& Advanced

On-Call[®]
Advanced
Blood Glucose Monitoring System

For professional,
and self testing use.

ACON[®]
Diabetes Care

New!
from ACON

Advanced Features for Diabetics

The advanced features such as **meal-markers**, **ketone warning** and **hypo and hyper warnings** help to better manage diabetes especially for

- Hypoglycemia, which is serious and very dangerous for Diabetics.
- Postprandial hyperglycemia, which predominately contributes to glycemic variability. It is evident that postprandial hyperglycemia increases the risk for cardiovascular disease.
- Ketosis and Ketoacidosis.

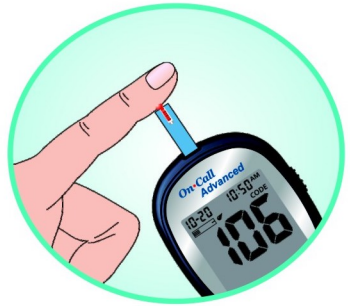

Accurate and Dependable

Clinical studies testing fingertip blood samples proved the accuracy and ease of use of the *On Call® Advanced* Blood Glucose Monitoring System:

- ◆ More than 95% of results are within $\pm 15\%$ of lab reference results;
- ◆ More than 85% of results are within $\pm 10\%$ of lab reference results;
- ◆ More than 60% of results are within $\pm 5\%$ of lab reference results.

Easy to Use

Just two steps of operation

Safe and Convenient

Worry-free from touching blood and/or needle

Strip ejector allows easy and smooth strip disposal to avoid contamination

Lancet ejector designed for convenient lancet release

Better Data Management

- **7, 14, 30, 60 and 90-day averaging** allows users to quickly assess glucose results over these periods
- Substantial meter memory allows up to **500 tests**, with date and time to be stored and reviewed
- **USB Data Transfer Cable and convenient Software** allow easy download to PC and better data management

Individually Foil Wrapped Test Strips Available

- Well protected from air and moisture to ensure high accuracy
- Easy strip disposal helps to avoid contamination
- Convenient to carry
