

## CRACK DETECTOR CLEANER SPRAY

**EN**

### Product identification

Part numbers:

WP22030 – CRACK DET.SPRAY CLEANER 400ml

### Description & Applications

CRACK DETECTOR SPRAY CLEANER (Metaclean) is a degreaser and cleaner spray for metals. It removes any kind of dirt present on the metal: oil spots, grease spots, encrustations, tar, carbon residues and glues. It quickly evaporates without leaving grease residues. It is indicated also for stainless steel, aluminium.

Odourless, colourless. Rapid evaporation

#### Instructions for use:

Shake well the can before use.

Spray the CRACK DETECTOR SPRAY CLEANER (Metaclean) on the workpiece to be treated.

Clean the workpiece with a cloth or compressed air

For professional use only.

#### Other Specifications:

Base	Mixture of solvents and degreasers with low superficial tension
Propellant	Denatured Hydrocarbon, odourless and non-toxic.
Appearance	TRANSPARENT liquid
Odour	Odourless

#### Note

The date marked on the product is the production date. This product does not expire.

The recommended use is within 5 years from the production date as the propellant could lose effectiveness.
