COLASS JSC is a company with a dynamic development in the field of constructions at national level, with over 10 years of experience in the field, having recognized professional identity, good knowledge and experience in the industrial and commercial fields, but also a strong team that includes about 80 professionals.

From the day one of our activity, we tend to become leaders in the field of contemporary industrial construction. Our leadership quality is decisive in the construction of any object. It also helps us to approach each client individually and to face any challenge brilliantly.

One of the company's core values is "responsibility in dealing with our partners and customers". We know how important it is to be able to benefit from an advantageous and complex offer for solving all the challenges and problems a client faces through a single partner. We are absolutely convinced that we have solutions for all your wishes related to design, manufacture and assembly of constructions of any type, complexity and destination.

Design is the key step in the construction process, because it ensures the avoidance of subsequent occurrences of deficiencies during the period of operation of the construction. Our design department is a team of highly qualified engineers who guarantee compliance with all standards and norms in the realization of resistant and durable constructions over time.

You come up with ideas, we take care of everything!
