## POTATO PEELERS

### A3 TRANSPORTATION

---

\*This appliance can not be moved by hand from area to area. It must be moved on pallet with forklift truck.

### A4 UNPACKING

---

\*Please unpack the package according to the security codes and ordinances of current country and get rid from the pack. Parts which contacts with food are produced by stainless steel. All plastic parts are marked by material's symbol.

\*Please check that all the parts of appliance had come completely and if they are damaged or not during the shipping.

### B INSTALLATION

---

\*Please place the product to straight and sturdy ground, please take necessary steps against possibility of overturn.

\*Technician who will serve for installation and service for the appliance must be professional on this subject and must have installation and service licenses by the company.

\*Connection to Electric Power Supply must be done by authorized person.

\*Please be sure that the voltage connected to appliance must be equal with the voltage which is on appliance's label.

 This appliance must be connected to an earthed outlet in accordance with safety rules and standards.

\*Appliance's earthing must be connected to earthing line on panel which is nearest to electric installation.

\*Connection to the main fuse and leak current fuse must be done in accordance with the current regulations.

**C SAFETY INSTRUCTIONS**

---

-  \*Do not use the appliance in insufficient lighted place.
-  \*Do not touch the moving attachments while the appliance operates.
-  \*Do not install the appliance in the presence of flammable or explosive materials.
-  \*Do not operate the appliance when the machine is empty.
-  \*Do not load so less or more than appliance's capacity.
-  \*Do not attempt to use the appliance without suitable protective equipments.
-  \*Because of any reason if there is a fire or flame flare where the appliance is used, turn off all gas valves and electric contactor switch quickly and use fire extinguisher. Never use water to extinguish the fire.
-  \*All the damages because of not having earthing connection will not be on warranty.
-  \*Upper lid mustn't be opened while appliance is operating. Otherwise potatoes may be thrown out.

# POTATO PEELERS

## D OPERATION

### \*Control Panel;

**A:** START Button  
**B:** STOP Button  
**C:** Timer Setting

### \*Operating;

- Clean the appliance by operating it with water in it when it is empty .Then operate the appliance.
- Pre-Cleaning of potatoes that will be put into appliance must be done ( earth,mud ).
- Put potatoes as tank capacity.
- Open the water entrance valve that comes to tank.
- Be sure that upper lid of tank must be closed and lid latch must be locked.
- Press START button to operate the appliance.
- If the appliance operates with 380 V,while plugging during first operation ,pay attention to be operated on the direction of arrow.
- Set the appliance's operating time by pressing timer setting buttons.Potato peeling time is 1-2 min.When time expires the appliance will stop.If the appliance is operated more than necessity it may be disrupted.
- If it is wanted to take off the products while the appliance is operating ; Open the front lid and take off the products by keeping your hand pressed on START button.
- After the operation completed,unplug the power supply.

## E CLEANING & MAINTENANCE

### ➤ CLEANING AND MAINTENANCE AFTER EVERY USE

- After every potato peeling process, clean the inside of tank and lower drum. Clean and dry until there is no residue of potato.
- Always turn off the appliance and disconnect from the power supply before cleaning.
- Clean outer surface of appliance and tank lid with wet cloth and then dry.
- Do not use abrasive cleaning chemicals as these can leave harmful residues.
- Do not clean the appliance by spraying water directly, otherwise electric motor may get damaged.

### ➤ PERIODIC CLEANING AND MAINTENANCE

- Get the periodic maintenance of the appliance once in every 15 days.
- Maintenance should be done by qualified person.
- The Potato Peeler requires low maintenance (Motor and ball bearings are lubricated).
- Maintenance of appliance's contactor should be done by compressed air according to frequency of use.

## F TROUBLESHOOTING

<b>THE APPLIANCE DOESN'T OPERATE</b>	<ol style="list-style-type: none"> <li>1. Check if the appliance is plugged in.</li> <li>2. Check the electrical connections and voltage.</li> <li>3. While evacuating the product from front lid, the appliance is not operated.</li> </ol>
<b>THE APPLIANCE IS NOISY</b>	<ol style="list-style-type: none"> <li>1. Check that if there is material accumulated in the tank or not.</li> <li>2. If the motor is noisy, stop it and call authorized service.</li> </ol>
<b>THE APPLIANCE STOPPED</b>	<ol style="list-style-type: none"> <li>1. The appliance can stop due to low voltage. In this situation check the voltage.</li> <li>2. The appliance may stop when it is overloaded. In this situation allow the motor to cool by taking off some materials from tank.</li> </ol>
<b>ERROR MESSAGE</b>	<b>E1</b> : Thermic error.

- If Potato peeling is not done at suitable quality
- If any function of security doesn't work
  - Do not use the appliance.

**\*If these problems are still going on, contact with our authorized service.**
