

OPTIMISE YOUR EFFORTS

ED-5GT Duodenoscope

The ED-5GT Duodenoscope is engineered with thoughtful design. Not only upholding the clinical requirements, it also elevates the collective efforts of the entire medical team, from physicians to nurses, harmonising patient treatment with paramount safety standards.

Support therapeutic efficiency

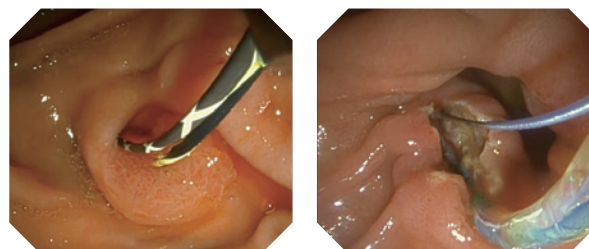

A large 4.2-mm channel allows the passage of most accessories and devices.

The dual locking mechanism, incorporated with the forceps elevator, reduces the risk of losing access and facilitates an easy exchange of accessories.

15° backward viewing angle, combined with a wide visual field, boosts a desired endoscopic visualisation.

With high-definition imagery and available VIST* technology, the enhanced mucosal patterns may help in identifying the papilla.

* VIST: Versatile Intelligent Staining Technology

Promote effective reprocessing

The removable distal cap provides access to the forceps elevator, ensuring stringent and thorough cleaning.

ED-5GT Duodenoscope

	ED-5GT
Field of view	100°
Direction of view	Backward side viewing 15°
Depth of view	4-60 mm
Distal-end diameter	13.5 mm
Insertion tube diameter	11.3 mm
Instrument channel diameter	4.2 mm
Angulation	Up / Down 120° / 90°, Left / Right 90° / 110°
Working length	1250 mm
Compatibility	HD-500 series, HD-550 series, HD-650Exp series, X-2600 series
