

DACRIL

Acid poliglicolic, fir multifilament, acoperit, resorbabil
Polyglycolic acid, multifilament, coated, absorbable

Material <i>Material</i>	Sutură din acid poliglicolic <i>Suture made of polyglycolic acid</i>
Structură <i>Structure</i>	Multifilament împletit <i>Multifilament braided</i>
Acoperire <i>Coating</i>	Policaprolactonă și stearat de calciu <i>Polycaprolactone and calcium stearate</i>
Dimensiuni disponibile (USP) <i>Available Sizes(USP)</i>	Vezi paginile următoare. <i>See next pages.</i>
Indicații <i>Indications</i>	Indicat a fi utilizat în sutura și/sau ligatura țesuturilor moi în chirurgia generală dar nu este indicat în sutura țesuturilor cardiovascular și neurologic. <i>Indicated to be used for suturing and/or ligation of soft tissues in general surgery but not indicated in cardiovascular and neurological tissues suture.</i>
Rezistența la tracțiune <i>Tensile strength</i>	Rezistența la rupere este de circa 65% din rezistența inițială după 14 zile la 37°C. <i>Preserves 65% of the initial strength after 14 days at 37°C.</i>
Resorbție <i>Absorption</i>	Resorbabil Absorbția completă are loc între 60 și 90 de zile post implantare. <i>Absorbable</i> <i>Completely between 60 and 90 days post implantation</i>
Proprietăți <i>Properties</i>	Fir sintetic care își păstrează proprietățile indiferent de starea țesuturilor, cu reacție tisulară minimă. Resorbția se realizează prin hidroliză. Timpul de resorbție este constant indiferent de țesut sau de dimensiunea firului. Delicat, cu noduri sigure și ușor de realizat, datorită structurii multifilamentare, dar totodată atraumatic și asigurând un pasaj fin prin țesuturi, datorită învelișului său, ce îl transformă într-un virtual fir monofilament. <i>Synthetic suture which preserves its properties regardless of tissue condition, having a minimal tissular reaction. Absorption is done by hydrolysis. The absorption time is constant regardless of the tissue or of the suture's size.</i> <i>Soft, with safe & easy knot tie down due to the braided structure, but atraumatic and with a smooth passage through the tissues due to its coating which makes it a virtual monofilament.</i>
Caracteristici <i>Features</i>	Culoare: Vezi paginile următoare Sterilizat cu EO Disponibil cu sau fără ac atașat Diferite grosimi și lungimi <i>Colour: See next pages</i> <i>EO sterilized</i> <i>Available with or without needle</i> <i>Various suture sizes and lengths</i>

Acid poliglicolic, fir multifilament, acoperit, resorbabil
Polyglycolic acid suture, multifilament, coated, absorbable
