

GI Procedure Products

PROCEDURE Promoting patient safety and supporting infection control guidelines is at the forefront of infection prevention. STERIS innovates infection control products designed to improve patient outcomes, while increasing procedural efficiency.

PROCEDURE

As a leader in infection prevention, our extensive portfolio features a variety of single-use products.

PROCEDURE EQUIPMENT

ENDO STRATUS™ CO₂ Insufflator

- A carbon dioxide pumping system that connects to both wall and tank sources
- Provides warmed CO₂ to aid in patient comfort
- Offers low, medium, and high flow settings allowing the user to choose the flow rate needed based on the type of procedure

ENDO STRATUS™ Irrigation Pump

- Delivers warm water for irrigation and procedural visibility
- Offers automatic prime button to provide instant irrigation upon foot pedal depression
- Allows for irrigation through auxiliary water jet or biopsy channel tubing and connectors

PROCEDURE KITS

ENDO CARRY-ON™ Procedure Kits

- Standardize Infection Control practices
- Streamline ordering and procedure room setup

ENDO CARRY-ON™ Custom Procedure Kits

- Allows you to select the products and quantities that best accommodate your specific needs.
- Create your own kit from our list of over 50 components including several of our leading infection control products.

VALVES

DEFENDO™ Single-Use Valves and Cleaning Adapter

- Provides an alternative option to manual cleaning of reusable valves and adapters
- Support industry guidelines; traceability not required
- Available in multiple kit configurations based on endoscope compatibility
- Cleaning adapter flushes the endoscope's air channel with water, preparing it for reprocessing

TUBING

ENDO SMARTCAP™ Irrigation Tubing and ENDOGATOR™ Irrigation Tubing

- Disposable, 24-hour use option that provides alternative to reprocessing reusable water bottle systems
- ENDO SMARTCAP Tubing allows clinicians to use either room air or CO₂ insufflation
- ENDOGATOR Tubing works in conjunction with the ENDOGATOR Connectors offering integration with a variety of irrigation pumps

ENDO GATOR™ Hybrid Tubing

- Utilizing a single water bottle for dual function, the ENDOGATOR Hybrid Tubing is an innovative system combining the ENDO SMARTCAP Tubing and ENDOGATOR Tubing into one

INNOVATION FOCUSED

We continue to innovate to bring our Customers the infection prevention resources needed to protect their patients and staff.

- Our research and development team is constantly working to better understand all the available valve options on the market and to create valves that offer solutions to unmet clinical needs.
- Our verification testing includes multiple tests for force and suction to help create valves that don't exhibit some of the common issues with reusable and other single-use valves: clogging, sticking and loss of insufflation.
