DISS (American)		Ref. 22017: vacuum rail mounting system, yellow Ref. 22016: vacuum rail mounting system, white

* Available with other hose colours
or other hose lengths or with a metal clamp upon request only.

**ASP01****PVC hoses**

Diameter: 6 x 12 mm.
Packaging: roll of 40 m.

Ref. 14962: transparent hose

Ref. 14969: yellow hose*

Ref. 14971: black hose

**Roll of 25 m only*

**ASP02****Direct vacuum valve with 100 ml safety jar**

To be used to make a non-regulated suction.
2 positions only: OPEN or CLOSED.

Delivered with a 100 ml polycarbonate safety jar, autoclavable up to 134°C and unbreakable, fitted with an anti-overflow safety device and a single-use antibacterial filter up-front.

The direct vacuum valve with safety jar ensures the protection of the wall outlets against any liquids' overflow and thus protects the vacuum pipeline network against contamination risks.

Ref. 11419: Direct vacuum valve with 100 ml safety jar, mounted with AFNOR* direct probe.

**also available in BS standard upon request.*

**ASP03****AFNOR quick-release connector 3/8G M**

In compliance with the NF S 90-116: 1988 standard.

Ref. 10032

BS quick-release connector 3/8G M

In compliance with the BS 5682: 1998 standard.

Ref. 10037

Y-CONNECTORS SINGLE, DOUBLE AND TRIPLE CONNECTORS

To be used to supply various devices with vacuum from only one vacuum source:

ASP04

Ref. 10021: Y-connector mounted with AFNOR direct probe

Ref. 10027: Y-connector mounted with BS direct probe

ASP05

Single, double and triple connectors

Delivered with a complete rail mounting system with a crimped AFNOR* angled remote probe, 1.5 m transparent hose and a metal universal clamp.

- a** Single vacuum connector
Ref. 15523
Double vacuum connector
Ref. 15527
- b** Triple vacuum connector
Ref. 15538

**also available in BS standard upon request.*

ASP06

Hosepipes for vacuum. Contractual lifetime: 10 years.

Active medical device of class IIa.

In compliance with the EN ISO 5359: 2008 standard

The hosepipes are used as extensions to supply any device or machine with vacuum coming from a standardized outlet.

- Delivered with one crimped AFNOR angled remote probe and one crimped AFNOR straight remote probe.
- Time limit indicator on the angled probe; date easier to read.

Ref. 17041: AFNOR vacuum hosepipe, 1.5 m

Ref. 17043: AFNOR vacuum hosepipe, 3 m

Ref. 17047: AFNOR vacuum hosepipe, 5 m

Other lengths and configurations available upon request.

ASP07**Catheter holders with polycarbonate tubes and with TM universal rail clamp in polycarbonate**

- a Ref. 16595: Complete catheter holder 1 tube 40 cm
- Ref. 16596: Complete catheter holder 1 tube 50 cm
- b Ref. 16597: Complete catheter holder 2 tubes 40 cm
- Ref. 16598: Complete catheter holder 2 tubes 50 cm

**ASP08****TM universal rail clamp in polycarbonate**

Resistant to shocks and in compliance with the NF EN ISO 19054: 2006 European standard (30 mm spread).

The TM universal rail clamp in polycarbonate is used to hang any TECHNOLOGIE MEDICALE device onto a rail system. All devices in compliance with the NF EN 128 European standard (30 mm width) can also be used with the TM universal rail clamp provided the small blue adaptor located in the bottom part of the clamp is taken out by sliding it upwards.

Ref. 11949

ASP09

Metal rail clamp, rilsan-coated aluminium, with support bracket, for rail mounting.

- a Ref. 15657

Wall bracket, aluminium, for wall mounting.

- b Ref. 10313

VACUUM-STOP AND CONTROL VALVES

System used in the context of medical suction to stop manually the suction of liquids.
To be connected to a catheter on one end and to a silicone suction hose on the other end (the suction hose itself being connected to a collection jar).

ASP10

Vacuum-stop

To get suction just put your thumb on the central hole.

- Single-use device
- Model with a membrane
- Available for both adults and children
- Fixed integrated clamp
- 100% controlled
- Reliable
- Ergonomic
- Noiseless
- Delivered non sterile*

Minimum order: 50 pieces

Vacuum-stop with membrane and integrated clamp

- a** Ref. 16612: adult
- b** Ref. 16615: paediatric

ASP11

Vacuum-control (patented)

To get suction just push on the button with your thumb.

- Single-use device
- Piston-type model
- Progressive system to better control the suction
- Available for both adults and children
- With or without swiveling clamp
- 100% controlled
- Reliable
- Ergonomic
- Noiseless
- Delivered non sterile*

Minimum order: 50 pieces

Vacuum-control with swiveling clamp

- c** Ref. 16621: adult
- d** Ref. 16622: paediatric

* Sterilization upon request and for big quantities only.

ASP12

Single-use suction tip for drainage

Minimum order: 50 pieces.
Ref. 16607

ASP13

Silicone suction hose, autoclavable

Packaging: Roll of 25 meters

Minimum order: 25 meters

Ref. 16916: 7x13 mm for 1 L and 2 L collection jars.

Ref. 16917: 8x14 mm for 4 L collection jars.

The vacuum regulator is used to measure and to adjust the vacuum level within the context of surgical and medical suction. It enables to drain substances out of the patient's body during surgical procedures. The vacuum regulator should be connected to a vacuum source on the wall either using a direct probe or a rail mounting system. It is the primary device of a suction system. It should be associated with a collection jar and a suction hose.

Main technical features:

Active medical device of class IIa.

In compliance with the EN ISO 10079-3: 2009 standard.

- **Continuous vacuum regulator.**
- **Compact, strong and ergonomic device.**
- **Manual adjustment of the vacuum gauge from -45° to +45°** for a better visibility. Vacuum gauge protected by a plastic housing.
- **ON/OFF switch-button** providing a quick restoration of the pre-adjusted vacuum level.
- **Central regulation knob** with a free rotation at the end of the course (impossible blocking).
Quick adjustment: 2.5 turns are enough to reach the maximum vacuum level.
- **Supplied as a standard with a 100 ml safety jar** equipped with a mechanical anti-overflow safety valve and a single-use antibacterial plastic filter up-front. Made of polycarbonate, autoclavable up to 134°C and unbreakable, this safety jar does not require any sterilization except in case of accidental liquids' overflow or perforated filter. Money and time savings are guaranteed!
- **Fixing of the safety jar by an easy-click rotation.**
- **Rotation of the safety jar to avoid any pinch of the tubing.**
- **3 in 1 system (patented)**
Device with **a metal outlet tubing nipple integrated in the body of the regulator:** for a better safety, emergency suction can even be processed if running out of stock of filters or safety jars.
- **Easy & safe maintenance**
Easy and safe replacement of the vacuum gauge if needed. The inner system of the regulator is protected but accessible at the back of the device.
- **A unit serial number is laser engraved on the body of each vacuum regulator** ensuring its identification and traceability. 8 digits number indicating the manufacturing year and month as well as the unit serial number of the device.

Many versions available:

- Vacuum levels:
0-1000 mbar/hPa - 0-760 mmHg
0- 600 mbar/hPa - 0-400 mmHg
0- 250 mbar/hPa - 0-200 mmHg
- Configurations: Single and Twin.
- Colors: Yellow and Grey.

- Inlets: 12x100 F – 1/4G M – 1/8NPT F – 3/8G BSP F.
- Connections to the wall outlet: Direct probe or Rail mounting system.
- Standards: AFNOR (French Standard) – BS (British Standard) – DIN (German Standard) – US OHMEDA DIAMOND (American Standard) – DISS (American Standard) – NORDIC (Scandinavian Standard) – UNI (Italian Standard).
Other standards available on demand.
- Weight (with direct probe): 490 g.
- Dimensions (with safety jar and direct probe):
Height 230 mm x Width 70 mm x Depth 90 mm.

Use, cleaning and maintenance:

The adjustment of the vacuum regulator must be done in a closed suction circuit.

- Block the outlet of the RVTM3 vacuum regulator
- Open the ON/OFF switch-button (green part visible)
- Gradually turn the central regulation knob counterclockwise till the needle of the gauge indicates the requested suction level.

Clean the exterior of the device with water and soap. Rinse and dry. If using disinfecting products please check their compatibility with plastics (ABS, polypropylene, polyamide). Do not lay under water.

Change the antibacterial plastic filter of the safety jar after each patient: firmly pull out the filter while making a rotating movement and insert a new filter by pushing it until click-lock adjustment.

The 100 ml safety jar with plastic filter up-front, being protected by the filter at the inlet, does not require any sterilization except in case of accidental liquids' overflow or perforated filter. The safety jar is autoclavable up to 134°C.

The RVTM3 should be serviced every 1 to 3 years depending on use.

It is recommended to lubricate the ON/OFF switch-button every year with a silicone "High Vacuum Grease" (ref. 11853).

Single-use filters:

- Ref. 11813: Tube of 10 antibacterial plastic filters.
Same filters for both RVTM2 and RVTM3 vacuum regulators

Filter = Cleanness of the circuits and fight against nosocomial infections.

Change the filter for each new patient!

Patented model

Compact, strong and ergonomic device.

Vacuum gauge manually **adjustable** from -45° to $+45^\circ$ for a better visibility.
Protected by a plastic housing.

ON/OFF switch-button providing a quick restoration of the pre-adjusted vacuum level.

Central regulation knob with a free rotation at the end of the course (impossible blocking).
Quick adjustment: 2.5 turns are enough to reach the maximum vacuum level.

Fixing of the safety jar by an easy-click rotation.

Rotation of the safety jar to avoid any pinch of the tubing.

100 ml safety jar made of polycarbonate, unbreakable, autoclavable up to 134°C and equipped with a mechanical anti-overflow safety valve.

Single-use antibacterial plastic filter up-front

- **Hygiene:** protection of the patient, the device and the vacuum pipeline network;
- **Useless sterilisation:** time and costs' savings;
- **Perfect visibility of the clogging level.**

Easy and safe maintenance.

Very good readability of the serial number on the body of the device: clean and precise laser marking.

3 in 1 system Patented

► Normal use

① With safety jar + antibacterial filter

Optimal protection of the device and the vacuum pipeline network.
This use is highly recommended by the manufacturer.

► Emergency use

② With outlet tubing nipple + antibacterial filter

③ With outlet tubing nipple

The metal outlet tubing nipple is integrated in the body of the vacuum regulator thus reducing the manipulations and avoiding the risk of losing the nipple.

Emergency use in case the safety jars and the antibacterial filters run out of stock.

RV10

Box of 100 single-use antibacterial paper filters.

Ref: 11818

100 ML SAFETY JAR WITH SINGLE-USE ANTIBACTERIAL PLASTIC FILTER UP-FRONT

Easy and quick replacement of the filter.
It is useless to sterilize the safety jar after each filter replacement as the safety jar is protected by the filter at the inlet.

Technical and financial advantages of the antibacterial plastic filter up-front:

Hygiene: very hygienic system limiting the contamination risk of the device and the vacuum pipeline network. The plastic housing avoids any direct contact with the contaminated filter.

Visibility of the contamination level: thanks to its vertical up-front position, the antibacterial plastic filter is visible even from a distance. As a result it is very easy to check its clogging level and to warn the medical staff about the necessity to replace it in the case of a long-stay patient.

Very easy replacement of the filter: firmly pull out the filter while making a rotating movement, throw it away and insert a new filter by pushing it until click-lock adjustment.

Significant time savings: the safety jar is protected by the filter at the inlet. Thus there is no need for systematic sterilization except in case of accidental liquids' overflow or perforated filter. The very long cleaning and autoclave process of the jar is then avoided.

Generated costs' savings: the easy and quick replacement of the filter as well as the occasional sterilization of the safety jar both generate significant time savings thus improving the global operation costs.

Possibility of connecting the safety jar without filter in case of emergency or in case the filters run out of stock.

RV11

Ref. 18753

Change the filter for each new patient!

By replacing the filter after each patient you take part in the fight against nosocomial infections.

RV12

Tube of 10 single-use antibacterial plastic filters.
 Ref. 11813

WHY AN ANTIBACTERIAL FILTER?

Suction may generate airborne contamination which could contaminate the devices, the connecting probes, the wall outlets, the pipeline networks and the vacuum pumps. In addition, when out of use, bacteria may – without any filter – freely circulate into the patient circuit.

Filter = Cleanness of the circuits and fight against nosocomial infections.

TM COLLECTION JARS

The collection jars are used to collect liquids or mucus resulting from medical suction. They can be used in conjunction with any suction device.

Main technical features:

Active medical device of class I.

In compliance with the EN ISO 10079-3: 2009 standard.

- Collection jars made of polysulfone, unbreakable and autoclavable up to 134°C.
Our collection jars are also available in polycarbonate on demand only. In this case they are autoclavable up to 121°C only.
- Covers fitted with an anti-overflow safety device.
- Covers fitted with inlet nipples marked PATIENT/VACUUM for easy-use.

Many versions available:

- Available in:
 - 1 L long with screw-fit plastic lid
 - 1 L short with pressure-fit lid with silicone ring
 - 2 L with screw-fit metal lid
 - with pressure-fit plastic lid
 - with pressure-fit lid with silicone ring
 - 4 L with pressure-fit plastic lid
- For 1 L short and 2 L jars: an integrated moulded hanger enables to hang the jar directly onto the rail clamp or onto the wall bracket without using a basket.

- Weight and dimensions:

Collection jars	Height	Diameter	Weight
1L long with screw-fit plastic lid	250 mm	110 mm	450 g
1L short with pressure-fit lid with silicone ring	170 mm	130 mm	520 g
2L with pressure-fit plastic lid	310 mm	130 mm	600 g
2L with pressure-fit lid with silicone ring	310 mm	130 mm	650 g
2L with screw-fit metal lid	310 mm	130 mm	700 g
4L with pressure-fit plastic lid	340 mm	170 mm	1150 g

Use and cleaning:

Disassemble all the parts of the jar and the cover.
Lay the parts under a decontaminating or pre-disinfecting solution.
Clean, rinse thoroughly, lay under clear water during 1 min. and dry.
Sterilize or disinfect.
Reassemble all the parts together.

Caution!

Repeated cleanings in washing-machine alter the rigidity of the jars.

The compatibility of decontaminating products with polysulfone and polycarbonate must be checked carefully, sterilizing times must be scrupulously respected and a perfect drying is essential to maintain the quality of the jars.

B01

1L long collection jar, polysulfone, with screw-fit plastic lid.
Ref. 15021

B02

1L short collection jar, polysulfone, with moulded hanger and pressure-fit lid with silicone ring.

SINGLE-USE™ SUCTION LINERS

Main technical features:

Active medical device of class I.

In compliance with the EN ISO 10079-3: 2009 standard.

- Single-use product.
- Cone-shaped for an easy-positioning inside the jar.
- Covers fitted with a safety valve to stop the suction as soon as the liner is full.
- 2 available systems:
 - Mechanical safety valve
 - Safety valve with a hydrophobic and self-sealing filter. This filter is automatically obstructed as soon as the liquid contacts it thus ensuring an immediate closing of the valve.
- Ecological: PVC free.
- Perfect asepsis and total protection of the nursing staff during manipulations. The TM suction liners can be safely taken out of care area after use.

- Packaging: individually packed in a thermo-sealed plastic bag. Carton of 50 suction liners.
Minimum order = 50 suction liners.

Many versions available:

- Useful capacities: 0.8 L and 1.4 L
- Can be fitted in our 1L and 2L collection jars, re-usable but non-autoclavable CRISTAL plastic with integrated moulded hanger.
- Weight and dimensions:

Suction liners	Height	Diameter	Weight
0.8 L	130 mm	130 mm	106 g
1.4 L	252 mm	130 mm	116 g

B07

1.4 L single-use TM suction liner with mechanical safety valve.
Ref. 15040

B08

0.8 L single-use TM suction liner with mechanical safety valve.
Ref. 15038

B09

1.4 L single-use TM suction liner with hydrophobic and self-sealing filter.
Ref. 15044

B10

0.8 L single-use TM suction liner with hydrophobic and self-sealing filter.
Ref. 15050

B11

CRISTAL plastic collection jar for 1.4 L TM suction liner, with moulded hanger, re-usable but non autoclavable.
Ref. 11671

B12

CRISTAL plastic collection jar for 0.8 L TM suction liner, with moulded hanger, re-usable but non autoclavable.
Ref. 11640

B13

Metal basket for wall or rail mounting

- ⓐ Ref. 10315 : for 4 L jar.
- ⓑ Ref. 10317 : for 2 L jar.
- ⓒ Ref. 10311 : for 1 L long jar.

B14

TM universal rail clamp in polycarbonate

Resistant to shocks and in compliance with the NF EN ISO 19054: 2006 European standard (30 mm spread).

The TM universal rail clamp in polycarbonate is used to hang any TECHNOLOGIE MEDICALE device onto a rail system. All devices in compliance with the NF EN 128 European standard (30 mm width) can also be used with the TM universal rail clamp provided the small blue adaptor located in the bottom part of the clamp is taken out by sliding it upwards.

Ref. 11949

B15

- ⓐ **Metal rail clamp**, rilsan-coated aluminium, with support bracket, for rail mounting.
Ref. 15657

- ⓑ **Wall bracket**, aluminium, for wall mounting.
Ref. 10313

B16

Floor stands for collection jars

- ⓐ Ref. 10321 : for 4 L jar.
- ⓑ Ref. 10319 : for 2 L jar.

B17

Kit for 2x 2 L jars

Can be put on the floor or can be fixed into the wall or onto a rail.

Ref. 10326

VACUUM-STOP AND CONTROL VALVES

System used in the context of medical suction to stop manually the suction of liquids. To be connected to a catheter on one end and to a silicone suction hose on the other end (the suction hose itself being connected to a collection jar).

B18

Vacuum-stop

To get suction just put your thumb on the central hole.

- Single-use device
- Model with a membrane
- Available for both adults and children
- Fixed integrated clamp
- 100% controlled
- Reliable
- Ergonomic
- Noiseless
- Delivered non sterile*

Minimum order: 50 pieces

Vacuum-stop with membrane and integrated clamp

a Ref. 16612: adult

b Ref. 16615: paediatric

B19

Vacuum-control (patented)

To get suction just push on the button with your thumb.

- Single-use device
 - Piston-type model
 - Progressive system to better control the suction
 - Available for both adults and children
 - With or without swiveling clamp
 - 100% controlled
 - Reliable
 - Ergonomic
 - Noiseless
 - Delivered non sterile*
- Minimum order: 50 pieces

Vacuum-control with swiveling clamp

c Ref. 16621 : adult

d Ref. 16622 : paediatric

* Sterilization upon request and for big quantities only.

B20

Single-use suction tip for drainage

Minimum order: 50 pieces.

Ref. 16607

B21

Silicone suction hose, autoclavable

Packaging: Roll of 25 meters

Minimum order: 25 meters

Ref. 16916: 7x13 mm for 1 L and 2 L collection jars.

Ref. 16917: 8x14 mm for 4 L collection jars.

Détendeurs et produits pour l'oxygénothérapie et l'aspiration

Pressure regulators and products for oxygen therapy and suction

Voir détails sur addendum / See attachment for additional information

GMED atteste qu'à l'examen des résultats figurant dans le rapport référencé P181091-1, le système d'assurance qualité - pour la conception, la production et le contrôle final - des dispositifs médicaux énumérés ci-dessus est conforme aux exigences de l'annexe II excluant le point 4 de la Directive 93/42/CEE.

GMED certifies that, on the basis of the results contained in the file referenced P181091-1, the quality system - for design, manufacturing, and final inspection - of medical devices listed here above complies with the requirements of the Directive 93/42/EEC, annex II excluding section 4

La validité du présent certificat est soumise à une vérification périodique ou imprévue

The validity of the certificate is subject to periodic or unexpected verification

Début de validité / Effective date : February 11th, 2019 (Included)

Valable jusqu'au / Expiry date : March 11th, 2022 (Included)
