# MAYALI HANE®

● BAKERY HOUSE ●

COOKIES  
&  
CAKES

All Mayalı Hane products are supplemented with B1, B2, B6 and Folic Acid. In addition, all the low protein products produced are lower in protein and phenylalanine values than their counterparts in the world. Many products are almost free consuming foods due to their low value.

Super Mix flour is a mixture which can not be distinguished from normal flour with its water holding process. It has been a first in the world in the field of making cakes, cookies, breads and pies.

*Baked with love*

## Tasty Crispy

INGREDIENTS

Gluten free wheat starch, Vegetable Oil, Corn Starch, Sugar, Yeast Powder, Salt, Leavening Agent (Sodium Bicarbonate, Sodium Pyrophosphate, Sodium Diphosphate), Thickening Agent (Xanthan Gum, Carboxy Methyl Cellulose), Natural Garlic, Thyme, Rosemary, Calcium Propionate, Vitamins-Minerals (B1, B2, B6, Folic Acid).

**MAYALI HANE**®

● BAKERY HOUSE ●

GLUTEN  
FREE  
BREADS

Mayalı Hane produces all kinds of gluten free and low protein bread with its own flour mixtures.

The yeast dough used in the production is slowly fermented and the flavor is increased. The prebiotic fibers in the content provide the chewing and sensory properties of normal bread. Iron deficiency is one of the important health problems of individuals who apply especially Gluten-Free and Low Protein diet.

These individuals face Iron deficiency anemia, the most severe type of iron deficiency.

Therefore, Mayalı Hane enriches all types of bread with Iron and Calcium.

(100 g of bread meets 60% of daily iron and calcium intake reference value.)

In addition, our breads are supplemented with B1, B2, B6 and Folic acid to help with vitamin deficiency.

(100 g bread meets 20% of daily vitamin intake reference value.)

*Baked with love*

*All Proteminin products are supplemented with B1, B2, B6 and Folic Acid. In addition, all the low protein products produced are lower in protein and phenylalanine values than their counterparts in the world. Many products are almost free-consuming foods due to their low value.*

*It continues its production by increasing its product variety with innovative and functional foods such as breakfast cheese, meat analogues and ice cream.*
