

OGM 1A
Steril Radyopak Cerrahi Kemik Çimentosu
Gentamisinli - Standart Viskozite

Sterile Radiopaque Surgical Bone Cement
With Gentamicin - Standard Viscosity
Ciment Osseux Chirurgical Radio-opaque Stérile
Avec Gentamicine - Viscosité Standard
Cemento Óseo Quirúrgico Radiopaco Estéril
Con Gentamicina - Viscosidad Estandard

BONE CEMENT WITH ANTIBIOTIC AND NONANTIBIOTIC (ORTHOPEDIC)

OGM1,OGM1A,OGM3 and OGM3A Bone Cements are PMMA containing acrylic based radiopaque with antibiotic and non-antibiotic bone cements. Bone cement has 2 viscosity options standard and low viscosity. These viscosities are formed in such a way that the demands are best responded to as a result of long-term research and evaluations. OGM1,OGM1A,OGM3 ve OGM3A Bone Cements are indicated for fixation of prostheses used in knee-hip and shoulder joints and also to provide fixation in bone defects. It is basically divided into 2 as powder and liquid. OGM1,OGM1A,OGM3 and OGM3A Bone Cements offer the powder product in a ready-to-use (box) blister and together with the mixer blister in order to make this powder and liquid easy to mix during the event in the operating room.

Thus, it can be made ready for direct use without the need for an external box or mixer material.

STERILE RADIOPAQUE SURGICAL BONE CEMENT WITH ANTIBIOTIC

ÜRÜN KODLARI	ÜRÜN ADI	
Ref Kodu:1506/SG	OGM1A 20 Standard Viscosity Bone Cement -with Antibiotics	20gr
Ref Kodu:1503/LG	OGM3A 20 Low Viscosity Bone Cement -with Antibiotics	20gr
Ref Kodu:1711/SG	OGM1A 40 Standard Viscosity Bone Cement -with Antibiotics	40gr
Ref Kodu:1810/LG	OGM3A 40 Low Viscosity Bone Cement -with Antibiotics	40gr
Ref Kodu:1071/SG	OGM1A 60 Standard Viscosity Bone Cement -with Antibiotics	60gr
Ref Kodu:1453/LG	OGM3A 60 Low Viscosity Bone Cement -with Antibiotics	60gr
