

DESIGNING A HAND PROTECTION FUTURE

We offer a wide range of high-quality natural latex and nitrile examination gloves

as well as general-purpose disposable gloves, both powdered and powder-free, catering to a wide variety of applications, including healthcare and medical, food processing, food handling, manufacturing and operations where hygiene standards come first.

LATEX POWDERED

Latex Powdered has been part of our life for more than 100 years.

It was one of the life-changing innovations that still deliver the touch of life to people around the world today.

Today latex gloves have been improved compared to when they were first produced. STGT takes pride in our knowledge and R&D in latex raw materials as well as experience in gloves production. We deliver the most comfortable gloves that remain effective in order to carry on this legacy and offer the "Touch Of Life" on a global scale.
