2.3.1. Main report

The worst case tyre criteria for the burst resistance test was chosen according to the dimensionally biggest tyre with the highest inflation pressure.

There is only one variant/version tyre size produced so the 15.5-38 TDW KNK 50 141 A6 12PR tyre was tested with max. 10 bar test pressure acc. to Annex 8 of ECE R106.

Also, the measurements were taken and markings were checked acc. to Annex 6 of ECE R106.

3. Statement of compliance

The inspections items and measurements carried out have shown the compliance of the type described in this technical report and the attached Annexes with the requirements of the standard as stated on page 1.
