

SURGICAL SUCTION UNITS

 made in Italy

COMPANY PROFILE

CA-MI is an Italian family-run factory founded in the early 80's and committed in the production of electromedical equipments, especially **SURGICAL SUCTION UNITS** for the aspiration of human and animal fluids, used by home-care, hospital, emergency and aesthetic professionals. **AEROSOL DELIVERY SYSTEMS**, hot-Steam **INHALATORS** and other medical devices for home-care and wellness complete the wide range of products.

The expertise and know-how achieved in over 40 years make today CA-MI in the position to **export to more than 100 countries** and provide comprehensive answers to medical operators.

*Visitors are welcome to meet the members of the CA-MI Export Team at the major international exhibitions: **Medica** in Dusseldorf (D), **Arab Health** in Dubai (UAE), **Fime** in Miami (USA), **Medica Asia** in Singapore, where we are costantly present with our entire range of medical devices.*

 MADE IN ITALY

INTRODUCTION

Electric suction units are **medical devices** used in wards, theaters, ambulances, home-care and other fields **for aspirating human or animal fluids** from the mouth, the airways and from operation sites by sucking the material through a cannula into a collection jar. Mobile suction units offer a **convenient alternative to central vacuum systems**.

APPLICATION FIELDS

CATEGORIES

Desk-type
Single jar portable suction units with reduced size and weight that can be easily displaced . Trolley on castors available as an option.

Battery-operated
Units operated by internal rechargeable battery, they are lightweight and easily transportable.. They can also be powered by mains to ensure continuous operation and a greater power.

On-castors
Professional suction units on antistatic castors, offering a great choice of accessories for various applications.

NEW HOSPIVAC CONFIGURATION GUIDE

New Hospivac comes in three different configurations providing all answers to any requirement. Being not interchangeable, it is essential to select the correct configuration.

Basic configuration
One air inlet to connect one jar at the time
One safety trap bottle

Foot-switch configuration
One air inlet to connect one jar at the time
One safety trap bottle
One footswitch for suction operation

Full configuration
Two air inlets to connect both jars
Two safety trap bottles
One footswitch for suction operation
Change-over function to switch suction between jars
