- Various equipment variants. The variants exclusively refer to the configuration of output and input signals
- Digital signal processing
- Outstandingly wide range of application due to integration of various applied parts and diagnostic methods
- updates can be applied at any time via USB port
- Storage of high-resolution images and HD videos on USB storage media
- Integration of further image signals via picture-in-picture port (3G-SDI)
- Specialized for use in integrated operating rooms as a central **core nova module**

- User-friendly. Clinically-devised presets are pre-programmed for various disciplines. This includes applications using standard and fiber endoscopes as well as sensor endoscopes with chip-on-the-tip technology. Personal settings can easily be saved as well
- Maximum flexibility: The resolution of all signal outputs can be adapted individually to the connected system
- Patient data can be entered using the connected USB keyboard
- Direct printing possible
- Modern, clearly arranged on-screen menu
- Dialog function:
  1. Control of connected ENDOLIGHT light source for optimum illumination with maximum protection for the endoscope
  2. Monitor display of major device parameters for further devices (pressure indication, set flow, residual gas display, etc.)

# ENDOLIGHT LED 2.2

## LED light source

- The light output is comparable to a 300-watt xenon illuminant
- The LED service life is at least 30,000 hours
- The LED light source reduces power consumption by up to 80% compared to an equivalent xenon light source
- Extremely quiet heatpipe ventilation concept at only 25 dB(A) noise level
- Light cables from different manufacturers (Richard Wolf, Storz, Olympus, ACMI) can directly be connected to the multi-port socket

- Automatic dimming of the light cable socket if the light cable is removed
- Very homogenous illumination of the endoscopic surgical area. No drop in brightness in the peripheral area and no "black spot" in the center
- Very stable color temperature (6500 Kelvin) over the entire LED service life
- Dialog function in conjunction with ENDOCAM Logic camera systems
- Compatible with core nova

## Universal device cart RIWomobil

### All RIWomobil variants

have the following properties in common:

- Integrated cable duct
- 3 shelf units (width 370 mm), 2 of which continuously adjustable
- 4 double casters, 2 of which with dual-function locking (directional locking/freewheeling/full locking)
- Side profiles made of aluminum with mounting points for installing swivel arms and attaching a wide range of accessories
- Dimensions (W x H x D): 720 x 1518 x 700 mm
- 2 casters with dual conductivity
- Color: White, RAL 9016

RIWomobil features the following advantages:

- Order-specific production  
Each cart is configured and built according to the customer's individual demands.  
Any additionally selected shelf units and drawers are installed, adjusted and tested directly in the production process.
- Quality and value preservation  
All components are designed for longevity and high loads.
- Safety  
All mechanical and electrical components are subjected to our permanent quality control process.
- Ergonomics  
On all RIWomobil variants, the monitor position can be adapted to the demands of the operating team.  
Height-adjustable shelf units and device handles on the cart provide individual adaptation options.

# Universal device cart RIWomobil

## Your optimum RIWomobil in just 3 steps

### 1. Where to place the monitors?

RIWomobil provides the option of positioning a swivel arm either in the center on the bridge or laterally in the side profile. As an alternative, a monitor mount can also be used to position a monitor in the center of the bridge.

### 2. Which electrics variant?

The **baseline electrics with a main switch** integrated in the aluminum profile, distributor strip with 12 device connections. The **premium electrics variant for highest demands** includes the following elements in addition to the baseline equipment: isolating transformer and insulation monitoring unit with safety monitoring.

### 3. Which operating voltage?

#### RIWomobil with premium electrics

# RIWomobil Swivel arm for bridge

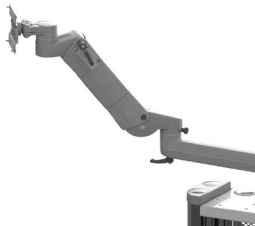

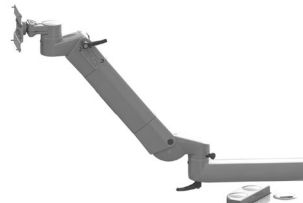

All Flexion-Port models for mounting on the bridge have the following properties in common:

- VESA 100 mount
- Integrated cable duct
- Mechanical locking
- Swiveling range 340°. The area of the swiveling range can be defined individually during assembly
- Durable powder coating in white (RAL 9016)
- The specified length refers to the effective length between the swivel points
- Adapter for mounting on the bridge (32116474) is included in the set

### MEDICAL-GRADE HD-VIDEO WIRELESS SYSTEM

ZeroWire® G2 is a revolutionary third-generation advanced wireless HD-video system with the aim to transform technology into a clinical solution that supports the drive to improve patient outcomes, improve efficiency, and lower operating costs.

Designed for user-friendly operation, ZeroWire G2 delivers full HD-video without noticeable video delay. Clinical teams can now enjoy greater mobility and positioning flexibility with wireless video imaging. The elimination of cables can enhance safety and patient care while promoting quicker turnaround times.

Once the simple link process is completed between a ZeroWire G2 pair, an automatic pairing logic keeps the two units linked between power cycles. An advanced, built-in video scaler processor in ZeroWire G2 enables virtually any HD-video source to be plug-and-play compatible. The upward angled front face of the ZeroWire G2 directs the Radio Frequency (RF) signal above obstructions towards the ceiling to maximize continuous wireless performance even under the most demanding conditions.

Buteliile pentru gaze comprimate sunt destinate transportului, stocării și distribuției unei game variate de gaze cum ar fi: oxigen, hidrogen, azot, metan, amestec de gaze, oxid de carbon, heliu, etc.

Aceste butelii sunt utilizate în mod curent în procesele de sudare, tăiere oxigaz și procese conexe, ca rezervoare de combustibil, de oxigen (pentru aparatele medicale), etc.

Forma și dimensiunile recipientelor – butelii sunt prezentate în tabelul următor.

### PREMIUM VISUALIZATION

The Radiance® Ultra series leads the industry as a revolutionary display with the aim to transform advanced visualization technology capabilities and features into a clinical solution that supports the drive to improve patient outcomes, improve workflow efficiency, and lower operating costs.

Enhanced visualization is accomplished with an LED backlight technology that produces the brightest typical luminance level to enable deep abdominal illumination, overcoming glare and reflection in high ambient light environments. Medi-Match™ color calibration assures consistent image quality and accurate color reproduction. The result is outstanding video image performance.

With a focus to improve workflow efficiency and workplace safety, the Radiance Ultra series is available with an optional built-in ZeroWire receiver. When paired with the ZeroWire Mobile battery-powered stand, the combination becomes the world's first and only truly cordless and wireless mobile solution. To eliminate display scratches caused by IV poles or surgical light heads, the Radiance Ultra series uses scratch-resistant, splash-proof edge-to-edge glass that includes an industry-exclusive 10-year scratch-resistance guarantee.

- High-performance fiber optic material "made in Germany"
- Fast "snap-on" precision connection between endoscope and light cable
- Anti-kink protection made of steel allows for a particularly high number of usage cycles
- Suitable for low-temperature procedure
- Steam-sterilizable
- Standardized color coding of light cables and endoscopes based on their diameters
- Adapters for compatibility with light sources and endoscopes from different manufacturers
