Declaration

The certification body of TÜV Management Service GmbH and the TÜV Product Service GmbH confirm that we,

**AESULAP AG
AM AESULAP-PLATZ
78532 TUTTLINGEN / GERMANY**

have established and are maintaining a quality management system according to

ISO 9001:2008
(Certificate Registration No.: 12 100 21724 TMS)
EN ISO 13485:2012 / AC:2012
(Certificate No.: Q1N 14 05 10066 365)

for the following area

**Development, Production and Distribution of Implants, Instruments, Containers,
Devices, Suture Material, Tissue Adhesives and Procedure Kits.**

Furthermore we have implemented the conformity assessment procedure as per annex II, clause 3 of the Medical Device Directive 93/42/EEC of June 14th, 1993 for medical products. (EC certificate No.: G1 14 05 10066 366)

By labeling the products

**Aesculap Product Groups
as per attached list**

with the CE mark

we, **AESULAP AG** confirm,
that we follow the essential requirements
according to MDD 93/42/EEC Annex I.

TUTTLINGEN, 2014-11-26

Quality Inspection Certificate

Cert.-No.: 1- 010212

Aesculap AG certifies, that
our products and raw materials

Instrument-type	Steel-type	Hardness-HRC
Retractors	X20Cr13	40-48
Scissors	X50CrMoV15; X38CrMoV15	50-58
Chisel, Gouges, Curettes	X46Cr13; X20Cr13	50-58; 40-48
(Bone) Rongeur	X46Cr13	50-58
Dissecting Forceps	X15Cr13; X20Cr13	40-48
Forceps with shaft handle	X15Cr13; X20Cr13	40-48
Forceps with ring handle	X20Cr13	40-48

are designed, manufactured and tested according defined and documented specifications and procedures.

The following national and international standards and requirements were met:

- EN ISO 13485:2003 (AC 2009)
- Council Directive 93/42 EEC of 14. June 1993 concerning Medical Devices
- ISO 7153-1 (Surgical Instruments-Metallic materials; Part 1: Stainless steel)
- Others: The defined requirements and performed tests cover also corrosion analysis, cutting ability, elasticity and mechanical resistance were applicable.
 Technical / physical test according to the quality specification – passes test
 Chemical test according to the quality specification – passes test

German DIN Standard DIN 58953-8
Logistics of sterile medical devices

The requested information regarding the storage time of sterile containers is part of the DIN 58953 part 8- Logistics of sterile medical devices. Unfortunately this German standard is not available in English language.

The European standard for packaging materials EN 868 and the ISO standard for sterile packaging materials do not include any information regarding the storage time of packaging materials.

The above mentioned DIN standard 58953-8 gives the following recommendations with regards to the storage time of containers:

It is pointed out that the loss of sterility is more event related than time related. The storage time is not such an important factor, more important are different influences during storage, transport and handling of sterile goods. Therefore the storage time cannot be fixed in a general matter. The DIN standard gives only recommendations for storage time of containers. The final decision has to be made by the hygienic commission of the respective hospital considering the detailed storage conditions in this hospital. The recommendation for the storage time for sterile containers is generally 6 months, no matter if the container is single packed or double packed or stored in open or closed shelves.

The following notes are made in DIN58953-8:

1. The recommendation of storage time of 6 months for container is only a recommendation which would diminish the risk of contamination during transport and opening of the container. Longer storage time would increase the risk of contamination on the surface of the container depending on the storage conditions. However this would not necessarily lead to a recontamination of the packed instruments during storage time.

Tabelle 1 – Empfohlene Lagerdauer für sterile Medizinprodukte

Art der Verpackung	Lagerung ungeschützt ³	Lagerung geschützt (nach 7.1.2)
Sterilbarrieresystem	Dient zur Bereitstellung zum alsbaldigen Gebrauch ⁶ Ist als Lagerungsart zu vermeiden	6 Monate jedoch nicht länger als das Verfallsdatum
Verpackungssystem (Kombination aus Sterilbarrieresystem und Schutzverpackung)	5 Jahre sofern keine andere Verfallsfrist vom Hersteller festgelegt ist	
ANMERKUNG siehe auch [4] und [5]		
³ In Regalen in Räumen, die nicht der Raumklasse II nach DIN 19464:2008-12 entsprechen.		
⁶ Unter alsbaldigem Gebrauch wird die Anwendung bzw. der Gebrauch des Produktes innerhalb von maximal 2 Tagen / 48 h verstanden
