- layered structure: non-woven - cellulose - cellulose pulp
- increased absorption capacity due to the high absorbent cellulose layer
- bottom layer of the dressing covered with waterproof blue non-woven

indication

- removing the exudate from strongly oozing wounds
- covering wounds after surgical procedures

ABD pads, multi-layer

MULTIabsorb

Before use on open wounds, the device must be sterilized in accordance with a validated sterilization method. It can be sterilized with ethylene oxide or radiation.

ADHESIVE TAPES AND PLASTERS WITH DRESSING

ADHESIVE TAPES

features

- flexible, conforms to the body's contours, guarantees freedom of movement
- characterized by adequate air and water vapour permeability
- good adhesion
- can be divided lengthwise and widthwise without the use of scissors
- hypoallergenic

indication

- stabilization, protection and fixation of primary, non-adhesive dressings, applied directly to wounds and skin damages
- stabilization, protection and fixation of drains, catheters, medical tubes that do not require specialized fixing in the place of their insertion

SPECIAL PURPOSE DRESSINGS

SELF-ADHESIVE NON-WOVEN DRESSINGS

DRESSING TAPE

features

- made of hydrophobic non-woven
- covered with hypoallergenic acrylic glue
- micropores in the structure of the non-woven provide adequate vapor permeability, thanks to which a proper gas exchange between the dressing and the skin takes place
- flexible, conforms to the body's contours, guarantees freedom of movement
- backing layer made of silicone paper
- backing paper with metric scale facilitates the division of the tape and precise, painless and efficient application
- packed in a cardboard box - a dispenser that allows dosing without removing the tape from the packaging

indication

- stabilization, protection and fixation of primary, non-adhesive dressings, applied directly to wounds and skin damages
- stabilization, protection and fixation of drains, catheters, medical tubes

HOW TO CHOOSE A DRESSING PROPERLY?

When choosing the proper type of dressing, pay special attention to:

- absorption rate and absorption capacity,
- vapor permeability,
- possibility of an atraumatic dressing change,
- safety of use.

STABILIZING TAPES

non-woven nasal cannula fixation plaster

elastoNASAL

features

- flexible fixation plaster made of non-woven
- covered with acrylic glue
- adequate vapor permeability, thanks to which a proper gas exchange between the dressing and the skin takes place
- thin and flexible plaster is comfortable for the patient, conforms to the body's contours
- "two-stage" application type facilitates precise and efficient application
- self-adhesive
- hypoallergenic

indication

- stabilization of catheters and stomach tubes fixed in the nasal area

REF	dimensions	purpose	packaging unit box
811014	7 cm x 7,1 cm	for adults	50 x 1 pc.
811015	5,9 cm x 6,2 cm	for children	50 x 1 pc.
811016	3,6 cm x 4 cm	for infants	50 x 1 pc.

bulk packaging:
40 x 50 pcs

adhesive tape for catheter tubing fixation

elastoFIXAL

features

- two-part fixing tape consisting of a part attached to the skin and a part fastening the drain
- part attached to the patient's skin made of non-woven fabric
- drain fixing part is integrated with a part adhered to the patient's skin and has an additional adhesive tape - Velcro and adhesive field for better drain stabilization
- possibility of reposition and correction of the drain position thanks to Velcro
- covered with hypoallergenic glue

indication

- stabilization of various types of drains and catheters

REF	dimensions	packaging unit paper-foil	intermediate packaging box
816101	9 cm x 4 cm	1 pc.	50 x 1 pc.

bulk packaging:
20 x 50 pcs

elastoFIXAL KIDS

elastoNASAL KIDS

features

- micropores in the non-woven fabric structure provide appropriate vapour-permeability rate, thanks to which proper gas exchange between the dressing and the skin takes place
- elastic - adheres well, conforms to the body contours
- does not absorb X-rays
- acrylic adhesive applied continuously over the entire surface of the plaster
- backing layer of siliconised paper
- two-step application system facilitating precise and effective application
- hypoallergenic

indication

- stabilization of catheters and stomach tubes fixed in the nasal area

REF	dimensions	purpose	packaging unit box
811015A	5,9 cm x 6,2 cm	for children	50 x 1 pc.

bulk packaging:

cohesive supporting bandage, non-woven

elastoBAND CREPP

features

- one-layer, non-woven bandage
- cohesive - adheres to itself (no need for fasteners), does not adhere to skin, hair, etc.
- breathable
- bandage does not have therapeutic properties, it is a product supporting the healing process
- can be divided into smaller sections, no need to use scissors, the bandage can be torn in the hands
- packaged in foil package or cardboard box

indication

- device intended for holding dressings and for supporting and compressing body parts to treat sprains and strains, and to strengthen skin layers after surgery

elastic tubular net bandage

elastoNET

features

- elastic net bandage in the form of a tube
- contains polyamide and elastomer
- high stretchability and strength of returning to pre-stretch state
- elastic and very soft
- easy and quick to use
- length before stretching:
 - 1 m, stretched: 2,5 m
 - 10 m, stretched: 25 m

indication

- fixation of all dressings on the patient's body, replacing the traditional bandage
- the use of tubular net bandage reduces the time of wound dressing and makes it easier to fix the dressing to the patient's body

FIRST AID FOR DRESSING WOUNDS USING BANDAGES

Hippocrates' achievements in treating head wounds were so widespread and advanced that they are still used today. The Hippocrates cap also called "mitra" is a headgear that allows you to hold the dressing and stop bleeding of the head wound. It is made of two bandage tapes. The main purpose of using the Hippocrates cap is to hold the dressing directly protecting the bleeding head wound, seal and warm the head, hold the compress applied to the skull area, compression, strengthening and immobilization after surgery and additional protection against the external environment. This solution is used in the absence of access to dressings such as elastic dressings and scarves.

How to make a HIPOCRATES CAP?

RULES FOR BANDAGING

1. Prepare a two-head bandage about 5-6 cm wide by sewing together two bands or by twisting the free end to the middle.
2. Put the two-headed bandage on the back of the head and drive bandage to the forehead a circular move.
3. Cross the bandages on the forehead and drive one through the top of the head towards the occiput by a longitudinal move.
4. Drive the other bandage above the ear to the occiput also (half-round).
5. Scroll the longitudinal course through the circular course bandage.
6. Drive back the longitudinal course bandage across the top of the head to the forehead.
7. Drive the circular course bandage around the other ear to the forehead
8. Continue longitudinal and circular moves, the circular course bandage wraps around the scalp
9. Little by little, move the longitudinal course bandage towards the temples
10. After covering the whole area with a two-head bandage, fix the ends of bandage

IMMOBILIZING DRESSINGS

ORTHOPEDIC PADDINGS

features

- very soft and fluffy
- adhere well and adjusts to the shape of the body
- coherent structure resistant to stratification makes it easier placement of the immobilizing dressing
- minimize the risk of skin abrasions and irritations under the P.O.P. bandage
- do not absorb moisture and thus do not allow for its contact with the skin
- hypoallergenic

indication

- as a protective layer put under plaster of Paris bandages
- in compression therapy as a padding under the bandages of various elasticity

made of viscose

triangular sling

elastoSLING

features

- triangle shaped sling made of non-woven or cotton
- thin, light and elastic - comfortable for the patient, adjusts to the shape of the body, provides freedom of movement
- possibility of connecting several slings to achieve bigger immobilization
- hypoallergenic

indication

- short-term immobilization and support of the upper limb in case of various injuries e.g. dislocation or fracture of collar bone, humerus, forearm or hand bone

REF	dimensions	description	packaging unit zipper pouch	intermediate packaging foil bag
CHTW9696136	96 cm x 96 cm x 136 cm	non-woven	1 pc.	12 x 1 pc.
CHTB9696130	96 cm x 96 cm x 130 cm	cotton	1 pc.	12 x 1 pc.

bulk packaging:
20 x 12 pcs

HOW TO PROPERLY PUT ON A TRIANGULAR SLING?

1. Place the triangular sling on the patient's body so that one of the corners of the sling is at the level of the elbow of the immobilized hand.
2. Place the second corner of the sling on the opposite arm in relation to the immobilized hand.
3. Carefully place the sick / injured limb on the sling.
4. Wrap the sick/injured limb with dangling, third corner of the sling.
5. Make sure that the hand is in the right position, and then tie the corners of the sling around the neck.

P.O.P. BANDAGES

features

- made of cotton gauze coated with natural plaster of Paris on both sides
- on a plastic roll
- enable fast and durable immobilization
- before fixing need to be soaked in a container with water at 20°C temperature
- do not absorb X-rays

indication

- large and small immobilizing dressings in orthopedic, ambulatory and surgical procedures

RULES FOR BANDAGING

Select a bandage of proper type and size for the part of the body to be bandaged.

With your right hand, grasp the beginning of the band, and with your left hand hold the rolled part so called "head".

Put the patient in a comfortable position supporting the bandaged lower or upper limb.

For proper stabilization of dressing, start bandaging with a circular wrap, each subsequent layer covers exactly the previous one in a durable and aesthetic way. Little by little unroll the band during bandaging. Finish the bandaging with a circular wrap, end of the dressing secure with a clip or tie it.

The bandage should adhere correctly to the patient's body and be rolled up with adequate power – too much pressure can lead to impaired circulation, too loose it will slide and fall.

Remove the bandage by transferring it from one hand to other to minimize patient movement.

SPECIALIST DRESSINGS

soaked with paraffin

possibility of cutting

paraffin gauze dressing

paraffiNET

features

- wide-mesh dressing made of cotton gauze covered with paraffin
- structure of the carrier material allows exudate to be freely drained to the covering secondary dressing
- covering with a layer of paraffin reduces risk of adhesion to the wound and allows a painless change of dressing
- neutral properties of paraffin allow for using the dressing in combination with other preparations containing medicinal substances or antiseptics
- can be shaped and cut according to the needs aseptically
- needs to be covered with a dressing with absorbent properties, e.g. compress, high-absorption dressing, polyurethane foam
- non-adhesive, necessary fixing with a tape, bandage or net tubular dressing
- hypoallergenic

indication

- keeping proper moisture in the wound
- preventing the wound edges from drying and maceration
- recommended for uninfected wounds
- treatment of chronic wounds: various ulcers, bedsores
- treatment of surgical and burn wounds, skin donor and grafting sites, skin damage, cuts
- protection against radiation skin damage

surgical kits

The company's offer also includes small procedure packs under the deltaset brand. They are used in treatment rooms, emergencies, hospital wards or dialysis units. They contain all disposable products necessary to perform the procedure in aseptic manner.

Deltaset packages are dedicated to a specific procedure, e.g. for changing a dressing, catheterization, dialysis or anaesthesia. The set includes: disposable equipment, dressings, surgical drapes, surgical instruments, accessories, medical gloves and many more.

STANDARD DELTASET SURGICAL KITS

DS-WKL-O-01 PUNCTURE KIT 1

features

- single-use
- for short-term use
- shelf life: 3 years
- label with 2 adhesive tag labels for data archiving; the following information is available on each adhesive tag label: REF number, expiry date, batch number, manufacturer's data and barcode
- packaging: double-chamber hard blister

indication

- intended for use in treatment rooms, emergency services or hospital wards
- it contains auxiliary disposable medical devices necessary to perform the central puncture procedure

no.	quantity	component	specification	individual packaging
1.	1 pc.	2-layer surgical drape	90 cm x 75 cm cellulose layer + waterproof polyethylene film; blue colour	1 kit double-chamber hard blister
2.	1 pc.	2-layer surgical drape with central adhesive fenestration	45 cm x 75 cm fenestration dia. 8 cm, cellulose layer + waterproof polyethylene film; blue colour	
3.	10 pcs	gauze ball without X-ray thread	20 cm x 20 cm 17-thread cotton gauze; white colour	
4.	10 pcs	gauze swab	7,5 cm x 7,5 cm 17-thread cotton gauze, 8-ply; white colour	
5.	1 pc.	plastic tweezers	length 12,5 cm, polypropylene; blue colour	
6.	1 pc.	metal grasper (Pean)	length 13 cm, stainless steel	
7.	1 pc.	metal needle holder MAYO-HEGAR	length 13 cm, stainless steel	
8.	1 pc.	two-piece syringe in paper-foil packaging	capacity 10 ml, Luer	
9.	1 pc.	two-piece syringe in paper-foil packaging	capacity 20 ml, Luer	
10.	1 pc.	injection needle in paper-foil packaging	1,2 mm x 40 mm	
11.	1 pc.	injection needle in paper-foil packaging	0,8 mm x 40 mm	
12.	1 pc.	surgical blade	no. 11	
13.	1 pc.	foil dressing with frame and tape for description in paper-foil packaging	10 cm x 15 cm, polyethylene film	

DS-USZ-O-01 SUTURE REMOVAL KIT 1

features

- single-use
- for short-term use
- shelf life: 3 years
- label with 2 adhesive tag labels for data archiving; the following information is available on each adhesive tag label: REF number, expiry date, batch number, manufacturer's data and barcode
- packaging: single-chamber hard blister

indication

- intended for use in treatment rooms, emergency services, hospital wards or dialysis stations
- it contains auxiliary disposable medical devices necessary to perform the suture removal procedure

no.	quantity	component	specification	individual packaging
1.	1 pc.	surgical blade	no. 11	1 kit single-chamber hard blister
2.	3 pcs	non-woven ball without X-ray thread	20cm x 20cm, non-woven 30G, white colour	
3.	1 pc.	plastic tweezers	length 12,5cm, polypropylene, blue colour	
4.	1 pc.	anatomic metal tweezers	length 12cm, stainless steel	

DS-CEW-O-01 URINARY BLADDER CATHETERIZATION KIT 1

features

- single-use
- for short-term use
- shelf life: 3 years
- label with 2 adhesive tag labels for data archiving; the following information is available on each adhesive tag label: REF number, expiry date, batch number, manufacturer's data and barcode
- packaging: single-chamber hard blister

indication

- intended for use in treatment rooms, emergency services or hospital wards
- it contains auxiliary disposable medical devices necessary to perform the urinary bladder catheterisation procedure

no.	quantity	component	specification	individual packaging
1.	1 pc.	2-layer surgical drape	50cm x 60cm non-woven polypropylene + waterproof, polyethylene film; blue colour	1 kit single-chamber hard blister
2.	1 pc.	2-layer surgical drape with central, fenestration and incision	50cm x 60cm fenestration: diameter 5cm, non-woven polypropylene + waterproof, polyethylene film; blue colour	
3.	2 pcs	examination gloves, nitrile, powderfree, in paper packaging	size. M, 100% nitrile; light blue colour	
4.	6 pcs	gauze ball without X-ray thread	20cm x 20cm, 17-thread cotton gauze; white colour	
5.	8 pcs	gauze swab	7,5cm x 7,5cm, 17-thread cotton gauze, 8-ply; white colour	
6.	1 pc.	plastic tweezers	length 12,5cm, polypropylene; green colour	
7.	1 pc.	plastic grasper (Pean)	length 14cm, polypropylene; blue colour	
8.	1 pc.	sponge bowl	capacity 120ml, polypropylene; transparent colour	

DS-CEW-O-02 URINARY BLADDER CATHETERIZATION KIT 2

features

- single-use
- for short-term use
- shelf life: 3 years
- label with 2 adhesive tag labels for data archiving; the following information is available on each adhesive tag label: REF number, expiry date, batch number, manufacturer's data and barcode
- packaging: single-chamber hard blister

indication

- intended for use in treatment rooms, emergency services or hospital wards
- it contains auxiliary disposable medical devices necessary to perform the urinary bladder catheterisation procedure

DS-DIA-O-01A DIALYSIS ON KIT 1A

features

- single-use
- for short-term use
- shelf life: 3 years
- label with 2 adhesive tag labels for data archiving; the following information is available on each adhesive tag label: REF number, expiry date, batch number, manufacturer's data and barcode
- packaging: soft blister paper-foil

indication

- intended for use in treatment rooms, emergency services, hospital wards or dialysis stations
- it contains auxiliary disposable medical devices necessary to perform the dialysis procedure

no.	quantity	component	specification	individual packaging
1.	1 pc.	2-layer surgical drape	50cm x 35cm cellulose layer + waterproof polyethylene film; blue colour	1 kit soft blister paper-foil
2.	2 pcs	examination gloves, nitrile, powderfree in paper packaging	size. M, 100% nitrile; light blue colour	
3.	2 pcs	IV cannula dressing, self-adhesive	6cm x 8cm, hydrophobic non-woven	
4.	4 pcs	non-woven swab	7,5cm x 7,5cm, non-woven 30G, 4 ply; white colour	
5.	2 pcs	dressing tape, self-adhesive	2,5cm x 15cm	

DS-DIA-O-01B DIALYSIS OFF KIT 1B

features

- single-use
- for short-term use
- shelf life: 3 years
- label with 2 adhesive tag labels for data archiving; the following information is available on each adhesive tag label: REF number, expiry date, batch number, manufacturer's data and barcode
- packaging: soft blister paper-foil

indication

- intended for use in treatment rooms, emergency services, hospital wards or dialysis stations
- it contains auxiliary disposable medical devices necessary to perform the dialysis procedure

no.	quantity	component	specification	individual packaging
1.	2 pcs	examination gloves, nitrile, powderfree in paper packaging	size. M 100% nitrile; light blue colour	1 kit soft blister paper-foil
2.	1 pc.	examination gloves, nitrile	size. L 100% nitrile; white colour	
3.	2 pcs	post-injection dressing, self-adhesive	3cm x 7,2cm polyethylene film; transparent	
4.	6 pcs	non-woven swab	7,5cm x 7,5cm non-woven 30G, 4 ply; colour white	

DS-DIA-O-02 DIALYSIS ON/OFF KIT 2

features

- single-use
- for short-term use
- shelf life: 3 years
- label with 2 adhesive tag labels for data archiving; the following information is available on each adhesive tag label: REF number, expiry date, batch number, manufacturer's data and barcode
- packaging: two-piece soft blister with perforation, paper-foil

indication

- intended for use in treatment rooms, emergency services or hospital wards
- it contains auxiliary disposable medical devices necessary to perform the puncture procedure e.g. central venepuncture, subarachnoid puncture

no.	quantity	component	specification	individual packaging
1.	1 pc.	2-layer surgical drape	50cm x 35cm; cellulose layer + waterproof polyethylene film; blue colour	1 kit two-piece soft blister with perforation, paper-foil
2.	2 pcs	examination gloves, nitrile, powderfree in paper packaging	size. M, 100% nitrile; light blue colour	
3.	2 pcs	IV cannula dressing, self-adhesive	6cm x 8cm, hydrophobic non-woven	
4.	6 pcs	non-woven swab	7,5cm x 7,5cm, non-woven 30G, 4 ply; white colour	
5.	4 pcs	dressing tape, self-adhesive	2,5cm x 15cm	
6.	2 pcs	examination gloves, nitrile, powderfree in paper packaging	size. M, 100% nitrile; light blue colour	
7.	1 pc.	examination gloves, nitrile	size. L, 100% nitrile; white colour	
8.	2 pcs	dressing with absorbent pad, selfadhesive	5cm x 7,2cm	
9.	4 pcs	non-woven swab	7,5cm x 7,5cm, non-woven 30G, 4 ply; colour white	

DS-ZNI-O-01 ANASTHESIA KIT 1

features

- single-use
- for short-term use
- shelf life: 3 years
- label with 2 adhesive tag labels for data archiving; the following information is available on each adhesive tag label: REF number, expiry date, batch number, manufacturer's data and barcode
- packaging: three-chamber hard blister

indication

- intended for use in treatment rooms, emergency services or hospital wards
- it contains auxiliary disposable medical devices necessary to perform procedures of conduction anesthesia

no.	quantity	component	specification	individual packaging
1.	1 pc.	2-layer surgical drape with central fenestration and adhesive corners	75cm x 90cm; fenestration: diameter 8 cm; non-woven polypropylene + waterproof polyethylene film; blue colour	1 kit three-chamber hard blister
2.	10 pcs	gauze swab	7,5cm x 7,5cm, 17-thread cotton gauze, 8 ply; white colour	
3.	1 pc.	plastic window forceps, Korcang type, wrapped in a 2-layer drape with a cellulose layer	length 19 cm, 45cm x 45cm, cellulose layer + waterproof polyethylene film, blue colour	

DS-SZY-O-01 SUTURE APPLICATION KIT 1

features

- single-use
- for short-term use
- shelf life: 3 years
- label with 2 adhesive tag labels for data archiving; the following information is available on each adhesive tag label: REF number, expiry date, batch number, manufacturer's data and barcode
- packaging: double-chamber hard blister

indication

- intended for use in treatment rooms, emergency services or hospital wards
- it contains auxiliary disposable medical devices necessary to perform the puncture procedure e.g. central venepuncture, subarachnoid puncture

no.	quantity	component	specification	individual packaging
1.	1 pc.	2-layer surgical drape with central adhesive fenestration	50cm x 60cm, fenestration: diameter 8 cm; non-woven polypropylene + waterproof polyethylene film; blue colour	1 kit double-chamber hard blister
2.	1 pc.	2-layer surgical drape	45cm x 75cm, non-woven polypropylene + waterproof polyethylene film; blue colour	
3.	3 pcs	gauze ball without X-ray thread	20cm x 20cm 17-thread cotton gauze; white colour	
4.	5 pcs	non-woven swab	7,5cm x 7,5cm non-woven 30G, 4 ply; white colour	
5.	1 pc.	anatomic metal tweezers	length 12cm stainless steel	
6.	1 pc.	plastic tweezers	length 12,5cm polypropylene; green colour	
7.	1 pc.	metal needle holder MAYO-HEGAR	length 13 cm stainless steel	
8.	1 pc.	metal scissors sharp/sharp	length 11,4cm stainless steel	

 omegapack

surgical sets

Surgical sets are medical devices personalized according to customer needs, dedicated to a selected medical procedure.

The sets are assembled on the basis of individual requirements and preferences of Customers

PROCEDURE SETS

Operating theatre is a specific environment where time is the most valuable factor influencing the success of the operation. It is a place where every minute - or even a second - counts, because it can affect the patient's life. To meet the expectations of medicine, ZARYS introduces operating sets to its offer that meet the highest standards, helping to improve the preparation of the operating theatre before the procedure

ADVANTAGES of using omegapack operating sets

<p>TIME</p> <p>unpacking the set and preparing the operating theatre takes about 30% less time than selecting individual products and improving work at operating block</p> <p>REDUCING COST</p>	<p>QUALITY</p> <p>properly selected composition of the set according to individual needs for a specific medical procedure in line with the Customer's order</p>	
	<p>EPIDEMIOLOGICAL SAFETY</p> <p>reduced risk of patient infection by minimizing the time of contact of medical staff with devices during the preparation of the theatre and the patient</p>	
	<p>ENVIRONMENT</p> <p>the amount of generated waste is reduced to a minimum - one packaging</p>	<p>SAVING THE STOCKS</p> <p>reduced number of supplies, saving space in the warehouse</p>
<p>EFFECTIVENESS</p> <p>increasing work productivity, so that you can perform more surgical procedures in one day, improvement of work of medical staff</p>	<p>STANDARDIZATION OF PROCEDURES</p> <p>correct and schematic conduct during the procedure, one package - one treatment</p>	
	<p>EASY RECORD KEEPING</p> <p>optimization of record keeping - one self-adhesive label with the identification of the used set, instead of each used product separately</p>	
<p>REDUCTION OF ERRORS</p> <p>the complete set contains all disposable medical devices necessary for the surgical operation, which eliminates the possibility of errors during the selection of individual products</p>	<p>WIDE RANGE OF PRODUCTS</p> <p>a wide range of medical devices selected individually in accordance with the Customer's preferences</p>	

Medical devices under the omegapack brand by ZARYS are operating sets containing complete equipment with all disposable products necessary to perform a given medical procedure to which the set is dedicated. The operating set contains carefully selected disposable components, such as:

- surgical drapes, pads
- accessories, e.g. fluid collection bags, tapes
- surgical gowns
- surgical gloves
- covers for equipment
- shoe covers, masks, caps
- gauze balls
- gauze and non-woven swabs
- bandages, dressings
- catheters, urine collection bags
- trays, bowls
- taps, three-way stopcocks
- manifolds, connectors
- infusion sets
- suction sets
- disposable surgical instruments
- injection needles and syringes
- disposable electrosurgical electrodes and accessories
- and many more...

Personal protective equipments (PPE) are products that protect against one or more risks to the user's health or safety. These products must comply with Regulation (EU) 2016/425 of the European Parliament and of the Council. PPE is classified into three categories according to the degree of risk.

The coverall is a PPE category III in accordance with the Regulation (EU) 2016/425 of the European Parliament and of the Council

The category III covers products of complex construction, intended to protect health or life against risks that may cause death or irreversible damage to health.

Standards:

Coverall is personal protective equipment of category III in conformity with Regulation (EU) 2016/425 of the European Parliament and of the Council

EN ISO 13688:2013 Protective clothing. General requirements

EN 14605:2005+A1:2009 Protective clothing against liquid chemicals. Performance requirements for clothing with liquid-tight (Type 3) or spray-tight (Type 4) connections, including items providing protection to parts of the body only (Types PB [3] and PB [4])

EN ISO 13982-1:2004+A1:2010 Protective clothing for use against solid particulates. Part 1: Performance requirements for chemical protective clothing providing protection to the full body against airborne solid particulates (type 5 clothing)

EN 13034:2005+A1:2009 Protective clothing against liquid chemicals. Performance requirements for chemical protective clothing offering limited protective performance against liquid chemicals (Type 6 and Type PB [6] equipment)

EN 1073-2:2002 Protective clothing against radioactive contamination. Part 2: Requirements and test methods for non-ventilated protective clothing against particulate radioactive contamination

EN 14126:2003 + AC:2004 Protective clothing. Performance requirements and tests methods for protective clothing against infective agents

class 6 Resistance to penetration of contaminated liquids under the influence of hydrostatic pressure
class 6 Resistance to penetration by infective agents due to mechanical contact with substances
class 3 Resistance to penetration of contaminated liquid aerosols
class 3 Resistance to penetration of contaminated solid particles

EN 1149-5:2018 Protective clothing. Electrostatic properties. Part 5: Material performance and design requirements

EN 14325:2004 Protective clothing against chemicals. Test methods and performance classification of chemical protective clothing materials, seams, joins and assemblages

features:

- made of a laminate (non-woven polypropylene and polyethylene) with a weight of 63 g/m²
- polyester seams additionally covered with tape
- equipped with a hood with elastic trim
- equipped with an elastic waist band, wrists and ankles
- zipper covered with a self-adhesive flap
- available in version with boots

Preventing infections in the operating field is a priority for all medicals. Thanks to our complex offer of single-use protective solutions of ALPHAtex STANDARD, STANDARD+, COMFORT, the post-procedural complications and risk of infection in the operating field are minimized while increasing the protection barrier against the potentially pathogenic germs residing in the human skin layers. We offer:

- patient and equipment drapes
- sets of surgical drapes
- incise films
- surgical covers
- adhesive tapes
- accessories such as fluid collection pouches
- surgical gowns

Properly selected features of surgical drapes provide safety and comfort of use to medical staff and patients. A variety of multi-layer non-woven and laminates reinforced in critical areas in lines STANDARD+ and COMFORT allow to adjust our solutions to particular surgical procedures with maximal cost efficiency.

ALPHAtex products are characterized by parameters frequently exceeding the requirements of EN 13795 for 'Surgical drapes, gowns and clean air suits, used as medical devices for patients, clinical staff and equipment'.

Moreover, they provide a successful protection against the risk of infection in the operating field. Practical solutions and composition of our sets enable their quick and simple application while performing medical procedures.

Prevention of surgical site infection

Surgical site infection (SSI)

is defined as infection occurring up to 30 days after surgery, when there is a possibility of microorganisms penetration into the open surgical wound. Microorganisms could have various sources EXOGENOUS (carried by an external factor as medical staff or medical devices) or ENDOGENOUS (patient's bacterial flora from the closest area surrounding the surgical postoperative wound). The most important routes of infections are airway or contact path. Various type of barriers are used to minimize the surgical site infections: surgical drapes, surgical gowns and medical equipment covers.

Surgical drapes

(the names are based on the EN 13795 standard)

Surgical drapes are used to ensure clean microbiological surgical wound surrounding, minimize the microorganisms migration from patient skin to surgical wound and to supervise the spreading of body fluids from the wound area. Surgical drapes meet the requirements of medical device in accordance with the Directive 93/42/EEC.

Surgical gowns

(the names are based on the EN 13795 standard)

Surgical gowns are used to prevent direct microorganisms transmission from medical staff to patient. Moreover, surgical gowns prevent spreading of exfoliated epidermis in the air of the operating room.

The wide range of ALPHAtex products is a result of over 30 years of ZARYS International Group existence on medical market. Sharing our experience and knowledge we are convinced that using ALPHAtex products will provide comfort, safety and economic effectiveness during daily work in the operating room.

Complex offer of ALPHAtex products contains:

ZONES OF SURGICAL DRAPES ON PATIENT

on the operating room

ZONE 4

NOT HAVING ANY CONTACT WITH PATIENT'S BODY performs the function of anaesthetic cover and operating table cover

ZONE 2

DIRECT SURROUNDINGS OF OPERATING FIELD in this zone surgical drape has got contact with not disinfected patient's body

ZONE 3

PARTIAL CONTACT WITH NOT OPERATED PARTS OF PATIENT'S BODY occasionally exposed to body fluids

ZONE 1

OPERATING FIELD disinfected patient's skin in direct surroundings of surgical wound, mostly protected by incise film

Surgical sets ALPHAtex

contains different disposable medical devices

Standard EN 13795-1:2019

Essential requirements for surgical drapes and surgical gowns results from directive 93/42/EEC and have been included in EN 13795 standard "Surgical drapes, gowns and clean air suits, used as medical devices for patients, clinical staff and equipment". The purpose of EN 13795 standard is to maintain stable level of surgical drapes and surgical gowns safety for the whole using period as well as minimalization of direct microorganisms transmission from medical staff to patient during surgical procedures.

ZARYS

WWW.ZARYS.COM

BASIC TYPES OF MATERIALS USED IN SURGICAL DRAPES:

PF DRAPE - two layer material of the drape containing absorbency layer of cellulose on top and PE foil layer of the drape on back

NF, NFA, NFF, NFFA, NFFAR DRAPE - two layer material of the drape containing absorbency layer of non-woven material on top and PE foil layer on back of the drape

NFN, NFNA, NFNF, NFNFA DRAPE - three layer material on the drape containing absorbency non-woven layer on top, PE foil layer in the middle and non-woven absorbency layer on the back of the drape

It is extremely important for us to offer our clients products that ensure high standards of working conditions and comfort of use.

In order to achieve this goal, we have created a line of high quality products made of different types of non-woven materials:

- polypropylene non-woven
- SMS non-woven
- Spunlace non-woven
- viscose non-woven
- Spunlace Mesh non-woven

A combination of several factors such as optimal design, perfect fit, breathability and structure makes BETAtex products comfortable and reliable. A wide range of solutions will certainly meet our clients' individual preferences and secure extreme comfort and safety for the Medical Personnel and the Patients.

The BETAtex logo, a stylized white 'B' shape.
