## TECHNICAL DATA SHEET

**PRODUCT:** Sterile standard surgical set

### Description of Product:

| Sterile standard surgical set |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |              |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| 1                             | 1. Mayo drape for instrument table 145x80cm (+/-10cm) – 1 pc., Waterproof, absorbent, absorbent area minimum 65x85cm (+/-5cm). Pictogram for guidance.                                                                                                                                                                                                                                                                                                                                                                                                 | 145x80 cm 1  |
| 2                             | 2. Sterile sheet with adhesive border and absorbent field 240x150cm (+/-10cm) – 1 pc., Non-woven material minimum 3 well-defined layers, not less than 42 g/m <sup>2</sup> , poly-layered, waterproof, absorbent field area minimum 60x40cm, with medium absorption level. With "Tube Holders" (holes for fixing tubes and wires). Adhesive area applied directly to the edge of the field, impregnated in the fabric, without creases, 100% adhesion capacity. Double-sided glue will not be allowed. latex-free, rosin-free. Pictogram for guidance. | 240x150 cm 1 |
| 3                             | 3. Sheet with adhesive border and absorbent field 175x175cm (+/-10cm) – 1 pc., Non-woven material at least 3 well-defined layers, Poly-layered, waterproof, absorbent field area at least 60x40cm, with medium absorption level. Adhesive area applied directly to the edge of the field, impregnated in the fabric, without creases, 100% adhesion capacity. Double-sided glue will not be allowed. latex-free, rosin-free. Pictogram for guidance.                                                                                                   | 175x175 cm 1 |
| 4                             | 4. Sheet with adhesive border and absorbent field 90x75cm (+/-5cm) – 2 pcs., Non-woven material at least 3 well-defined layers, Poly-layered, waterproof, absorbent field area at least 90x40cm (+/-5cm), with medium absorption level. Adhesive area applied directly to the edge of the field, impregnated in the fabric, without creases, 100% adhesion capacity. Double-sided glue will not be allowed. latex-free, rosin-free.                                                                                                                    | 90x75 cm 2   |
| 5                             | 5. Sterile absorbent cellulose wipes 20x25cm – 4 pcs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 20x25 cm 4   |
| 6                             | 6. Surgical tape minimum 20x25cm (±5cm) – 1 pc. waterproof, absorbent, with glue on the entire surface, free of rosin. For firm fixation of tubes and instruments during surgery.                                                                                                                                                                                                                                                                                                                                                                      | 20x25 cm 1   |

**Raw Materials:** Triflex / PE + NW / Cellulose

**Product Colour:** Medical Blue

**Reference Code:** SP-02003-92

**Weight in Grams:** 72 gsm Triflex / 28 gsm(SS)+65 mic.(PE) / 60 gsm (Cellulose)

**Package:** Flat Pouch

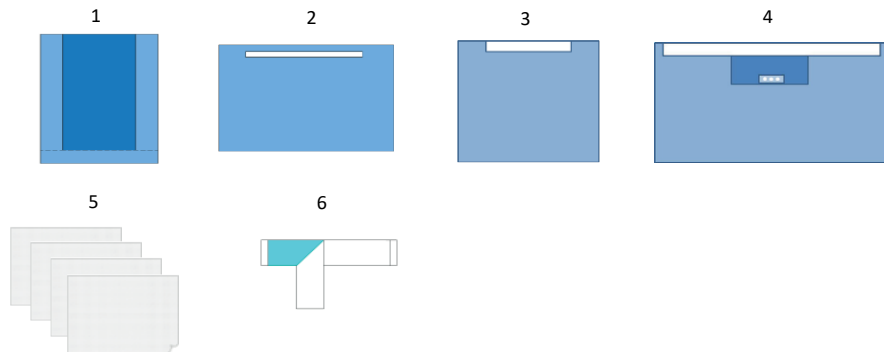

Product: Medical Device Directive MDR 2017/745 ECC ANNEX XI A ALL VERSIONS. / Products and materials used do not contain metal.  
Product Shelf Life - 5 Years

### Product Materials

#### Unit / Size

|   |           |            |
|---|-----------|------------|
| 1 | NW+PE     | 145x80 cm  |
| 1 | Triflex   | 240x150 cm |
| 1 | Triflex   | 175x175 cm |
| 2 | Triflex   | 90x75 cm   |
| 4 | Cellulose | 20x25 cm   |
| 1 | ***       | 20x25 cm   |
|   |           |            |

### PROPERTIES

**Tolerances:** +/- 2% cm

**Measurement:** cm

### Package Information

The products in the sterilization bag are double-packaged to reduce all risks during transportation. Double packaged products are put into Baymed's standard sized carton; dimensions are as follows:  
Height = 44 cm; Length = 40 cm ve Width = 60 cm.

**Preparation Date**

**QUALITY CONTROL APPROVAL**
