Video Laryngoscope
VL3S

HugeMed

P/N: ENG_EU_CATA_AWM_VL_3S_250325V1.1

Assembly Combination

VL3S

The VL3S consists of an imaging part and an operational part. The different imaging parts offer varying levels of display clarity, enabling the product to meet the requirements of different application scenarios. Users can select the appropriate imaging part based on their need for portability in their specific applications. On the other hand, the operational part of VL3S consists of six models, covering all the sizes required for airway management in clinical settings, thus providing medical personnels with a professional and reliable visualisation solution for flexible airway management.

Operational Part

Imaging Part

3.5 inch TFT LCD

Connecting part connected to the blades

VL3SU

3.5 inch pocket-sized medical monitor

VL3SU, the 3.5 inch pocket-sized medical monitor, allows highly mobile airway management procedures when integrating with the operational part of VL3S.

VLMCF

8 inch medical monitor

8 inch TFT LCD screen

HDMI output capability

Reliable physical buttons

When users require both video clarity and portability, the imaging part equipped with an 8-inch display is the ideal choice. This setup provides the necessary video clarity for procedures in general wards, operating theaters, and ICUs. With a weight of around one kilogram and a compact design, it is effortless to carry.

Fast setting menu

Scope operating management

15.6 inch touchscreen

S-8

15.6 inch touchscreen medical monitor workstation experience

When users require more advanced video, user, and patient management tools, the S-8 is the best choice. The fully upgraded S-8 features a user-friendly operating system, and its intuitive menu design proves "what you see is what you get", significantly reducing learning time. The S-8 can be widely used in outpatient clinics, general wards, endoscopy rooms, ICUs, operating theaters, and other settings.

Operational Part
