ABOUT TURKUAZ HEALTHCARE

Since 2000, we have been reaching to more than 128 countries of the world from Turkey by manufacturing and exporting Medical Products, Disinfectant and Antiseptic Products, Non-prescription Products (OTC Products), Food Supplements, Sexual Health Products, Dermocosmetic and Personal Care Products. We own globally known brands; KONIX, KLY, Konicare, Mediseptica, Gynoseed, Gynotal, Joydrops and VitaSupp. At the same time we have a huge experience in Private Label and OEM production. Our experience of Private Label and OEM production is more than 20 years. We are a leading manufacturer in the medical sector, representing our country successfully in the global arena.

We are awarded as one of the leading at 'Turkey's Exporters' with our export performance covering 70% of our production capacity in the medical products. We have GMP (Good Manufacturing Practice) Certificate, indicating that we have international quality standards in all processes of the product, ISO 13485: 2016 certificate certifying that we produce Class I, CE certified Class IIA, Class IIB and Class III products and Halal Certificate registering that we manufacture according to Islamic rules. In the medical sector, we are one of the leading manufacturers in Europe with production standards at Class III level.

We make world-class production and Research and Development (R&D) activities in our 20,000 square meter closed area in Istanbul, which is operated in accordance with ISO 9001 standards. Our R&D center, approved by Turkish Ministry of Science and Technology, has been one of the pioneers of the sector by developing many patented products. Changing world trends are examined thoroughly in our R&D center and our laboratories equipped with modern devices. We continue to lead the sector by introducing our innovative products to the market with the implementation of the international production standards.

PARABEN FREE

EN

In any kind of ultrasonography and doppler application, it cuts off the air between the skin and the probe and allows ultrasonographic waves to reach the device monitor in a more clear and uninterrupted manner. With the assistance of the vacuum technology used in production, active substances in its content and its high viscosity, it does not damage the probe. It is not affected by the body salt during the use. It ensures an easy ultrasonography. It is hypoallergenic, does not irritate skin, and does not contain oil and oily substances. It does not contain formaldehyde and salt; it has no toxic effects and odor. It is FDA approved. Proven by tests done in University of Michigan that it provides 50% better transmission of ultrasound waves when compared with the most popular brand of the world.

Storage: Store in a cool and dry environment between 5 - 30 °C away from direct sunlight.

FR

Dans tous types d'échographies et d'applications doppler, il empêche la présence d'air entre la peau et la sonde et il permet aux ondes échographiques d'atteindre le moniteur de l'appareil d'une manière plus claire et sans interruption. Grâce à la technologie utilisée pour la production sous vide, aux substances actives dans son contenu et à sa haute viscosité, il n'endommage pas la sonde. Il n'est pas affecté par la salinité du corps pendant l'utilisation. Il garantit une échographie simple. Il est hypoallergénique, n'irrite pas la peau et ne contient pas d'huiles ni de matières grasses. Il ne contient pas de formaldéhyde ni de sel ; Il n'a pas d'effets toxiques, il est inodore. La FDA a été approuvée. Des tests à l'Université du Michigan ont démontré que les ondes ultrasonores sont 50 % mieux transmises que la marque la plus vendue au monde.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 °C à l'abri des rayons soleil.

TR

Her türlü ultrasonografi ve doppler uygulamasında cilt ile prob arasındaki havayı keserek ultrasonografi dalgalarının cihaz ekranına daha net ve kesintisiz gelmesini sağlar. İçerdiği aktif maddeler, sahip olduğu yüksek viskozite ve üretiminde kullanılan vakum teknolojisi sayesinde proba zarar vermez, kullanım esnasında vücuttaki tuzdan etkilenmez rahat bir ultrasonografi sağlar. Hipoalerjeniktir, cildi tahriş etmez, yağ ve yağlı madde içermez, formaldehit ve tuz içermez, toksik tesiri yoktur, koku içermez. FDA onaylıdır. Michigan Üniversitesi'nde yapılan testlerde, dünyanın en çok bilinen ultrason jeli ürününe kıyasla %50 daha fazla görüntüleme performansı gösterdiği kanıtlanmıştır.

Saklama Koşulları: 5 - 30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

ES

En cualquier tipo de ecografía y aplicación de doppler, se elimina el aire entre la piel y la sonda y permite que las ondas ecográficas lleguen al monitor del dispositivo de una manera más clara y sin interrupciones. Gracias a las sustancias activas en su contenido y su alta viscosidad, junto con la ayuda de la tecnología de vacío utilizada en su producción, no daña la sonda y no se ve afectada por la sal corporal, que asegura una ecografía cómoda. Es hipoalérgico, no irrita la piel. No engrasa, no contiene formaldehído ni sal, no tiene efecto tóxico ni olor. Ha recibido la aprobación de la FDA. Se ha demostrado en pruebas realizadas en la Universidad de Michigan que transmite ondas de ultrasonido un 50% mejor que la marca más popular del mundo.

Almacenamiento: Conservar en ambiente seco y fresco entre 5 - 30 °C fuera del alcance directo de la luz solar.

DISPOSABLE ULTRASOUND GEL (STERILE/NON STERILE)

TEK KULLANIMLIK ULTRASON JELİ / GEL DESECHABLE DE ECOGRAFÍA/
GEL JETABLE ULTRASONIQUE

PARABEN FREE

EN

Sterile Ultrasound Gel: Used in vaginal and intrauterine examinations, surgical operations, in ultrasonographic applications in tube baby techniques and in biopsy. Disposable Sterile Packages is 20 ml Ultrasound Gel sterilized by Gamma rays. It has 3 years shelf life.

Non-Sterile Ultrasound Gel: Bacteria that may be carried over products by air are not formed. It is easy to use for doctors. It gives confidence to the patient about the first usage of product. In any kind of ultrasonography and doppler application, it cuts off the air between the skin and the probe and allows ultrasonographic waves to reach the device monitor in a more clear and uninterrupted manner. With the assistance of the vacuum technology used in production, active substances in its content and its high viscosity it does not damage the probe. It is not affected by the body salt during the use, ensures an easy ultrasonography.

It is FDA approved. Proven by tests done in University of Michigan that it provides 50% better transmission of ultrasound waves when compared with the most selling brand of the world

Storage: Store in a cool and dry environment between 5 - 30 °C away from direct sunlight.

FR

Le Gel ultrasonique stérile: Utilisé pour les examens vaginaux et intra-utérins, la opération chirurgicale, pour les applications échographiques dans les techniques de fécondation in vitro et pour les biopsies. Le Gel stérile jetable est conditionné en volume de 20 ml stérilisé par rayons Gamma.

Le Gel ultrasonique non stérile: Il n'y a pas de formation par voie aérienne de bactéries. Les bactéries qui peuvent être reportées à gros produits conditionnés par voie aérienne ne sont pas formés. Facile à utiliser pour les médecins, Il rassure le patient sur l'utilisation unique du produit. Adapté à tous types d'échographies et de doppler, il empêche la présence de l'air entre la peau et la sonde et il permet aux ondes échographiques d'atteindre le moniteur de l'appareil d'une manière plus claire et sans interruption. Grâce la technologie utilisée pour la production sous vide, aux substances actives dans son contenu et à sa haute viscosité, il n'endommage pas la sonde. Il n'est pas affecté par la salinité du corps pendant l'utilisation.

ULTRASOUND PROBE CLEANING SOLUTION

PROB TEMİZLEME SOLÜSYONU / SOLUTION DE NETTOYAGE DES SONDES
À ULTRASONS / SOLUCIÓN LIMPIADORA DE LA Sonda DE ECOGRAFÍA

EN

It is suitable for professional use in cleaning probe surfaces during patient examinations. It has a practical spray cap. It clears the image by removing the gel residues on the probe and prolongs the life of the probe. Thanks to the active substances it contains, it prevents the transmission of bacteria from patient to patient and provides hygiene. It does not contain alcohol and aldehydes. It is odorless.

Storage: Store in a cool place between 5 - 30°C and away from sunlight.

TR

Hasta muayeneleri sırasında prob yüzeylerinin temizliğinde profesyonel kullanım için uygundur. Kullanışlı sprey kapağa sahiptir. Prob üzerindeki jel kalıntılarını alarak görüntüyü netleştirir ve probun ömrünü uzatır. İçerdiği aktif maddeler sayesinde hastadan hastaya bakteri geçmesini engeller ve hijyen sağlar. Alkol ve aldehit içermez. Kokusuzdur.

Saklama Koşulları: 5 - 30°C arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

FR

Il est sûr à utiliser dans le domaine médical pour nettoyer les surfaces de la sonde lors des examens des patients. Il est livré avec un capuchon de pulvérisation pratique. Il efface l'image en éliminant les résidus de gel de la sonde, ainsi qu'en prolongeant la durée de vie de la sonde. Il empêche la transmission des bactéries de patient à patient et assure l'hygiène grâce aux principes actifs qu'il contient. Il est exempt d'alcool et d'aldéhydes. Il n'a pas d'odeur.

Stockage: A conserver dans un endroit frais entre 5 et 30°C, à l'abri de la lumière directe du soleil.

ES

Se puede utilizar en el campo médico para limpiar las superficies de las sondas durante los exámenes de los pacientes. Viene con una práctica tapa de spray. Limpia la imagen eliminando los residuos de gel de la sonda, además de prolongar la vida de la sonda. Previene la transmisión de bacterias de un paciente a otro y asegura la higiene gracias a los principios activos que contiene. Está libre de alcohol y aldehídos. No tiene olor.

Almacenamiento: Almacenar en un lugar fresco y seco entre 5 y 30 ° C, lejos de la luz solar directa.

LUBRICANT GEL (STERILE/NON STERILE)

KLY®

LUBRIKANT JEL / GEL LUBRIFIANT / GEL LUBRICANTE

EN

CARBOMER FREE  Appropriate for Cervical Screening Test Collection

EN

Konilube Sterile Lubricating Jelly is a water-soluble sterile lubricating gel that does not contain paraben, carbomer and glycerine. This gel is used in endoscopy, colonoscopy, gynaecological examinations, rectal endoscopic, catheter operations, also used for vaginal lubrication. Konilube Sterile Lubricating Jelly will be used to lubricate the insertion and passage of imaging devices such as endoscoped, ultrasound transducers, and transesophageal echocardiography transducers, catheters and surgical instrumentation, gynaecologic and rectal examinations.

Storage: Store in a cool and dry environment between 5 - 30 °C away from direct sunlight. Keep dry.

FR

Gelée lubrifiante stérile Konilube
La gelée lubrifiante stérile Konilube est un gel lubrifiant stérile soluble dans l'eau et sans parabènes, carbomères et glycérine. L'endoscopie, la coloscopie, les examens gynécologiques, l'endoscopie rectale, les opérations par cathéter et la lubrification vaginale sont toutes des procédures qui utilisent ce gel. L'insertion et le passage d'appareils d'imagerie tels que les endoscopes, les transducteurs à ultrasons et les transducteurs d'échocardiographie transœsophagienne, les cathéters et les instruments chirurgicaux, ainsi que les examens gynécologiques et rectaux seront lubrifiés avec Gelée lubrifiante stérile Konilube.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 °C à l'abri des rayons soleil. Garder au sec.

TR

Konilube Steril Lubrikant Jel suda çözünebilen, paraben, karbomer ve gliserin içermeyen steril kayganlaştırıcı jeldir. Endoskopi, kolonoskopi, jinekolojik muayeneler, rektoskopi uygulamaları, sonda uygulamalarında ayrıca vajinal lubrikasyon için kullanılır. Konilube Steril Lubrikant Jel endoskop, ultrason trenaduseri ve transözefajiyal ekokardiyografi transduserleri, kateterler ve cerrahi enstrümanlar, jinekolojik ve rektal uygulamalarda kullanılarak izleme cihazlarının vücuda girişini kolaylaştırır.

Saklama Koşulları: 5 - 30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz. Kuru tutunuz.

For Application Method

EN

Gynotal® Obstetric Gel is developed specially to ease vaginal birth, which is highly bioadhesive and has a high water-binding capacity. Gynotal® Obstetric Gel is during vaginal delivery to make the birth easier for both mother and child, and to protect the perineum. Gynotal® Obstetric Gel is sterile, non-allergenic, electro-conductive, slightly acidic kind on mucous membranes and eyes. Gynotal® Obstetric Gel can be used both for first-timer mothers and for women who have already given birth, following Caesarean section. Special recommendations for use, for local application in the vaginal birth canal only.

Gynotal® Injector A: For use during the first stage of labour.

Gynotal® Injector B: For use during the second stage of labour and for manual detachment of the placenta.

Storage and Shelf Life: The shelf life of Gynotal® Obstetric Gel is 3 years. It must be stored under room temperature (<30°C) and protected from direct sunlight. The expiry date is written on the outside packing. Do not use the expired products.

FR

Ce Gel obstétrique est développé spécialement pour faciliter l'accouchement vaginal, Il est hautement bio adhésif et dispose d'une haute teneur en eau. Gynotal® Gel obstétrique est utilisé au cours de l'accouchement par voie vaginale pour faciliter la naissance pour la mère et l'enfant et pour protéger le périnée. Gynotal® Gel obstétrique est stérile, non allergène, électro-conducteur, légèrement acide, inoffensif pour les muqueuses et les yeux. Gynotal® Gel obstétrique peut être utilisé tant pour les femmes qui accouchent pour la première fois que pour les femmes qui ont déjà accouché, ou après césarienne. Informations spécifiques utilisation; pour application locale dans le canal vaginal de naissance seulement.

Gynotal® Injecteur A pour utilisation au cours de la première étape du travail.

Gynotal® Injecteur B pour utilisation au cours de la deuxième étape du travail et pour le détachement manuel du placenta.

Stockage et durée de vie: La durée de conservation de Gynotal® Gel obstétrique est de 3 ans. Il doit être stocké à une température ambiante (< 30° C) et protégé des rayons du soleil. La date d'expiration est écrite sur l'emballage extérieur. Ne pas utiliser les produits périmés.

TR

Gynotal® Obstetrik Jel özel olarak vajinal doğuma yardımcı olmak amacıyla geliştirilmiştir. Yüksek derecede biyoadeziftir ve su bağlama kapasitesi yüksektir. Gynotal® Obstetrik Jel doğum sırasında hem anne hem de bebek için doğumu kolaylaştırmak ve perineyi korumak için kullanılır. Gynotal® Obstetrik Jel steril, alerjik olmayan, elektrokondüktif, hafif asidik olup, mukoz membranları ve gözleri tahriş etmez. Gynotal® Obstetrik Jel hem ilk doğumunu yapacak annelerde hem de önceden doğum yapmış annelerde ve sezaryen operasyonu geçirmiş olanlarda kullanılabilir. Kullanıma ilişkin özel tavsiyeler; yalnızca doğum kanalına lokal uygulama içindir.

Gynotal® Enjektör A: Doğumun birinci evresinde kullanılmak içindir.

Gynotal® Enjektör B: Doğumun ikinci evresinde ve plasantanın elle çıkarılmasında kullanılmak içindir.

Saklama ve Raf Ömrü: Gynotal® Obstetrik jelin raf ömrü 3 yıldır. Oda sıcaklığında saklanmalı ve ışıktan korunmalıdır. Son kullanım tarihi dış ambalajın üzerinde yazılıdır. Son kullanım tarihi geçen ürünler kullanılmamalıdır.

ES

Gel Obstétrico está desarrollado especialmente para facilitar el parto vaginal. Es altamente bioadhesivo y tiene una alta capacidad de retención de agua. Gynotal® Gel Obstétrico se usa durante el parto para hacerlo más fácil tanto para la madre como el niño, y para proteger el perineo. Gynotal® Gel Obstétrico es estéril, no alergénico, electro-conductor, ligeramente ácido, no provoca irritación en las membranas mucosas y los ojos. Gynotal® Gel Obstétrico se puede utilizar tanto para las madres que van a tener su primer parto, como para aquellas que ya han concebido anteriormente así como las que anteriormente fueron sometidas a cesárea. Recomendaciones especiales de empleo; para aplicación local sólo en el canal vaginal.

Gynotal® Inyector A es para el uso en la primera etapa del parto.

Gynotal® Inyector B es para el uso durante la segunda etapa del parto y para el desprendimiento manual de la placenta.

Almacenamiento y Vida Útil

Gynotal® El Gel Obstétrico tiene 3 años de vida útil. Se debe almacenar a temperatura ambiente y protegido de la exposición directa a la luz. La fecha de caducidad se puede consultar en el envase. No se deben utilizar los productos caducados.

ECG GEL

EKG JELİ / GEL ECG / GEL DE ECG

EN

Used in electrodes which does not contain gel, ECG latches and during switches in any ECG and exertional applications. Allows ECG waves to be transferred to the device in a lucid manner. It is hypoallergenic. It does not irritate skin, and does not contain oil and oily substances. It does not contain formaldehyde and salt; it has no toxic effects and odor.

Storage: Store in a cool and dry environment between 5 - 30 °C away from direct sunlight.

FR

Utilisé pour les électrodes sans gel intégré, ECG loquets et au cours de commutateurs dans n'importe quel ECG et d'applications dues à un exercice physique. Permet aux ondes d'ECG de parvenir à l'appareil de façon claire. Il est hypoallergénique et ne contient pas d'huile ni de matières grasses. Il ne contient pas de formaldéhyde et sel ; Il n'a pas d'effets toxiques et il est inodore.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 ° C à l'abri des rayons soleil.

TR

Her türlü EKG ve efor uygulamalarında, jelsiz elektrot, EKG mandalı ve puarlarda kullanılır. EKG dalgalarının cihaza net aktarılmasını sağlar. Hipoalerjeniktir, cildi tahriş etmez, yağ ve yağlı madde içermez, formaldehit ve tuz içermez, toksik tesiri yoktur, koku içermez.

Saklama Koşulları: 5 - 30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

ES

Se utiliza con electrodos sin gel. Permite la transmisión clara de las ondas de ECG al dispositivo. Es hipoalergénico, no irrita la piel, no engrasa, no contiene formaldehidos ni sal, no tiene efectos tóxicos ni olores.

Almacenamiento: Conservar en ambiente seco y fresco entre 5 - 30° C fuera del alcance directo de la luz solar.

NEW

ELECTRODE GEL

ELEKTROT JELİ / GEL D'ÉLECTRODES / GEL PARA ELECTRODOS

**EN**

KONIX Electrode Gel is a non-sterile, multipurpose, electrically conductive, water-soluble, non-staining, non-gritty, bacteriostatic contact media. Due to its high conductivity, it provides conducting a dose of electric current to and fro between the coupled device and body. It is recommended for all electromedical procedures including ECG, defibrillation, biofeedback, and EMG. It does not irritate skin, and does not contain oil and oily substances. It does not contain formaldehyde and salt; it has no toxic effects and odor.

Storage: Store in a cool and dry environment between 5 - 30 °C away from direct sunlight.

FR

Le gel d'électrode KONIX est un milieu de contact bactériostatique non stérile, polyvalent, électriquement conducteur, soluble dans l'eau, non tachant, non granuleux. Le courant élémentaire peut être transmis de l'appareil couplé au corps et vice-versa grâce à son excellente conductivité. Le gel d'électrode KONIX est recommandé pour toutes les procédures électro médicales, y compris l'ECG, la défibrillation, le biofeedback et l'EMG. Ne contient pas d'huile ni de matières grasses. Il ne contient pas de formaldéhyde et sel ; Il n'a pas d'effets toxiques et il est inodore.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 ° C à l'abri des rayons soleil.

TR

KONIX Elektrot Jeli non-steril, çok amaçlı, elektriksel olarak iletken, suda çözünür, leke bırakmayan, kumsuz, bakteriyostatik temas medyasıdır. Yüksek iletkenliği nedeniyle, elektrik akımının akuple cihazdan vücuda veya vücuttan cihaza iletilmesini sağlar. EKG, defibrilasyon, biofeedback ve EMG dahil tüm elektromedikal prosedürler için KONIX Elektrot Jel önerilir. Cildi tahriş etmez, yağlı değildir, formaldehit veya tuz içermez, toksik etkisi veya kokusu yoktur.

Saklama Koşulları: 5 - 30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

ES

El gel de electrodo KONIX es un medio de contacto bacteriostático no estéril, multiusos, eléctricamente conductor, soluble en agua, que no mancha, no es arenoso. La corriente elemental se puede transmitir desde el dispositivo acoplado al cuerpo y viceversa gracias a su excelente conductividad. El gel de electrodos KONIX se recomienda para todos los procedimientos electro médicos, incluidos ECG, desfibrilación, biorretroalimentación y EMG. No irrita la piel, no engrasa, no contiene formaldehidos ni sal, no tiene efectos tóxicos ni olores.

Almacenamiento: Conservar en ambiente seco y fresco entre 5 - 30° C fuera del alcance directo de la luz solar.

EN

Applied to clean solvent, cream or lotion sort substances off on ECG instrument. The spray provides leads the electronic information to access the ECG machine properly. It is an economical product which can be applied about minimum 1500 times to an ECG instrument. Compare to an ordinary product, the ECG Spray provides a much better result in cleaning. Used undiluted and provides hygiene. Prolongs electrode life by removing bacteria and wastes cumulated on the surface of electrode's surface. The product increases conductivity. Does not consist of hazardous and toxic substances such as fat, phenol, aldehyde and etc. and does not cause any irritations.

Storage: Store in a cool and dry environment between 5 - 30 °C away from direct sunlight.

TR

EKG Sprey solvent, krem ve losyonların, arındırılmasında kullanılır. Bilginin cihaza net gelmesini sağlar. Ekonomik bir üründür. Ortalama bir şişe minimum 1500 defa kullanılabilir. Sıradan bir ürünle yapılan temizlemeden daha etkili sonuç verir. Haricen sulandırılmadan kullanılır ve hijyen sağlar. Bileşimindeki kimyasallar ile EKG elektrot yüzeyinde biriken atıkları yok ederek elektrot ömrünü uzatır, daha uzun kullanımı sağlar. İletkenliği artırır, hypoallerjeniktir. Yağ, fenol, aldehit vb. zararlı toksik maddeler içermez. İritasyona neden olmaz.

Saklama Koşulları: 5 - 30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

EN

ECG Cream contains special moisturizers and offers an easy application and cleansing afterwards. It is hypoallergenic and does not cause irritation. Generates a high conductive performance. Compare to ordinary ECG gel products, the ECG cream provides more accurate data in results. ECG cream does not consist of allergen substances such as oil, oily components, phenol, aldehyde and etc. which may irritate skin.

Storage: Store in a cool and dry environment between 5 - 30 °C away from direct sunlight.

FR

Le Spray 'ECG est utilisé afin de nettoyer les substances de type crème, solvant, ou lotion sur l'appareillage de l'ECG. Le spray conduit l'information électronique pour accéder correctement à l'électrocardiographe. C'est un produit économique, qui peut être appliqué au minimum 1500 fois, avec une boîte moyenne. Par rapport à un produit ordinaire, le Spray ECG fournit un bien meilleur résultat de nettoyage. Il est utilisé sans dilution et il garantit l'hygiène. Le produit augmente la conductivité. Il ne se compose pas de substances dangereuses et toxiques tels que graisse, phénol, aldéhyde etc. et ne provoque pas d'irritations.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 °C à l'abri des rayons soleil.

ES

Espray de ECG se utiliza para limpiar el disolvente, cremas y lociones de los aparatos de ECG. Asegura la transmisión clara de la información al dispositivo. Es un producto económico que puede ser aplicado como mínimo 1500 veces en un instrumento de ECG. Comparado con un producto corriente, el Espray ECG proporciona mejores resultados de limpieza. Se utiliza sin diluir y proporciona higiene. Prolonga la vida útil del electrodo mediante la eliminación de los residuos acumulados, como pueden ser las bacterias, en la superficie del electrodo. Incrementa la conductividad y es hypoalergénico. No contiene sustancias peligrosas ni tóxicas como, fenoles, aldehídos etc. No engrasa. No provoca irritación.

Almacenamiento: Conservar en ambiente seco y fresco entre 5 - 30 °C fuera del alcance directo de la luz solar.

FR

ECG crème contient des hydratants spéciaux et offre une application et un nettoyage facile. Il est hypoallergénique et ne provoque pas d'irritation. Elle génère une conduction de haute performance. ANTI FOG SOLUTIONS FOR LAPAROSCOPY LENS (STERILE)

LAPAROSKOPI LENSİ BUĞU ÖNLEYİCİ / LENTILLES ANTI BUÉE POUR LAPAROSCOPIE ANTI-VAHO POR LENTE DE LAPAROSCOPIA

REF: AFS-0001
Y0000.135.0003
6 ml

EN

KONIX Anti-Fog Solution is used to prevent the lenses of the camera from fogging due to the difference in body temperature during laparoscopy. KONIX Anti-Fog Solution includes 6 ml bottle of the solution and a sponge both Gamma sterilized. During laparoscopy operations, using the adhesive sticker, attach the sponge to an adequate surface, keeping in mind the solution is volatile put it in small quantities on the sponge, dip and clean the tip of the lens using the sponge. The Anti-fog solution allows the lens to stay fog free for more extended periods than regular usage (without the solution) facilitating the job of the surgeon thus the patient. As the solution is sterile it does not cause any infection. it does not cause any infection.

Storage: Store in a cool and dry environment between 5 - 30 °C away from direct sunlight..

TR

Laparoskopik ameliyatlarda kameranın vücut içine girmesiyle soğuk-sıcak farklılığından dolayı lensler buğulanmaktadır. Laparoskopi lensi buğu önleyici gama ışınları ile steril edilmiş sünger ve 6 ml solüsyondan oluşmaktadır. Ameliyat esnasında sünger arkasındaki yapışkan bant sayesinde uygun zemine yapıştırılır ve solüsyon üzerine dökülür. Solüsyon uçucu bir madde olduğu için azar azar süngere dökülerek kullanılmalıdır. Bu solüsyonlu sünger yardımı ile temizlenerek lens normalden minimum daha uzun sürede buğulanır bu da hem cerrah hemde hasta için büyük kolaylıklar sağlar. Steril olduğundan herhangi bir enfeksiyona sebep olmaz.

Saklama Koşulları: 5 - 30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

FR

KONIX Solution Anti-Fog est utilisé pour empêcher les lentilles des laparoscopes de s'embuer en raison de différence de température du corps pendant la laparoscopie. KONIX Solution Anti-Fog contient une bouteille de 6 ml de la solution et une éponge. Les deux sont stérilisés aux rayons Gamma. Pendant les opérations de laparoscopie, en utilisant l'autocollant, fixez l'éponge sur une surface adéquate, en gardant à l'esprit que la solution est volatile, mettez-la en petite quantité sur l'éponge au fure et à mesure, trempez et nettoyez la pointe de la lentille avec l'éponge. La solution Anti-Fog empêche la lentille de s'embuer pendant des périodes plus longues qu'une utilisation régulière (sans solution) facilitant le travail du chirurgien ainsi que le patient. La solution étant stérile, elle ne provoque aucune infection.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 °C à l'abri des rayons soleil.

ES

Durante la operación laparoscópica, las lentes se empañan debido a los cambios de temperatura. La solución anti-vaho para las lentes de laparoscopia contiene 6 ml de solución y una esponja que han sido esterilizadas mediante Rayos Gamma. Durante la operación, la esponja se engancha en la zona adecuada con la ayuda de la banda adhesiva trasera y se echa la solución. Como la solución es una sustancia volátil, se debe usar vertiendo pequeñas cantidades en la esponja. Las lentes que se limpian con la solución anti-vaho se empañan por mínimo más tiempo de lo normal, ofreciendo así más facilidades tanto al médico como al paciente. No provoca ninguna infección por su carácter estéril.

Almacenamiento: Conservar en ambiente seco y fresco entre 5 - 30° C fuera del alcance directo de la luz solar.

LASER&CAVITATION GEL

LAZER&KAVİSYON JELİ / GEL DE LASER ESTHETIQUE&CAVITATION/
GEL PARA LÁSER Y CAVITACION

EN

Laser & Cavitation gel reduces to the pain that patients experience during depilation and makes the device last longer by cooling the device head and window. With the assistance of vacuum technology used in production, the active substances in its content and high viscosity, Konix Cosmetic Gel does not damage to the probe; it is not affected by the body salt during the use, ensures an easy application. It is hypoallergenic, does not irritate skin, is soluble in water and cleaned easily, and does not contain oil and oily substances. It does not contain formaldehyde and salt; it has no toxic effects and odor.

Storage: Store in a cool and dry environment between 5 - 30 °C away from direct sunlight.

FR

Le gel pour le Laser et la Cavitation soulage la douleur ressentie par les patients en particulier lors du laser, et assure une plus longue durée d'utilisation de l'appareil en refroidissant son extrémité et sa vitre. Les agents actifs contenus n'endommagent pas l'appareil en raison de leur viscosité élevée et de la technologie d'aspiration utilisée dans leur fabrication, ils assurent une application confortable et ne sont pas affectés par les sels émis par le corps durant l'utilisation. Le gel est hypoallergénique, il n'irrite pas la peau, est soluble dans l'eau, facilement nettoyable, ne contient pas d'huile ni de matières grasses. Il ne contient pas de formaldéhyde, ni de sel, il ne présente aucun effet toxique et est inodore.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 °C à l'abri des rayons soleil.

EN

Scar Gel is a silicone-based gel typically intended to be applied directly to the skin for the prevention and treatment of hypertrophic and keloid scars (resulting from surgery, accidents, cuts, burns or other injuries). The silicone gel forms a protective barrier over the scar, to help retain moisture. Helps preventing formation and visibly reducing unsightly appearance hypertrophic scars and keloids, by smoothing, flattening, moistens skin, reduces pain, improves elasticity and softness, reduces redness, and itching.

Storage: Store in a dry place between 5°C - 30°C. Do not use after expiration date.

FR

Scar gel est un gel à base de silicone généralement destiné à être appliqué directement sur la peau pour la prévention et le traitement des cicatrices hypertrophiques et chéloïdes (résultant d'une intervention chirurgicale, d'accidents, de coupures, de brûlures ou d'autres blessures). Le gel de silicone forme une barrière protectrice sur la cicatrice, pour aider à retenir l'humidité. Il lisse et aplanit les cicatrices hypertrophiques et les chéloïdes, hydrate la peau, réduit la douleur, augmente l'élasticité et la douceur, réduit les rougeurs et les démangeaisons, prévient la formation de cicatrices et aide à réduire visiblement cette cicatrice.

Conservation: Conserver dans un endroit sec entre 5°C - 30°C. Ne pas utiliser après la date de péremption.

TR

Hipertrofik ve keloid yara izlerinin (ameliyat, kazalar, kesikler, yanıklar veya diğer yaralanmalardan kaynaklanan) önlenmesi ve tedavisi için doğrudan cilde uygulanması amaçlanan silikon bazlı bir jeldir. Silikon jel, nemin korunmasına yardımcı olmak için yara izi üzerinde koruyucu bir bariyer oluşturur. Hipertrofik yara izlerini ve keloidleri pürüzsüzleştirerek, düzleştirerek, cildi nemlendirerek, ağrıyı azaltarak, elastikiyeti ve yumuşaklığı artırarak, kızarıklık ve kaşıntıyı azaltarak, iz oluşumunu önlemeye ve gözle görülür şekilde azaltmaya yardımcı olur.

Saklama Koşulları: 5°C - 30°C arasında kuru bir yerde saklayın. Son kullanma tarihinden sonra kullanmayınız.

ES

Scar Gel es un gel a base de silicona típicamente destinado a ser aplicado directamente sobre la piel para la prevención y tratamiento de cicatrices hipertróficas y queloides (como resultado de cirugía, accidentes, cortes, quemaduras u otras lesiones). El gel de silicona forma una barrera protectora sobre la cicatriz, para ayudar a retener la humedad. Suaviza y aplanar cicatrices hipertróficas y queloides, hidrata la piel, reduce el dolor, aumenta la elasticidad y la suavidad, reduce el enrojecimiento y la picazón, previene la formación de cicatrices y ayuda a reducir visiblemente esta cicatriz.

Almacenamiento: Almacenar en un lugar seco entre 5 ° C - 30°C. No usar después de la fecha de caducidad.

BARRIER CREAM

BARIYER KREM / CRÈME BARRIÈRE / CREMA BARRERA

REF: PCU-0026
Y0000.462.0012
Tube 100 g**EN**

KONIX Barrier Cream, with its barrier effect of Zinc Oxide and other components in its content, creates a complete protection shield against irritation and redness that may occur on the skin. KONIX Barrier Cream contains Panthenol which strengthens the skin barrier and traps moisture within the skin. The formula enriched with snail extract and vitamin E helps the skin to regenerate and restore its elasticity. It has a formula suitable for sensitive skin. Protein and vitamins in its structure enrich and soften your skin.

Storage: Store in a cool and dry environment between 5 - 30 °C away from direct sunlight.

FR

La crème barrière KONIX crée un bouclier complet de protection contre les irritations et les rougeurs sur la peau grâce à l'effet barrière de l'oxyde de zinc et des autres ingrédients de sa formule. Le panthénol, qui se trouve dans la crème barrière KONIX, aide à renforcer la barrière cutanée tout en emprisonnant l'humidité. L'extrait d'escargot et la vitamine-e sont inclus dans la formule, ce qui aide la peau à se régénérer et à retrouver son élasticité. Il est composé d'une formule douce pour la peau. Sa structure contient des protéines et des vitamines qui nourrissent et adoucissent votre peau.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 ° C à l'abri des rayons soleil.

TR

KONIX Bariyer Krem, içeriğinde bulunan Çinko Oksit ve diğer bileşenlerin bariyer etkisi ile, ciltte oluşabilecek tahriş ve kızarıklıklara karşı tam bir koruma kalkani oluşturmaktadır. KONIX Bariyer Krem içeriğinde yer alan Panthenol cilt bariyerini güçlendirerek nemi hapseder. Salyangoz özütü ve E vitamini ile zenginleştirilen formül cildin yenilenmesine ve elastikiyetini yeniden kazanmasına yardımcı olur. Hassas ciltlere uygun formüle sahiptir. Yapısında bulunan protein ve vitaminler cildinizi zenginleştirir ve yumuşatır.

Saklama Koşulları: 5 - 30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

ES

La crema barrera KONIX crea un escudo completo de protección contra la irritación y el enrojecimiento de la piel gracias al efecto barrera del Óxido de Zinc y otros ingredientes de su fórmula. El panthenol, que se encuentra en la crema protectora KONIX, ayuda a fortalecer la barrera cutánea al mismo tiempo que atrapa la humedad. La fórmula incluye extracto de caracol y vitamina e, que ayuda a la piel a regenerarse y recuperar la elasticidad. Está elaborado con una fórmula que es suave para la piel. Su estructura contiene proteínas y vitaminas que nutren y suavizan tu piel.

Almacenamiento: Conservar en ambiente seco y fresco entre 5 - 30° C fuera del alcance directo de la luz solar.

HOT&COLD THERMO GEL

SICAK&SOĞUK TERMO JEL / GEL THERMO CHAUD&FROID
GEL TERMO CALIENTE Y FRÍO

EN

Due to special feature of the gel, it does not freeze in the refrigeratory and preserves its coldness for a long period of time after it is taken out. It maintains its temperature for a long time when it is heated by microwave or boiling water for a sufficient time. It is used in cold form for twisting of leg, hitting, falling, migraine and in similar places where cold compress is required; in hot form for joint pains and in conditions when hot compress is required. It can be used for many times unless the packing is damaged.

Storage: Store in a cool and dry environment between 5 – 30 °C away from direct sunlight.

FR

Compte tenu de sa spécificité ce gel, ne gèle pas dans le réfrigérant et préserve son froid pendant une longue période de temps après que qu'il en a été retiré. Il maintient longtemps sa température lorsqu'il est chauffé par micro-ondes ou de l'eau bouillante pendant un temps suffisant. Il est utilisé à froid dans les cas d'entorses, pour faire tomber la fièvre, pour les migraines et chaque fois qu'une application froide est nécessaire; on l'utilise à chaud pour les douleurs articulaires et chaque fois qu'une application chaude est nécessaire. On peut l'utiliser un grand nombre de fois avant qu'il ne soit rendu inutilisable. A conserver au frais et à l'abri du soleil.

Stockage: Conserver dans un endroit frais et sec entre - 30 ° C à l'abri des rayons soleil.

TR

Ambalaj içerisindeki jelin özelliğinden dolayı ürün buzlukta donmaz ve çıkarıldığında uzun süre soğukluğunu korur. Yeterli sürede mikrodalga ya da kaynar su ile ısıtıldığında ısınıp uzun süre muhafaza eder. Soğuk olarak; bilek burkulmaları, çarpma, düşme, migren ve farklı ağrılarda, hafif dereceli yanıklarda, ateşli hastalıklarda ve benzeri soğuk kompres gereken yerlerde, sıcak olarak da eklem ağrıları ve sıcak kompres gereken durumlarda kullanılır. Ürün ambalajı zarar görmediği müddetçe defalarca kullanılabilir.

Saklama Koşulları: 5-30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

ES

Debido a la particularidad del gel, el producto no se congela en el frigorífico y preserva su frialdad durante un largo período de tiempo después de ser retirado. Mantiene su temperatura durante un largo tiempo cuando se calienta con microondas o agua hirviendo durante un tiempo suficiente. Se utiliza en frío para las torceduras en las piernas, golpes, caídas, migrañas y en zonas similares donde se requiere compresa fría; se utiliza caliente para los dolores en las articulaciones y en condiciones donde se requiere una compresa caliente. Se puede usar el producto por muchas veces siempre que el embalaje no esté dañado.

Almacenamiento: Conservar en ambiente seco y fresco entre 5-30° C fuera del alcance directo de la luz solar.

MEDICAL ADHESIVE REMOVER

TIBBİ YAPIŞKAN SÖKÜCÜ / SPRAY DE RETRAID D'ADHÉSIF
REMOVEDOR DE ADHESIVOS MÉDICOS

EN

It is a painless remover of several adhesives. It is designed to facilitate easy, pain free and non-traumatic removal of all types of adhesives, including plasters, tapes, dressings and patches. This is friendlier for the skin and can help promote better wound healing as it reduces the damage caused to the skin and wound area by removing plasters and dressings. It is a spray which ensures easy application and it will work within seconds. The spray can be used upside down. It is a very mild product, it will not sting! Will dry very quickly and will therefore not influence the adhesion of the next plaster. Consists of:

1. A 50ml spray bottle, containing the main following ingredient: Silicone 100%;
2. This information leaflet containing all the information you need to know about and how to use.

Keep the leaflet for your reference.

Storage: Store in a cool and dry environment between 5 – 30 °C away from direct sunlight.

FR

C'est un dissolvant indolore de plusieurs adhésifs. Il est conçu pour faciliter le retrait facile, sans douleur et non traumatique de tous les types d'adhésifs, y compris les plâtres, les bandes, les pansements et les patches. C'est plus favorable pour la peau et peut aider à promouvoir une meilleure cicatrisation des plaies car elle réduit les dommages causés à la peau et surface de la plaie en enlevant les plâtres et les pansements. Il est un spray qui assure une application facile et qui fonctionne en quelques secondes. Le spray peut être utilisé à l'envers. C'est un produit très doux, il ne piquera pas! Sèchera très rapidement et n'influencera donc pas l'adhérence du plâtre suivant. Consiste en:

1. Un flacon pulvérisateur de 50 ml contenant l'ingrédient principal suivant: Silicium 100%
2. Cette brochure d'information contenant toutes les informations que vous devez savoir et comment utiliser.

Conservez la brochure pour votre référence.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 ° C à l'abri des rayons soleil.

TR

Yapışkanların ağrısız sökülmesini sağlar. Flaster, şeritler, örtüler ve keçeler gibi tüm yapışkan çeşitlerinin ağrısız ve travma yaratmadan, kolayca sökülmesi için tasarlanmıştır. Cilt ile uyumludur ve flaster örtülerin ciltten yara bölgesinden sökülmesiyle oluşabilecek hasarları azaltarak yara iyileşmesine yardım eder. Kolay kullanımı olan ve birkaç saniyede etki eden bir spreydir. Sprey yukarıdan aşağıya doğru kullanılır. Yumuşak yapıda bir üründür, yaraya yapışmaz! Çok çabuk kurur ve bu nedenle bir sonraki flasterin yapışkanlığını etkilemez. Ürün şunlardan oluşur:

1. 50ml sprey şişe, şu ana maddeyi içerir: 100% silikon;
2. Bu kullanım talimatındaki bilgiler ürünü kullanmak için gereken tüm bilgiler içerir. Referans olarak bu kağıdı saklayınız.

Saklama Koşulları: 5-30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

ES

Es un removedor indoloroso que quita varios adhesivos. Está diseñado para la eliminación fácil, sin dolor y no traumática de todos tipos de adhesivos; incluyendo yesos, cintas, apósitos y parches. Esto es más amigable para la piel y puede ayudar a promover una mejor cicatrización de heridas, ya que reduce el daño causado a la piel y al área de la herida al quitarse yesos y apósitos. Es un spray con una aplicación fácil y funcionará en segundos. El spray puede usarse al revés. Es un producto muy suave, ¡no picará! Se secará muy rápido y, por lo tanto, no influirá en la adhesión del próximo yeso. Contiene:

1. Una botella de spray de 50 ml, que contiene el siguiente ingrediente principal: Silicon 100%
2. Este folleto informativo contiene toda la información que necesita saber y cómo usar el producto.

Guarde este folleto para su referencia.

Almacenamiento: Conservar en ambiente seco y fresco entre 5-30° C fuera del alcance directo de la luz solar.

Mouth Care Kit used for patients in intensive care and bedrest. Set: consists of swab sponge stick, antibacterial oral care and mouthwash solution, lip moisturizer gel and a container for measuring purposes. It cleans microorganisms to be formed in the mouth. A sufficient amount of mouth washing solution is put into the measuring glass in the box. The sponge at the tip of the stick is saturated with the solution and the whole of the mouth cavity, gums and the upper part of the tongue are cleaned, then some moisturizing gel is put onto the sponge and applied to the mouth cavity.

Storage: Store in a cool and dry environment between 5 – 30 °C away from direct sunlight.

TR

Yoğun bakım ve yatarak tedavi gören hastaların ağız bakımının yapılmasında kullanılır. Set: swab sünger çubuk, antibakteriyel ağız bakım ve gargara solüsyonu, dudak nemlendirici jel ve ölçek amaçlı kaptan meydana gelmektedir. Özel içeriği sayesinde ağız içinde oluşabilecek mikro organizmaların temizlenmesini sağlar. Yeterli miktarda ağız yıkama solüsyonu kutu içindeki ölçü kabına konur. Solüsyon çubuğun ucundaki süngere emdirilerek tüm ağız boşluğu, diş etleri ve dil üzeri temizlenir. Daha sonra süngere bir miktar nemlendirici jel koyarak ağız boşluğuna sürülür.

Saklama Koşulları: 5-30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

FR

Kit de soins pour la bouche utilisé pour les patients en soins intensifs et alités. Ensemble: se compose d'un bâtonnet-éponge, d'une solution antibactérienne de soins bucco-dentaires et de bain de bouche, d'un gel hydratant pour les lèvres et d'un récipient à des fins de mesure. Il empêche les micro-organismes de se former dans la bouche. Une quantité suffisante de solution de lavage de bouche est versée dans le doseur dans la boîte. L'éponge à la pointe du bâtonnet est imprégnée de la solution et est passée sur l'ensemble de la cavité buccale, puis la partie supérieure de la langue et les gencives sont nettoyées avec un peu du gel hydratant qu'on a mis sur l'éponge et appliqué à la cavité buccale.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 °C à l'abri des rayons soleil.

ES

Se utiliza en el cuidado bucal de los pacientes que se encuentran en unidades de cuidados intensivos y los pacientes hospitalizados. Juego: consta de un bastoncillo de esponja, una solución antibacteriana para el cuidado bucal y enjuague bucal, un gel humectante para los labios y un recipiente para medir. Limpia los microorganismos que se generan en la boca. Se introduce una cantidad suficiente de solución bucal en el vaso medidor que viene en la caja y la esponja que hay en la punta del hisopo se satura con la solución, se limpia toda la cavidad bucal así como las encías y la parte superior de la lengua. Luego se aplica un poco de gel hidratante encima de la esponja y se aplica en toda la cavidad bucal.

Almacenamiento: Conservar en ambiente seco y fresco entre 5-30° C fuera del alcance directo de la luz solar.

FR

Surtout après frottis, biopsie opérations etc., Les prélèvements déposés sur les lamelles de verre sont affectées par environnement jusqu' à la phase d'étude. Grâce à son principe actif ce fixateur protège de l'environnement et n'endommage pas la partie porteuse d'une pathologie.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 ° C à l'abri des rayons soleil.

ES

Especialmente utilizado para después de realizar operaciones de frotis, biopsias, etc., las muestras que se colocan sobre la lámina de vidrio están expuestas a los efectos ambientales hasta llegar al ensayo. Gracias a los activos que contiene la solución fijadora, las muestras se protegen del ambiente y no se perjudica la muestra.

Almacenamiento: Conservar en ambiente seco y fresco entre 5-30° C fuera del alcance directo de la luz solar.

AUTOMATIC X RAY CHEMICALS

OTOMATİK RÖNTGEN BANYO KİMYASALLARI / PRODUITS CHIMIQUES POUR LES MACHINES DE DÉVELOPPEMENT AUTOMATIQUES DESRADIOGRAPHIES / QUÍMICOS DERADIOGRAFÍA AUTOMÁTICA

EN

Used in developing any conventional X-ray tomography and mammography films in automatic film developing machines. Provides the maximum density at normal doses between 30°C and 35°C, does not give off unpleasant odor and does not deposit on the tank. When stored between 5°C and 30°C, it preserves its quality during 2 years.

Storage: Store in a cool and dry environment between 5 – 30 °C away from direct sunlight

FR

Utilisé dans les machines de développement automatique de n'importe quel film radiographique classique en tomographie et mammographie Fournit la densité maximale à des doses normales entre 30°C et 35°C, ne dégage aucune odeur désagréable et ne laisse aucun résidu dans les réservoirs. S'il est conservé entre 5°C et 30 °C, il conserve sa qualité pendant 2 ans.

Stockage: Conserver dans un endroit frais et sec entre 5 - 30 °C à l'abri des rayons soleil.

TR

Otomatik film banyo makinelerinde her tür röntgen, tomografi ve mamografi filmlerinin banyo edilmesinde kullanılır. 30-35°C arasında normal dozlarda maksimum dansite sağlar, kullanıcıyı rahatsız edici koku ve tanklarda tortu oluşturmaz. 5-30°C'de depolandığında ve ürünün ağzı açılmadığı sürece kalitesini 2 yıl muhafaza eder.

Saklama Koşulları: 5-30°C'nin arasında ve güneş ışığından uzakta, serin bir yerde muhafaza ediniz.

ES

Se utiliza en cualquier maquina convencional de Rayos X de película automática para tomografía y mamografía. Proporciona la máxima densidad en dosis normales entre 30 °C y 35 °C, no tiene un olor desagradable y no forma residuo en el depósito. Cuando es almacenado entre 5 °C y 30°C, conserva su calidad durante 2 años.

Almacenamiento: Conservar en ambiente seco y fresco entre 5-30° C fuera del alcance directo de la luz solar.

GYNOSEED®

We offer our customers value added products that will create a competitive advantage with our brand strength, innovative product development policy and superior service quality.

With our OEM products which we produce for well-known brands and powerful players worldwide. Our rich product portfolio creates added value in the global arena in the fields of Medical, Disinfection, OTC, Sexual Health, Food Supplements and Dermocosmetics.

We produce in accordance with international quality standards to ensure a comfortable health service. The products, developed in accordance with World Health Organization (WHO), GMP, and MDD 93/42 / EEC standards are produced in line with national and international quality regulations using high technology machinery, equipment and devices. We are one of Europe's leading manufacturers with production permit of Class III for medical devices.

Mediseptica is high level disinfectant used for disinfection and cleaning of medical instruments and devices.

Gynoseed® Pregnancy Facilitating Gel which has been patented by our R&D center and approved by the Ministry of Science and Technology helps increase chances of getting pregnant naturally.

VITASUPP Dietary Supplements are produced with quality ingredients that provide a unique composition developed for health and wellness, taking its strength from R&D foundations.

KONIX Head Lice and Nits Shampoo & Spray provide fast and effective removal from lice and nits with its special formula that does not contain harsh chemicals and pesticides.

Joydrops personal lubricants are special lubricants used during sexual acts produced by Europe's leading medical gel manufacturer.

RELIABLE BRANDS INNOVATIVE SOLUTIONS

RUBBER LIMB & THORACIC STRAPS

For attaching electrodes • the special “anti-aging” treatment retards the crystallization of the rubber when exposed to the sun or air • available in different sizes: for limbs use - one hole (15 mm x 40 cm / 25 mm x 45 cm), - two holes (32mm x 45cm) - for thoracic use - one hole (32mm x 135cm), six holes (100mm x 135cm).

ELECTRODES FOR TENS AND EMG

• Superior quality • available with a single or double helix • free terminal lead wires or with safety CAP • individual bags - package with 50 bags • manufactured in compliance with EN ISO 9001 and AAMI standards.

ELECTRO SURGICAL PLATES

• Made of FOAM suitable to obtain perfect results with all instruments • manufactured and tested in compliance with EN 60601-1/ EN 60601-2/ AAMI-HF 18 • available with one zone and two zones and REM alarm for adults (adhesive surface 215 sq cm), for children (surface 129 sq cm) and for new born (surface 63 sq cm). **All the models are available even equipped with cables.**

DEFIBRILLATION PADS

Produced using a high quality material • flexible foam • bio-compatible akrylic adhesive • conductive hydrogel • maintain a stable conductivity to temperature, humidity and time • avoid the direct contact between metal paddles and patient's skin • do not contaminate the metal paddles and do not corrupt future defibrillations • packing: 2pads/ bag - 50 pads/ box.

PULSE OXIMETER SENSORS

A broad range of sensors to monitor and detect the arterial oxygen saturation. Excellent quality and proven accuracy are the characteristics that better describe a whole series of disposable and reusable sensors. Suitable for all the main fittings spread on the market and perfectly matching with adults/ children and newborn needs, these sensors do ensure the best performance and the top reliability.

ELECTRODES & ACCESSORIES FOR EEG & EMG

A serie of high quality/ performing EEG-EP accessories enrich our range:

A) BRIDGE ELECTRODES Made of silver/ silver chloride to optimize signal transmission. Available in three colours (red, blue, yellow)- Slightly curved support to improve head adaption. Three different types of connection (horizontal, vertical, with clamp electrode);

B) SILICONE HEADCAPS With 2 or 4 adjustable bands to fit for various requirements. Anatomically-designed earmuffs. Available in three sizes (Small-Medium-Large);

C) SPECIAL INK FOR EEG Suitable & excellent for all devices (Siemens excluded), allowing a perfect trace without blurs. Black colour- 1 litre bottle with graduated scale- (6 bottles per box- 4 boxes per carton);

D) DISK ELECTRODES Available in silver/ silver chloride or gold - 10 mm diameter- With 120-150-200-250 cm lead wire & DIN 42802 safety plug - 10 electrodes per set with coloured lead wires (available 10 colours);

E) DISPOSABLE CONCENTRIC NEEDLES FOR ELECTROMYOGRAPHY Easy to use thanks to an ergonomic handgrip and an extremely sharp point - Recording area marker - Equipped with wings for automatic unfastening -Shielded, light & flexible lead wire with 5 pole DIN 45322 connector and entirely shielded handgrip. Available in different diameters (from 0.35 to 0.60 mm) and different lengths (from 20 to 70 mm) - 50 pcs per packing.

MOUTHPIECES

Made of material particularly resistant to saliva or manipulation, perfectly hygienic, without residues and non-allergic - can be used on most spirometers of the most important brands present on the market - available in the external diameters 22-26-28-30 and 34 mm, but in the case of large orders the customer can request a specific diameter - boxes of 500 pieces - an extremely handy dispenser is available on customer's demand.

EC product compliance

ELECTRODES & ACCESSORIES

Maximum result both in terms of stability and precision, also under the most difficult conditions.

The line of electrodes is extremely complete and makes it possible to meet any monitoring requirement.

- For adults or for paediatric use
- With solid gel or liquid gel
- For normal monitoring or for stress tests
- FOAM or TNT/ TEXTILE or MICROPORE base
- Round-shaped with different diameters, oval or rectangular

This line of accessories enables to provide excellent customer service, offering complementary or similar articles that are in great demand. Also in the case of accessories, the continuous research and exchange of information with the final user have allowed us to manufacture high-quality and extremely reliable products.

CERACARTA

TOP TRACE LINE FOR NORMAL MONITORING

NM 50 RFI

Ø50 mm.	Dimensions	Ø50 mm.
Foam	Backing	TNT
Solid	Gel	Solid
Ag/AgCl	Sensor	Ag/AgCl

30 pcs / pouch - 600 pcs / box - 7200 pcs / carton

Packaging

30 pcs / pouch - 600 pcs / box - 7200 pcs / carton

The most typical sizes. The most demanded supports. A proved quality always useful.

NM 50 TNI

NM 42 DFI

45x42 mm.	Dimensions	42x36 mm.
Foam	Backing	Foam
Solid	Gel	Solid
Ag/AgCl	Sensor	Ag/AgCl

30 pcs / pouch - 600 pcs / box - 7200 pcs / carton

Packaging

30 pcs / pouch - 600 pcs / box - 7200 pcs / carton

Two multifunctional models: suitable for adult and pediatric ECG's (low stock availability - smallscale investment).

NM 3642 OFI

NP 30 RFI

Ø30 mm.	Dimensions	23x34 mm.
Foam	Backing	Silicone coated pet film
Solid	Gel	Solid
Ag/AgCl	Sensor	Ag/AgCl

30 pcs / pouch - 600 pcs / box - 7200 pcs / carton

The classical and largely used electrode for pediatric ECG's. Excellent quality ensured also on "critical" patients.

MED TAB

100 pcs / pouch - 500 pcs / box - 5000 pcs / carton

This electrode entirely replaces suction chests and clamps to patient's advantage both in terms of hygiene and health.

RE 30 LWF

30 mm. female 4 mm	Dimensions	22 mm. safety 1,55 mm
Foam	Backing	Foam
Solid	Gel	Solid
Ag/AgCl	Sensor	Ag/AgCl

3 pcs / pouch - 120 pcs / box

Available also with 22 mm diameter Model RE 22 LWF (with 4 mm female plug)

RE 22 LWS

3 pcs / pouch - 120 pcs / box

Available also with 30 mm diameter Model RE 30 LWS (with 1,55 mm safety plug)

TOP TRACE LINE FOR STRESS TEST & HOLTER

ST 50 RFI

Ø 50 mm.	Dimensions	Ø 50 mm.
Foam	Backing	Foam
Solid	Gel	Liquid
Ag/AgCl	Sensor	Ag/AgCl

30 pcs / pouch - 600 pcs / box - 7200 pcs / carton

Packaging

ST 50 RLI

30 pcs / pouch - 600 pcs / box - 7200 pcs / carton

The most suitable electrodes for ECG's under difficult conditions.

Easy to apply and use • Strong adhesiveness • Do not irritate the skin • Highly conductive gel

NM 55 RLI

Ø 55 mm.	Dimensions	Ø 55 mm.
Foam	Backing	TNT
Liquid	Gel	Solid
Ag/AgCl	Sensor	Ag/AgCl

25 pcs / pouch - 500 pcs / box - 6000 pcs / carton

Packaging

NM 55 TNI

30 pcs / pouch - 600 pcs / box - 7200 pcs / carton

When a larger adhesive surface is mandatory for an excellent examination.

Easy to apply and use • Strong adhesiveness • Do not irritate the skin • Highly conductive gel

TOP TRACE LINE RADIOTRANSSPARENT

TOP RESULTS FOR STRESS TEST

TOP RESULTS FOR HOLTER

CLAMP ELECTRODES

The classical-designed clamps but with an improved quality. Composed of 3 pieces with sensors in silver/silver chloride for maximum reliability in signal transmission.

NEW DESIGN:

The structure consists of a single piece (all other clamps are made up of three pieces) to avoid breaking. • Possibility of opening the clamps more than usual in the case of particularly strong limbs. • This means that the product is practically indestructible and extremely versatile.

SILVER / SILVER CHLORIDE SENSORS:

For maximum reliability in signal transmission. • only silver can prevent changes, distortions and disturbances which might occur with other metals; therefore the clamps are completely efficient. • only silver allows for full recovery after defibrillation as required by AAMI standards.

UNIVERSAL CONNECTION

suitable for any product type

SET OF FOUR CLAMPS in yellow, green, red and black

THE CLAMP ELECTRODES ARE AVAILABLE ALSO IN THE PEDIATRIC VERSION WITH THE SAME STRUCTURAL AND SENSORIAL CHARACTERISTICS AS THOSE FOR ADULTS

SUCTION CHEST ELECTRODES

3 SIZES

THE SUCTION CHEST ELECTRODES ARE AMONG THE BEST YOU CAN FIND ON THE MARKET TODAY

- SILVER / SILVER CHLORIDE CUP SENSOR, GUARANTEES MAXIMUM RELIABILITY IN SIGNAL TRANSMISSION, PREVENTS DISTORTIONS AND DISTURBANCES. IN PARTICULAR IT ALLOWS FOR FULL RECOVERY AFTER DEFIBRILLATION.
- SUCTION CUP MADE OF A SPECIAL MIXTURE WHICH IS VERY SOFT AND THEREFORE EXTREMELY USEFUL TO CREATE A VACUUM AS WELL AS BEING VERY STRONG AND ABSOLUTELY NON-DEFORMING EVEN AFTER BEING USED THOUSANDS OF TIMES.
- UNIVERSAL CONNECTION SUITABLE FOR ANY CONNECTION TYPE
- AVAILABLE IN THREE VERSIONS: FOR PAEDIATRIC USE WITH A 15 MM DIAMETER AND FOR USE ON ADULTS WITH 24 MM AND 30 MM DIAMETERS.
