

Energy for healthcare

Medical batteries since 1985

For over 30 years, VLAD is specialized in the distribution of batteries for the health sector.

Our catalog contains over **2500 battery models** (defibrillators, monitors, respirators, ECG, syringes shoots, patient lifts, infusion pumps, scalytics...).

Because health of patients can not wait, our stock and logistics allows us to **ship orders the same day** in 90% of cases.

The strictness of our quality process and control is further validated by the **ISO 9001, ISO 14001 and ISO 13485** (medical devices).

OUR TRADES

2

Distribution of medical batteries

Our agreements with medical device manufacturers enable us to offer a large number of **original batteries** (Mindray, Physio Control, Philips, Zoll, Schiller, Stryker, GE HealthCare ...) at the best prices.

Generic batteries assembly

Building on 30 years of experience in battery assembly of all technologies (Lithium-ion, Ni-Cd, Ni-Mh) and our ISO 13485 certification, we offer **quality alternatives** to original batteries at a lower price.

Battery design

VLAD is designer of small and medium **battery series for industry**, for sectors as diverse as healthcare, mobility, solar equipment, communications, metrology ...

Battery refurbishing

Economic and ecological alternative to buying a new replacement battery, refurbishing consists of reusing the box and connectors of your battery and replacing the akkus with new high quality ones.

Exalium, the new brand by VLAD

Thanks to our technical knowledge and product expertise, we offer our customers our own range of batteries under the EXALIUM brand:

A lower price than the leading manufacturers, insuring you the best quality / price ratio

The Assurance of equal or superior quality to branded products, with the selection of the best batteries and akkus on the market

100% made in France assembly in our ISO 9001 and 13485 factory of Parçay-Meslay (37)

Strong environmental commitment (consumption, recycling) validated by the ISO 14001 certification.

exalium
Battery packs

exalium
Alkaline batteries

The **Exalium** brand is the guarantee for a **top quality product** at the very **best price**.

OUR COMMITMENTS

The best choice

We are both distributors of major brands (**Mindray, Physio Control, Philips, Zoll, Schiller, Stryker, GE HealthCare ...**) and manufacturers of high quality batteries to offer you the product best suited to your needs.

ISO certified quality

VLAD has achieved three ISO certifications for its quality management systems: **ISO 9001, ISO 13485** (medical devices) and **ISO 14001**.

A strong commitment to the environment

Recycling of used batteries, respect for the environment, control of energy consumption are the core of our environmental approach since 1985.

Advanced logistics

With our extensive stock and efficient logistics, orders received before 16 can be **shipped the same day**.
