

2 Liter Medical Oxygen Bottle - Empty

Product No.: OX-G0002-V

Description

The empty 2-liter Medical Oxygen Cylinder provides medical oxygen to patients requiring short- or medium-term oxygen therapy. It is also ideal for emergency situations.

Made of lightweight steel and painted according to UNE-EN 1089 standards, this 2-liter compressed oxygen bottle has a cylindrical body, a concave bottom and includes a protective cover. With a test pressure of 300 BAR and a working pressure of 200 BAR, all oxygen bottles have a 25E bottle thread for connection to the residual pressure valve (RPV) for the Spanish market.

All oxygen bottles are refillable.

Technical specifications:

- Bottle material: Lightweight 34CrMo4 steel, cylindrical body, Screw to Bottle 25E
- Charging pressure: 200 BAR
- Test pressure: 300 BAR
- Bottle capacity in m3 (O2 gas): 0.424 m3 (424 liters gas)

- Outer diameter of the bottle: 102 mm
- Height with valve (without shade): 451 mm
- Weight of the empty bottle with valve: 4.9 kg
