Profile

- Commercial pilot in my own flight company between 1994 and 2018. Mainly working in distribution vaccine baits against rabies and classical swine fever and deworming baits against the fox tape worm in some few hundred campaigns.
- Inventing and developing a documentation system to record each distributed bait electronically in 1993. This system was the first documentation system worldwide.
- Inventing and developing the first fully automatic bait distribution system in 1994. This system is meanwhile used in most European countries where baits against rabies are distributed.
- Inventing and developing different types of software for visualizing geo data on electronic maps and processing of geo data between 1993 and 2021
- Inventing and developing an online-transmission-system to send geo data of distributed baits in real time to a server during the flight in 2012
- Inventing a new type of control unit in 2018 which allows the use of the automatic bait distribution system also in high speed airplanes.
