

TERVALON

TERVALON is a braided, polyester suture material with a special coating, which guarantees effortless tissue passage and excellent knot-tying characteristics.

The extreme tensile strength and tissue compatibility are further positive characteristics of Tervalon, which is used in all areas of surgery due to its favourable features.

Tervalon is applicable wherever non-absorbability and low-friction passage through tissues are needed.

The suture elicits a minimal inflammatory reaction in tissues, which is followed by gradual encapsulation of the suture by fibrous connective tissue.

Non-absorbable - Tervalon

Indication: Cardiovascular, Plastic, Reconstructive and General surgery.

Contraindication: Tervalon must not penetrate into the inner parts of the digestive and urinary tracts.

Chemical Composition: Polyester

Sizes: 6/0 to 6 USP

Structure: Multifilament

Absorption method: Non-absorbable

Colour: Green and White

TERVALON green ligatures
