

# CEREBASE™ DA Guide Sheath

Go Distal... More Trackability for More Support<sup>1,2,i</sup>

The Cerebase DA Guide Sheath is indicated for the introduction of interventional devices into the neurovasculature. It is designed for atraumatic vessel interaction with soft, compliant and rounded distal edges, and a highly flexible Dexterous (DEX) tip that can minimize direct vessel wall contact.<sup>1,ii</sup>

Instructions for Use

## Features & Benefits

**Dexterous (DEX) Tip.** DEX Tip facilitates tight turns for enhanced tracking through challenging anatomy, gets closer to the target site.<sup>1,2,3,iii,iv</sup>

**Engineered to secure distal access for geometric anchoring, resulting in more procedural support.**<sup>1,2,4,v</sup>

**Designed for atraumatic vessel interaction with soft, compliant, and rounded distal edges and a highly flexible Dexterous (DEX) tip that can minimize direct vessel wall contact.**<sup>2,ii</sup>

**Large inner diameter ID (.090").**<sup>2,5</sup>

**More proximal shaft stiffness designed for arch support.**<sup>2,vi</sup>

**Excellent<sup>vii</sup> kink resistance in a thin wall design.**<sup>2</sup>

**Smooth dilator to catheter tip transition (minimal gap).**<sup>2</sup>

**8F short sheath compatible.**<sup>2</sup>
