

# 930D 电动吸引器

## Features

1. Use a large-flow oil-free self-lubricating negative pressure pump with high pumping rate and no oil pollution.
2. The large-caliber liquid storage bottle is equipped with a bottle stopper with a sealing ring, which is convenient for users to open and close the bottle stopper and remove the dirty liquid in the bottle.
3. An overflow protection device is provided to prevent liquid from entering the intermediate pipe and the negative pressure pump.
4. The equipped air filter can prevent the negative pressure pump from being contaminated.
5. The manual switch and the foot switch are connected in parallel and can be selected at will.
6. The negative pressure value can be adjusted steplessly according to clinical needs.
7. The whole machine has a compact structure, stable operation and low noise.

## Parameters

Ultimate negative pressure value:  $>0.09\text{MPa}$  (680mmHg)  
Negative pressure adjustment range:  $0.02\text{MPa}$  (150mmHg)  
Vacuum rate:  $>40\text{L/min}$   
Liquid storage bottle: 2500ml (glass) x 2  
(plastic PC bottle and disposable liquid absorption bag can be selected)  
Power supply:  $\sim 220\text{V}$ , 50Hz  
Input power: 250VA

## Accessories

Disposable suction tip

Suction catheter

Filter
