DATE: 01 August 2021

To Whom It May Concern,

This is to certify that the company MST CONSTRUCTION EQUIPMENT YATIRIM A.Ş. is the manufacturer of Backhoe loader model M642 PLUS and M644 Plus, according to the tests made upon the Backhoe loader M642 PLUS with the 4 cilinders diesel engine Perkins 1104D-44TA TIER IIIA, the average results of the fuel consumption tests were made in 3 different phases (Transport, Excavation, Loading/unloading). The test results are as fallows:

1. Transport: 10,00 liter per working-hour
2. Excavation: 6,10 liter per working-hour
3. Loading/unloading with front loader: 8,10 liter per working hour

Note* The fuel consumption tests were made at @2200 rpm and these indicators have average values doe to other external factors like air temperature, chemical component of diesel, soil density, and other.
