

**MANUFACTURER'S AUTHORIZATION FOR OFFERING
IMPLEMENTATION AND MAINTENANCE**

TO:

Whom it may concern

WHEREAS:

Vaxtor Technologies S.L.

Calle Miguel Yuste 6, 1A

28037 Madrid

Spain

Vaxtor is a Spanish company specialized in high-performance software for video analytics and automatic license plate recognition (ALPR). Our portfolio includes advanced software-only solutions for OCR, container code recognition, vehicle make/model/color analytics, and edge/cloud deployments. Vaxtor develops and supplies software exclusively, with no involvement in hardware manufacturing or sales.

HEREBY:

Vaxtor authorizes **Melitax-Grup SRL**, located at Str. Vasile Alecsandri nr. 143, Chişinău, Republic of Moldova, to offer, implement, and maintain Vaxtor software products in the context of public or private tenders and projects.

Melitax-Grup SRL is certified and fully authorized to deploy, integrate, and support Vaxtor's software across all stages of the solution lifecycle, including after-sales and post-deployment services.

Vaxtor software is platform-independent and integrates seamlessly with third-party hardware. Our solutions can be installed on edge devices, local servers, or cloud infrastructures, ensuring flexibility across a wide range of environments. Vaxtor products also support native integration with leading video management systems such as **Genetec Security Center**, enabling real-time data exchange and enhanced situational awareness within centralized security platforms.

All usage of Vaxtor software is governed by our **End-User License Agreement (EULA)**, which outlines the licensing conditions, permitted use, and support terms.
