WebRisk Indicator

The WebRisk Indicator describes a company's publicly visible cyber risk. It is calculated based on an external analysis of the company's website.

If you plan to grant this company access to your IT systems or digital data, we recommend an in-depth analysis using a CyberRisk Rating. Learn more at: www.cyberrisk-rating.at/beantragen

Rating	Description	Last updated
Excellent	The website complies with security standards.	2023-02-21

KSV1870

Covid-19 information

The current corona pandemic is having a major impact on economic life. The national and global situation is currently changing daily. The actual effects and consequences of this crisis on the economy are currently still unclear. The KSV1870 therefore strongly recommends to consider KSV1870 information, including its rating, monitoring notices and recommendations always in the light of the daily developments for business decisions, which we are unable to ascertain in detail.

KSV1870 Rating

Using its unique database, and backed by over 150 years of experience as an association for the protection of creditors, KSV 1870 has successfully been developing quality, reliable measurement methods and ratings for the forward-looking assessment of personal and corporate credit worthiness. Depending on the data available, various statistical models can be applied.

CompanyScore model: This model can be used when researched data is available. Time series track the developments; depending on the legal form of the company, balance sheet data may be available. Information on the payment track record, debt collection data, etc. are likewise taken into account and assessments by the information experts are given particular attention.

StartupScore model: This model is used when the company is less than 12 months old and no extensive data is available yet. General information on the persons of economic relevance in the company as well as the line of business, legal form, etc.

BasicScore model: This model is used when basic data on the corporate structure is available; data updates are continuously fed into the business database. If available, debt collection cases, bankruptcies and current balance sheet are taken into account.

Rating class	000	100-199	200-299	300-399	400-499	500-599	600-699	700
Risk	no current calculation	no risk	very modest risk	modest risk	increased risk	high risk	very high risk	insolvency indicators
Probability of insolvency		from 0.01 % up	from 0.03 % up	from 0.18 % up	from 1.15 % up	from 7.11 % up	from 33.51 % up	
Explanation (company score) basic score and new starter score)	probability of default is not calculable	a default is not probable	very modest probability of default	default probability of default	above- average probability of default	high probability of default	very high probability of default	

Data sources

The data is automatically processed on the day it becomes available; furthermore, information experts carries out research across Austria. On a case by case basis, the following sources are used as required.

Ongoing or automated processing:
- Company Register and business license data
- balance sheet data
- data collection data
- insolvency information
- report monitoring
- and lots more

Manual or ad-hoc processing:
- the company's self-disclosure
- reference information from suppliers and business partners
- bank information pursuant to sec. 38(2)(6)
- land register data
- and lots more
- etc.

Last revision: On this date the KSV1870 has last checked the respective company. Irrespective of this date, KSV1870 insolvencies, KSV1870 debt collection data and changes in the companies' house are updated on a daily basis.

KSV1870

KSV1870 evaluation and individual maximum credit

We use the KSV1870 rating models to determine the future risk of a business relationship. However, in no case can we guarantee or pledge that the assessment we provide will actually occur in each individual case.

Individual maximum credit is the amount that we establish as the maximum exposure of each supplier. KSV1870 should in no case be considered a credit insurance company. Therefore, KSV1870 cannot be held liable in the event of payment difficulties, non-payment or payment default at a later point in time. The entrepreneur has sole discretion when deciding whether to extend credit for deliveries and services in an amount up to or in excess of the individual maximum credit is and KSV1870 can in no case be held liable.

WebRisk Indicator

The WebRisk Indicator measures IT security of a company's website but does not guarantee any specific assurance on an organisational level. This indicator is designed as a selection tool for CyberRisk Rating candidates within a given supplier base. It is recognised as a first step towards demonstration of compliance with the NIS act (NISG) and related regulations.

A blue WebRisk Indicator means that no signs of elevated IT security risks were identified within the assessment criteria listed below. A purple or red WebRisk Indicator means that one or multiple assessment criteria have not been met. In this case, an in-depth analysis of the company using a full-scale CyberRisk Rating is recommended.

Neither KSV1870 Information GmbH nor KSV1870 Nimbusec GmbH accept liability for IT security incidents and any damage that may occur as a result of entering into business relations with a company that has undergone an assessment.

	No rating	Excellent	Moderate	Infected
Risk		Low risk	Moderate risk	High risk
Description	No website available.	The website complies with security standards	The website does not reflect full compliance with security standards.	The website is infected with malware.

Assessment criteria:

1. Indicators of IT security incidents
    a) Malware distribution
    b) Defacements

2. Indicators of encryption quality
    a) SSL cipher suite
    b) SSL validity
    c) SSL host name
    d) SSL trust level

3. Effective use of incident mitigation tools
    a) Security header implementation

4. Indicators of domain reputation
    a) Blacklisting of own domains
    b) Blacklisting of third-party domains that own domains link to

N.B.: The WebRisk Indicator does not impact the KSV1870 Rating.

CyberRisk Rating: If you plan to grant this company access to your IT systems or digital data, we recommend an in-depth analysis using a CyberRisk Rating. Learn more at: www.cyberrisk-rating.at/beantragen

KSV1870 notation

To ensure the service and timeliness of data and uniform quality of search results, hyphens with double names are dispensed with. Double names are to be read as written with a hyphen.
