## OptiFlo 72 h safeclean, 56 cm

The closed endotracheal suction system enables hygienic and safe suctioning for both patients as well as medical staff.

Our technology enables suctioning without interrupting ventilation, which reduces the loss of positive end-expiratory pressure (PEEP) due to unnecessary disconnection.

The OptiFlo is distinguished by the following features:

- Integrated irrigation port with lockable irrigation chamber for reliable catheter cleaning
- Metered dose inhaler adapter simplifies the application of metered dose aerosols
- Secretion window, for the visual monitoring of secretions
- Super-soft cover, better handling of the suction catheter
- Atraumatic catheter tip, reduces mucosal lesions
- Suction control valve with closure option, improved patient safety

<b>Duration of time:</b>	72 h
<b>Application area:</b>	Adult
<b>Total length:</b>	56 cm
<b>Sterile:</b>	Yes

**Country availability:**

Please note: Not all products are available in all countries. Feel free to contact our international sales team about any questions relating to our sales and services.
