

PDMS

GLASS SYRINGE

INTRAOCULAR SILICON OIL

PDMS GLASS SYRINGE

Polydimethylsiloxane (PDMS) is a highly viscous oily liquid whose high purity and transparency allows long-term temporary replacement of the vitreous body.

PRODUCT ASSORTMENT

The **Micromed PDMS Glass Syringe** device consists of a glass syringe pre-filled with 10cc of silicone oil (**1000, 1300, 2000 and 5000 cSt**), the kit is completed by the presence of a luer lock adapter and a 23g cannula.

CODE	DESCRIPTION	NAME
MMD-665 / MMD-665A	10 cc glass syringe preloaded with pdms 1000cst luer lock adapter cannula 23g	PDMS 1000 Glass Syringe
