

# PMKN4020 (PMKN4020\_) — Remote Mount Cable, 10 m

Motorola TETRA mobile installation accessory . Generated 2026-03-05

## Overview

PMKN4020 is a **10 metre remote-mount cable** used in remote mount configurations to separate the mobile transceiver from the control head (for example, for trunk/boot mounting).

## Key specifications

| Parameter   | Value   |
|-------------|---|
| Part number | PMKN4020 (often shown as PMKN4020_ or PMKN4020A)      |
| Type        | Remote mount cable (control head ↔ radio transceiver) |
| Length      | 10 m  |
| Use case    | Remote mount / motorcycle mount configurations        |

## Compatibility notes

Listed in Motorola accessory documentation for TETRA mobile terminals (for example MTM5400/MTM800 FuG), and in MTM5000-series accessories catalogues as a 10 m remote mount cable compatible with remote/motorcycle mount.

## Sources (public)

- MTM5400 / MTM800 FuG TETRA Terminal Accessory Leaflet (doc 68015000182-A, as hosted online).
- Motorola MTM5000-series TETRA accessories catalogue entry showing PMKN4020 as Remote Mount Cable 10 m.
- Commercial product listing describing function (connects control head to radio).

Note: Motorola part numbers may appear with a trailing underscore (\_) or revision letter (e.g., "A"). These typically indicate a revision/variant; verify the exact suffix required for ordering.
