

CATALOGUE OF LOW PROTEIN PRODUCTS

HARIFEN

HARIFEN products are perfectly integrated into the hypoprotein diets needed for people suffering from diseases related to protein metabolism [Phenylketonuria, Chronic renal failure, Liver failure and other metabolism disorders (methylmalonic aciduria, citrullinemia, tyrosinemia, etc.)]

They are made with raw materials that by nature do not contain gluten so they are tolerated by celiacs; they are free of milk, egg and soya, and many of them are low in sodium, potassium and phosphorus.

Protein restriction diets incorporating HARIFEN must be monitored by the doctor, nutritionist or dietitian.
