## To Whom It May Concern

This letter is to confirm that a BKC-TL5VII centrifuge completed with angle rotor №3 (12\*10 ml) and angle rotor № 4 (12\*15 ml) fulfills the following requirements:

- laboratory centrifuge is used as an instrument for separating serum, plasma, precipitation of proteins, or detection of urinary sediment;
- has minimum rpm of 100;
- has minimum time range 0-99 min. Increment  $\leq 1$  min;
- has automatic lid lock system: lid is locked and protected against opening while in operation;
- has visual and acoustic warnings (unbalance, start/stop, open lid);
- has unbalance detection function;
- has buttons for controlling on/off and lid opening;
- has digital display;
- has a port in the lid for operation checking;
- both angle rotor № 3 (12\*10 ml) and angle rotor № 4 (12\*15 ml) are compatible with the tubes of the following dimensions: 17 mm (diameter)\*102 mm (length).
