

External defibrillator, manual (basic features) S5

Cod 130420

Description External defibrillator, manual for use by specialized personnel with basic features

Parameter Specification

Defibrillator Selection of adult energy 50-360 biphasic; yes

2-20 pediatric / newborn. yes

Paddle control Loading yes

energy discharge yes

Biphasic output waveform yes

Synchronizer yes

Display Display of bipolar leads I, II, III yes

Capturing the ECG signal via paddles yes

Heart rate display yes

Heart rate alarms yes

Working frequency 0.67-40 Hz yes

Heart rate diversion indicator yes

ECG mode Capture the ECG signal by wire with 3 electrodes yes

Range 30 - 300 BPM yes

Defibrillation shock protection ≥ 360 J yes

Alarm messages yes

ECG printer Paper speed 6.25, 12.5, 25, 50 mm / sec

Built-in thermal printer yes

Auto or manual printing yes

Annotations time yes

date is yes

derivation yes

heart rate yes

mode of operation yes

the shape of the downloaded wave yes

The summary function yes

Memory Internal memory or Memory card installation Yes

Stored information ECG, shock, surrounding voices yes

Storage capacity ≥ 2 hours yes

Power supply 220 V, 50 Hz yes

Internal rechargeable battery yes

Battery life 3 hours Continuous ECG or min. 100 discharges at maximum power yes

Weight with accessories <9 kg yes

Accessory

Adult paddles, reusable 1 set. yes

Pediatric, reusable (paddles or adapters pediatrician) 1 set. yes

Reusable 3-wire ECG cable 1 pc. yes

Disposable adult ECG electrodes with a shelf life of 2 years at the time of delivery 50 pcs. yes

Pediatric, single use, with a shelf life of 2 years at the time of delivery 50 pcs. yes

Thermal paper 5 pcs. yes

Counting gel 250 ml yes
