

Ilkirch-Graffenstaden, June 19, 2025

To whom it may concern:

In Romania, Gazomat has only one dedicated service facility – GAS ALARM SERVICES – located in Bucharest, Romania. They are fully trained by GAZOMAT and reviewed regularly to ensure the best service possible for our Romanian customers and this would be our recommendation for Romania.

In addition to being a service center for our hardware solutions, they are trained on implementation and support of the Gazomat NGS software.

Gas Alarm Services is supported directly by Gazomat with no intermediary if further technical items arise with our instrumentation and software.

On the next page, you will find a list of companies that are able to service Gazomat's equipment.

Kind regards,

Alan VIDAL
General Manager

P/o Alan VIDAL
