# silk+

the original  
flow diverter

# silk<sup>+</sup>

Combining reliability & effectiveness<sup>1</sup>

Designed for the treatment of intracranial aneurysms in association with embolization coils

# 82%

occlusion rate at 12 months<sup>1</sup>

aneurysm treatment

- Adequate behaviour even in distal & tortuous anatomy

**Flexibility**  
thanks to the nickel titanium materials

**Conformability**  
given by the sliding-cell technology

**Smooth wall apposition**  
as a result of the rounded short flared ends

**Navigability**  
with VASCO+21 low profile delivery microcatheter

- Aneurysm exclusion & vessel wall reconstruction

**Flow diversion & neck coverage**  
provided by 48 dense braided wires

**Precise & controlled deployment**

**Visibility**  
four helicoidal markers on the entire body of the stent & border effect

**Resheathability**  
up to 90% deployed

# 0%

morbidity and mortality<sup>1</sup>
