About Svas Biosana

SVAS BIOSANA S.p.A.

was founded in 1972 as a trading company specializing in the medical devices distribution. Thanks to the commitments of its Management, the company grew steadily and soon became an important point of reference in Italy and abroad for the healthcare industry. Over time, the company develops an “ industrial “ project, acquiring the technical skills required to manufacture products under its own brand. This project has materialized with the creation of industrial divisions engaged in different lines of products. In 2002, Svas Biosana started a “ Research & Development “ Chemical –Microbiological Laboratory,

in which an efficient team of professionals carries out activities of studying, characterization and testing of new materials and products.

Svas Biosana S.p.A., boasts today, an established Quality Management System according with ISO 9001 and 13485, and a multi-divisional structure, designed to enhance the level of specialization of the individual areas:

· [Svas Division](#)

· [Farmex Division](#)

· [Medical Division](#)

About Farmex Division

Svas Biosana, thanks to FARMEX DIVISION, has offered a concrete, practical and effective response to the incontinence problem from over 30 years.

Adult incontinence line provides a wide range of reliable and functional devices able to meet the patients needs with specific solutions to every incontinence level.

Farmex Division has always invested his energies into the acquisition of partners who provide the highest reliability, by purchasing raw materials of excellent quality and implementing its technological structure with advanced equipments.

Quality and Certificates

Svas Biosana Quality systems are an integral part of our business practices. Svas Biosana Farmex Division is committed to comply with the requirements of UNI EN ISO 9001:2008, UNI EN ISO 13485:2004 also committed to continually improve the effectiveness of our quality systems. Our medical devices are in conformity with the requirements of the directive 93/42/CEE and are periodically tested by accredited laboratories.

Thanks to a quality systems carried out through the adoption and the continual improvement of a suitable organization structure, Svas Biosana wants to achieve following objectives:

- To enhance customer satisfaction by consistently providing a quality of service that meets or exceeds customer expectations.
- To ensure the continued development, implementation and maintenance of the quality system and to continually seek improvements in the effectiveness of the quality system.
- To improve effectiveness and efficiency in our business processes.

Svas Biosana recognizes that future is critically dependent on our customers satisfaction and to that end it is our policy to establish mutually beneficial relationships with customers, suppliers and other stakeholders to enhance our ability to create value.

Product Identification Guide

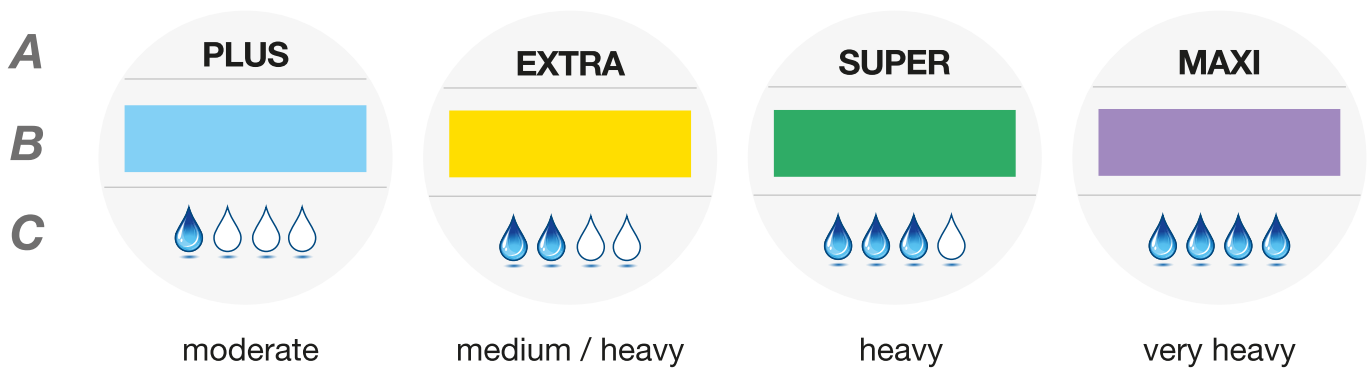

Farmex Incontinence Devices

(Degrees of incontinence)

Absorbency level

Farmex proposes 4 different absorbency levels, identified by:
Name (A), Color Code (B), Drops number (C).

Sample pack

Features and benefits of Farmex incontinence products

The importance of taking care of the patients and the importance of providing a product able to meet concrete needs of the patients have promoted the development and the realization of our adult diaper with printed PE film for underline absorbency level identification. In fact the new identification system of the product according to absorbency level is easy to use for both patients and care staff.

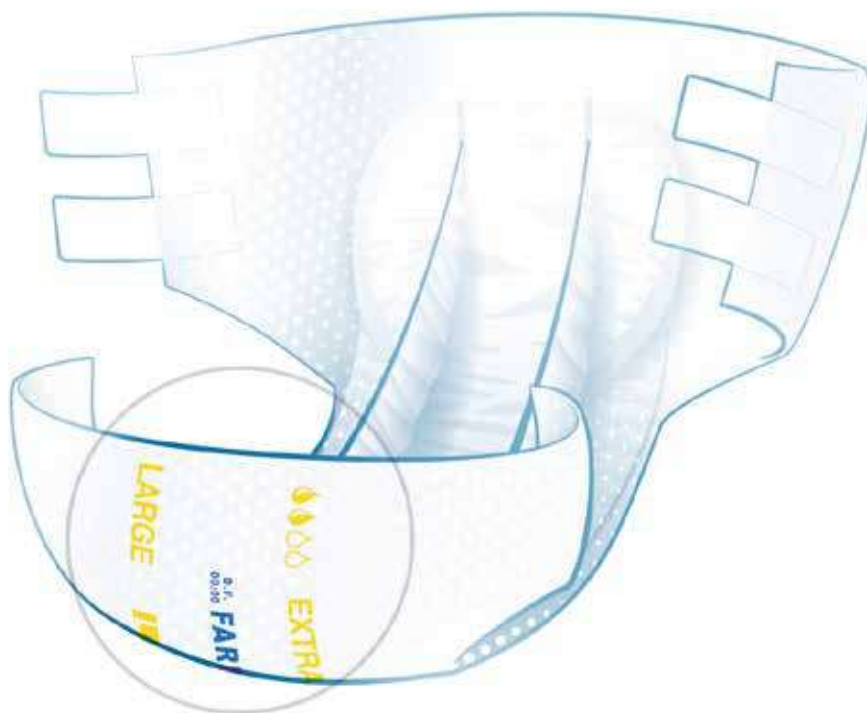

Our four different absorbency levels are identifiable by the color code and drops number printed.

Printing on the adult diaper device offers further informations:

Color Code printing: Absorbency Level

Drawing Printing: Device Size / Drops according absorbency level

Wetness indicator: Lot number and manufacture date discoloring enables the patient or care staff to establish how much of a device's total capacity has been used.

Our adult incontinence devices are:

- Hypoallergenic
- Clinically Tested
- Latex Free
- Odor control:

Reduces the risk of unpleasant odours.

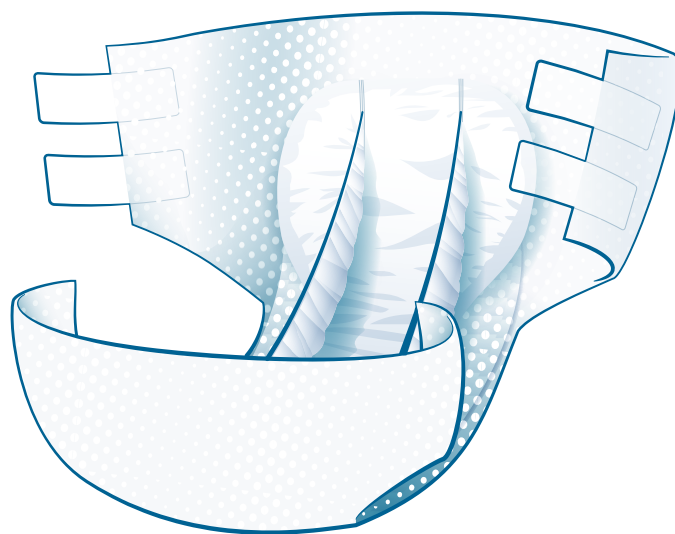

HYPOALLERGENIC

Farmex® Adult Diaper

This device is suitable for protection and care of people with moderate to heavy incontinence. It is anatomically shaped with barrier to the liquids. Through the fastening of four refastenable tapes and the presence of longitudinal elastics, when the patient wears it, this device takes the shape of panties. The external side is made of soft, non-toxic and waterproof polyethylene with a wetness indicator for easy product identification. The absorbent core is composed of pure fluff pulp and SAP superabsorbent polymers. It is also coated with a special filter fabric that accelerates the spread of liquids and helps their retention. A layer of hypoallergenic non-woven fabric cover the whole inner surface.

(Suitable both for bedridden and not self-reliant people.)

Farmex® Shaped Diaper

This device is suitable for protection and care of people with light and moderate incontinence problems. Its anatomical shape, with barrier to the liquids, offers exceptional wearability and practical use together with separate fastening system. The external side is made of soft, non-toxic and waterproof polyethylene with a wetness indicator for easy product identification. The absorbent core is composed of pure fluff pulp and SAP superabsorbent polymers. It is also coated with a special filter fabric that accelerates the spread of liquids and helps retention. A layer of hypoallergenic non woven fabric covers the whole inner surface.

(Suitable both for bedridden and walking people.)

Farmex® Rectangular Pad

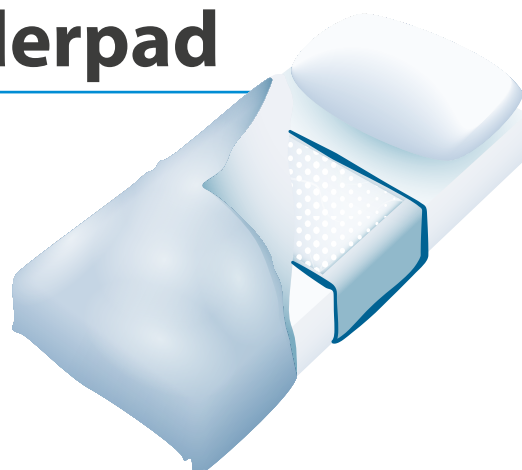

This device is suitable for protection and care of people with moderate incontinence problems, its shape is rectangular with or without barrier to the liquids. Through the use of plastic or elastic panties, this device ensures optimum practical use. The external support is made of soft, non-toxic and waterproof polyethylene. The absorption area is composed of pure fluff pulp, evenly distributed and firmly combined onto the inner layer in order to make everything compact. The hypoallergenic non-woven inner layer covers the whole surface. Its structure allows an efficient retention of the liquids.

(Suitable for bedridden and walking people.)

Farmex® Absorbent Underpad

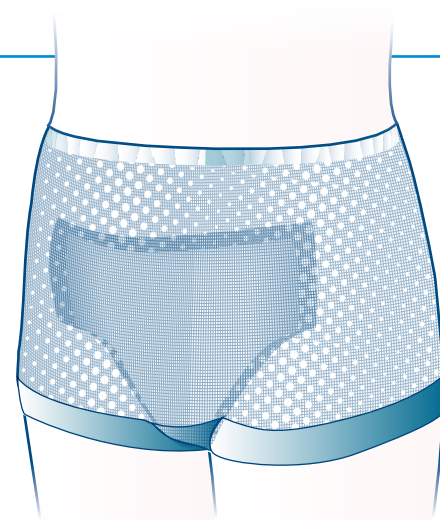

The device is manufactured for all the cases of urinary and fecal incontinence for bedridden patients. It is not wearable, this device may be positioned between the patient and the bed surface in order to ensure the health of people. The external side is made of soft, non-toxic and waterproof polyethylene. The absorption area is composed of pure fluff pulp, evenly and firmly distributed onto the roof to make everything compact. The hypoallergenic non-woven inner layer covers the entire surface. Its structure helps an efficient retention of the liquids.

Farmex® Lady

Farmex Lady is designed to provide a high absorption capacity and to offer a safe solution to the light incontinence problems. Its soft and filtering multilayer body distributes the liquids evenly onto the whole surface and keeps the skin dry all the time. Farmex Lady diapers are made of fluff pulp and superabsorbent polymers with “OdorFree” the innovative system; the fastening is guaranteed by longitudinal adhesive on the external layer. Furthermore Normal, Extra and Super sizes are wrapped one by one in practical sachets hygienically protected.

(Suitable for people with incontinence problems from mild to moderate grade.)

Breathable with derma-protection NEW LINE PRODUCTS

The breathable **FARMEX AIR DERMO** products are the result of constant research and development aimed to meet the new requirements of patients with incontinence problems. The new breathable external layer is the most innovative and suitable solution for patients with particularly delicate and sensitive skin who need a softer and dry touch.

These new aids provide air circulation, by preventing the onset of skin complications. Moreover, the new products provide a more comfortable wearability thanks to their softness and absence of any noise.

The special emollient lotion applied on the inner surface in contact with skin gives lenitive properties for sensitive skin.

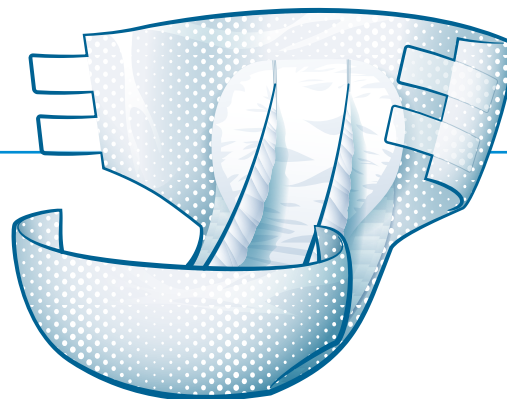

Combination between breathable backsheet and the emollient lotion guarantees to AIR DERMO products an efficient derma-protection system to avoid skin irritation.

Adult Diaper

New **AIR DERMO Adult Diaper** is the most innovation and suitable solution for delicate and very sensitive skin. The special emollient lotion applied on the inner surface in contact with skin gives lenitive properties for sensitive skin. Combination between breathable backsheet and the emollient lotion guarantees to AIR DERMO products an efficient derma-protection system to avoid skin irritation.

(Suitable both for bedridden and not self-reliant people.)

Wash Gloves

Made of soft synthetic fabric polyester, you can find on the surface a series of thin parallel strips of dry soap with ph neutral, produced according to an industrial processing. Easy to use disposable, it does not irritate the patient's skin but prevents infections that can be caused by usual disposable wash gloves. When just lightly moistened, disposable wash glove activates the detergent soap dry creating a soft and effective foam.

After body washing is possible to remove the excess foam using a multi-purpose fluff wipes.
