

FlowNit BIOSEAL

Knitted vascular prostheses:

- Specific knitting techniques for high burst resistance and low dilatation^{1,2}
- Aldehyde and isocyanate free BIOSEAL impregnation using dehydrothermal crosslinked collagen guarantees primary sealing of the blood in the prosthesis³
- Concentric crimping and the guide line allow precise positioning of the prosthesis
- Soft and supple texture for easy handling

Peripheral Treatment with ePTFE

FlowLine BIPORE

- Specific BIPORE configuration with two different fibril lengths to ensure low thrombogenicity
- Additional ePTFE wrapping for enhanced suture retention and high burst strength*
- Unique guideline indicates diameter and wall thickness of the graft
- Helical reinforcement for increased resistance against kinking and compression
- Excellent and pliable handling and suture behaviour
- Simple and easy removal of the spiral reinforcement
