

Datasheet bSWM

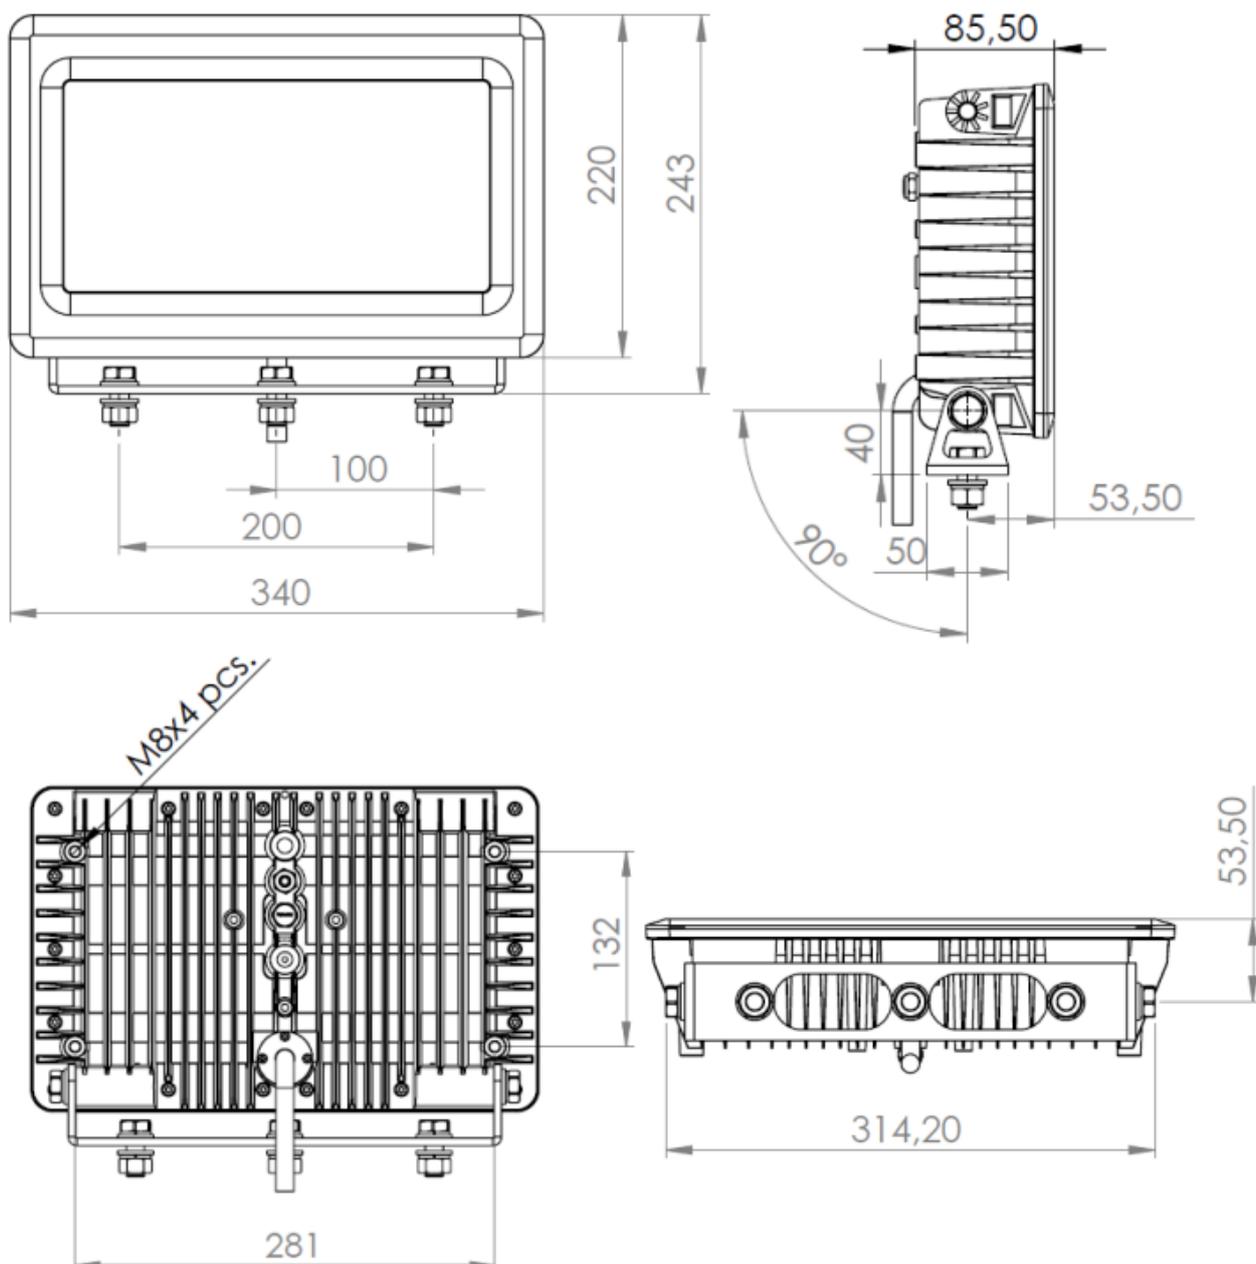

The lamps are widely applied in heavyweight trucks, off-road cars, agricultural and construction machines or fire-fighting vehicles. The use of new-generation LEDs by CREE® guarantees very high light output efficiency values, up to 25000 lm for the 210 W lamp. The aluminum fixtures (body + front) guarantee adequate LED cooling which, combined with an equally durable tempered glass cover, guarantees extraordinary resistance to mechanic damages, impacts or humidity, and establishes a new standard on the market of lamps intended to work in the most demanding environments. The innovative appearance and diverse installation methods give the lamp a significant competitive advantage on the market.
