

## OPTIX PS- Power Supply

**APPLICATIONS:**  
Border control & observation

OPTIX Power supply unit is designed and built to power Optix Multisensor systems .

Input power	230Vac 50Hz connector standard
Input communication	Serial and Ethernet RJ-45 conector
Operating temperature range	From -32°C to +55°C outdoor conditions
Operating voltage	18 to 32 Vdc - Multisensor compatible
Protection	High and low voltage braking device
Environmental	sun shield and dual shielding
