Annex 2: Scope of Service (Shelter Repair Implementation & Technical Description)
Light to Medium Shelter Repairs – North and South Moldova
(Based on ITB-MOL-CO-25-001)

Project Overview

In Moldova, many displaced people from Ukraine and vulnerable host communities are facing multifaceted Shelter, Water Sanitation and Hygiene (WASH), and Energy needs. One of the most prevalent causes is substandard rural housing; including conditions such as poor structural integrity, inadequate thermal insulation, and deteriorating fixtures and fittings.

NRC Moldova is planning to conduct a project for light to medium shelter repairs in rural areas in northern Moldova. The project aims to increase dignity and enhance living conditions for affected populations (displaced people from Ukraine and Vulnerable Moldovan) with a specific focus on key elements such as windows, doors, thermal insulation and WASH (Water Sanitation and Hygiene) facilities. Additionally, improve/upgrade to household energy systems will be a key priority, specifically household heating infrastructure and devices, as well as energy efficiency upgrades, ensuring security of tenure, reducing debt, allowing families to meet other needs, and considering accessibility, affordability, safety, and protection.

One of the objectives of this project is to provide timely, dignified and appropriate assistance to vulnerable households through the execution of light and medium repairs of the selected shelters in North and South rayons of Republic of Moldova

Scope of work

Works will be mainly directly related to Shelter interventions in the housing units assessed by the NRC Shelter team and identified as eligible for categories of repair and rehabilitation works. Eligible housing units may include both individual houses and apartments in multi-Storey buildings.

Quantities

Purchase orders issued by NRC will request the execution of the works listed in Annex A in batches of housing units ranging from 10 to 20. NRC will provide BoQ for each separate shelter, which will specify exact quantities per each type of works / materials.

Performance standards

Performance standards for shelter repairs, should be comprehensive and aligned with the project's objectives.

a. Quality of the works:

All repair and construction works must meet established industry standards and adhere to relevant building codes and regulations.

Materials used should be of an EU quality accompanied by quality confirmatory documents.

Adherence to project timelines is crucial. Contractors must complete the specified tasks within the agreed-upon timeframe.

Delays should be communicated promptly with valid reasons, and efforts to recover lost time should be demonstrated.

b. Safety Standards:

Implement robust safety measures to ensure the well-being of the beneficiaries and their families, as well as the workers, site visitors, and the general public.

Compliance with occupational health and safety regulations and guidelines.

Compliance with Specifications:

Strict adherence to the project scope of work, including technical specifications and requirements outlined in the contract.

Any deviations or modifications should be communicated and approved by the NRC.

c. Documentation and Reporting:

Thorough documentation of all project activities, including daily logs, progress reports, and any changes to the approved plan.

Regularly report to the NRC on project status, milestones achieved, and any challenges encountered.

d. Environmental Compliance:

Implementation of environmentally sustainable practices, including waste management and minimizing ecological impact.

Compliance with environmental regulations and guidelines.

Note:

The prices for the construction works are to be calculated based on the resource method used in Moldova, according to the construction rule CP L.01.01-2012 "Instructions for the preparation of cost estimates for construction and assembly works using the resource method".

The following components must be included in the offered prices of the works:

1. Labor force
2. Materials
3. Construction equipment
4. Contributions to the social fund
5. Material transport costs
6. Overheads
7. Cost estimate Benefit

The included price contains all related expenses for the preparation of the work site, as well as the expenses for the health and safety conditions for the employees and the beneficiary, the environmental protection costs.

The labour prices were calculated according to the Amendment to the norm CPL.01.02:2012/A2:2022 'Instructions for the determination of estimate expenses for the construction payroll', and the prices for construction materials and equipment were calculated as market averages.

As positions of works in the specifications are used those from the Indicators of Estimate Norms, but they adjusted so as to reflect as accurately as possible the required resources and the real costs of the works. Bidders are also urged to make adjustments to include all actual expenses they will incur with the respective works.
