PRODUCING FOR YOU!

TTTWORLD® is a SILA Grup brand.

Different
Languages

Canadian Technology

In the journey we embarked on for health and humanity in 1997, we continue to increase our goals. We produce for the whole world and share our products and experiences with many countries.

We produce with renewable energy sources and we respect future generations.

We believe that we are doing the hard but right thing.

We will never lose this faith.

Dr. İhsan ŞAHİN

Yönetim Kurulu Başkanı / Board Chairman

DECLARATION OF QUALITY

TTT WORLD® medical disposables are supplied as labelled with CE mark in compliance with European Directives. Blood collection tubes, blood gas syringes and other in vitro diagnostic medical devices are in compliance with 98/79/EC European Directive on In Vitro Diagnostic Medical Devices.

Our syringes, IV sets, blood collection needles and scalp vein sets are class IIa medical devices which are produced in compliance with Directive 93/42/EEC on European Medical Devices.

All the unit products are labeled with CE mark in accordance with the abovementioned directives. Our production facilities have ISO 13485:2016 and ISO 9001: 2015 certificates. The mentioned certificates or declarations of conformity can be forwarded upon request.

All our products are produced, packed, and sterilized if suitable, in compliance with related ISO and European standards.

The symbols used on our product labels are explained in the user manuals.

The shelf lives are determined after stability studies and indicated on each unit product.

OUR PRODUCTS;

The syringes that we produce in our factory are produced in different sizes and with different needle gauges according to the need of the user in compliance with international quality control standards.

IV INFUSION SET

IV sets used for injecting of infusion solutions to the body are;

- Phthalate-Free
- Non-toxic
- Apyrogen
- (Bio-compatible)

It is high quality and user-friendly with its options and product variety.

CE
ISO 9001,
ISO 13485

Varieties of our EO sterilized IV sets are,

- Standard
- With Airway
- Light Sensitive
- With Solution Filter

Different Languages

OUR PRODUCTS

Are produced with regular flow control mechanism, suitable raw material against bending and breaking, airline entrance with bacteria filter, hypodermic needle and bio-compatible and apyrogen materials. They are non-allergic, highly compliant with patient and user-friendly.

- Advanced Technology
- High Quality
- High Production Capacity

TUBES WITH GEL BLOOD CLOT ACTIVATOR

- Used for clinical biochemistry and immunology serology tests.
- All volume variants are produced.
- With the gel, a barrier is created between the serum formed upon centrifugation. The gel forms a barrier in between.
- The inner surface of the tube is coated with the sprayed and dried clot activator to accelerate clotting.
- Can be produced with or without a barcode.

COAGULATION SODIUM CITRATE

%3.2 (0.109 MOL/L)

BLOOD COLLECTION TUBES

- The fill volume of the tube is adjusted to obtain a 9:1 ratio (blood:citrate).
- Citrate coagulation tubes are produced with two different values of buffered sodium citrate solutions as 0.109 mol/L (3.2%) and 0.129 mol/L (3.8%).
- Sodium citrate tubes are often used for coagulation tests.
- Sodium citrate prevents blood clotting by binding the calcium ions.
- In compliance with the international standards, they are produced with double layers. The inner layer of the tube is made from polypropylene, the outer layer of the tube is made from polyethylene terephthalate (PET).

HOLDERS

- Our holders with luer tip enable blood collection from vascular access without any need for extra needle.
- Our regular holders have two models as safety and standard.
- Our single-use safety holders have a safety mechanism which enables the practitioner to terminate the blood collection application in a safe and hygienic way without contacting the needle after collecting the blood from the patient.
- There are different types of holders that allow single use or multiple use.

Different Languages

BLOOD COLLECTION PEN TYPE NEEDLES

Different Languages

- Blood collection needles allow to collect blood from more than one tube.
- Blood collection needles are provided as standard or safety version with different gauges.
- Produced sterile.
- We have unique locked and secure holders for our blood collection / pen type needles.

■ Anadolu Sigorta'nın 2020 yılı faaliyet raporu, ABD merkezli Mercer AEC tarafından değerlendirildi. Dünya Sağlık Örgütü'nün yayınladığı 2020 yılı Anadolu Sigorta 1 Genel Müdürlüğü'nün Türkiye'deki faaliyetleri değerlendirildi. Bu sonuç değerlendirildiği anlaşıldığı gibi...

AVRUPAYA ÇİNDEN VE ABD'DEN DAHA FAZLA ÜRÜN SATIYORUZ

Sağlık malzemelerinde bağımlılık azalıyor

Türkiye genelinde yerli ve milli medikal malzemelerin üretimi önemli ölçüde arttı. Bu dönemde Çin ve ABD'ye ihracatın hızlandığına ilişkin 500 milyon dolarlık artış, ihracatın da yaklaşık olarak yüzde 50'ye ulaştığını açıklıyor.

Çin'den Pekiştirme 2020 yılının ilk yarısında Türkiye'de sağlık malzemeleri üretimi önemli ölçüde arttı. Bu dönemde Çin ve ABD'ye ihracatın hızlandığına ilişkin 500 milyon dolarlık artış, ihracatın da yaklaşık olarak yüzde 50'ye ulaştığını açıklıyor.

Virüsü lehimize çevirebiliriz

SAĞLIK Yatırımcıları Derneği Başkanı Dr. İhsan Şahin, çingaya iğnesi dahil sağlık ekipmanlarının yaklaşık yüzde 95'ini ithal eden Türkiye için koronavirüs salgınının büyük bir yatırım fırsatına dönüştürülebileceğini söyledi. Çin'in koronavirüs nedeniyle bir çok alanda üretim yapamaz hale geldiğine dikkat çeken Şahin, "Çin, basit ve saf malzemeleri üretiminde dünya talebinin yaklaşık yüzde 60'ını tek başına karşılıyor. Çin fabrikaları 3 aydır çalışmıyor, adeta kontak kapandı. Çin'in ihracatçı olduğu maske, enjektör, tıbbi örtük ve desenfekte solüsyon malzemelerini şimdi kendisi ithal etmek istiyor. Türkiye medikal sanayi olarak diğer sanayilerden

önde. Destek verilirse saf malzemelerini rahatlıkla üretilebilir ve dünya pazarının yüzde 20'sini bir yılda ele geçirebiliriz" dedi. SYD Başkanı Şahin, sahibi olduğu Sila Grup'un Golbağ'da 500 milyon liralık yatırımla enjektör, kan tüpü ve serum setleri üretmek amacıyla kurduđu TTT World fabrikasında sağlık sektöründeki yatırım fırsatlarını anlattı.

KAMU YERLİ ALSIN
Şahin, "Yerli sanayiye desteklenmemiz gerekiyor. Eğer bu süreçte kamu, 5 yıl boyunca ihtiyacımızın 3'te birini ya da 5'te birini yerli firmalardan almaya garanti ederse yerli üretim hızla artar" dedi.
