

Product Information

Validation of a new compatible vented cap for SSP+ male luer lock

Macopharma wishes to inform its customer that the cap associated to the male luer lock of SSP+ references will be replaced by our new cap.

This modification doesn't impact the product performance or the usability of the male luer lock.

The difference between the old and new cap is visible in the pictures below:

Technical drawing of SSP+ references

Please find in the next page product references that will be impacted by this change
