

# ActionVisc HPMC :

2% w/v HydroxyPropyl MethyCellulose  
( Ophthalmic Viscoelastic Viscosurgical )

## Description:

ActionVisc OphthalmicVisco Surgical Device ( OVD ) is a sterile, isotonic, apyrogenic viscoelastic solution of highly purified, non-inflammatory, HydroxyPropyl MethyCellulose ( HPMC ) Solution with a molecular weight greater than 80000 daltons for intraocular use during the surgery of the anterior segment of the eye.

For a 2% w/v HPMC solution, each ml of the solution provides 20mg of the HPMC dissolved in balanced salt solution. The viscosity of this solution is 4000 to 5500 cps.

## Indication:

ActionVisc is indicated for use as an Ophthalmic Surgical aid in anterior segment surgical procedures, such as cataract extraction and intraocular lens implantation. The OVD maintains a deep chamber during anterior chamber surgery and thereby allowing for more efficient manipulation with significantly less trauma to the corneal endothelium and other ocular tissues.

## Contraindication:

At present there are no known contraindications, when used by a trained ophthalmic surgeon as indicated.

## Warning & Precautions:

- Do not use the package if the integrity of the sterile package is compromised..
- ActionVisc HPMC is for intraocular use only.
- ActionVisc HPMC is for single use only
- ActionVisc is not to be placed in direct sunlight
- Do not resterilize this device.

## Storage:

Store at a temperature between 10° Celsius and 30° Celsius and relative humidity less than 65%.  
Protect from freezing. Do not expose containers to direct sunlight

## Supply:

ActionVisc is a sterile solution of 2% w/v HydroxyPropyl MethyCellulose Solution is available in 2ml , 3ml PreFilledSyringes ( PFS ) in pouch packing . Also available in 5ml glass vials in pouch packing in a box pack of Ten vials.
