

New Water Supply Unit (WSU2)

Dear Colleagues,

We are pleased to announce the availability of the new Water Supply Unit (WSU2) from Filer Europe GmbH, which is suitable for use with **cobas c 111** analyzer, **cobas e 411** analyzer, **COBAS INTEGRA® 400** plus analyzer, **cobas t 511** & **cobas t 711** coagulation analyzers and **cobas® 6500** urine analyzer series.

The previous WSU (Material No.: 06472869001) is discontinued.

The WSU2 can deliver up to 60 liters of deionized water per hour. It is service free and easy to operate. The conductivity and microorganism level of the supplied water are <1 mS/cm & <100 cfu/ml respectively, which meets the aforementioned instruments' specification. For information on product features, installation & support, please refer to <http://filer.de/ws2>.
