

Experience Summary

Mr. Nicu Druta is an IT Technician with over 14 years of experience supporting mission-critical communication and data infrastructure in high-security environments, including nuclear facilities, military and law enforcement networks, governmental institutions, ISP infrastructure, and data centers.

He has extensive experience operating under strict access control, compliance, and audit requirements, supporting secure IT operations, incident handling, and system integrity. His current focus is on IT operations and cybersecurity, including system monitoring, access management, and implementation of security best practices.

Training and Certifications

- VCA Full (Veiligheid, Gezondheid en Milieu Checklist Aannemers)
- BA5 – Elia Authorized Electrical Personnel
- IRATA (Industrial Rope Access Trade Association)
- GWO (Global Wind Organisation) Certification
- Cherry Picker & Scissor Lift (IS-005)
- Driving License: B, C

Professional Experience

Mr. Druta has extensive experience supporting secure IT operations and infrastructure in high-security and regulated environments. His work includes system monitoring, access control management, cybersecurity support, and ensuring compliance with strict operational and audit requirements. He has also led teams and coordinated technical activities in electrical and data infrastructure projects.

KVG LLC, Chisinau, Republic of Moldova

IT Technician (Cybersecurity Focus)

Start Date – Present

- Provide IT technical support for systems, users, and network infrastructure
- Monitor system security, identify vulnerabilities, and escalate incidents
- Manage user access, permissions, and device configurations in line with security policies

Relevant Experience and Skills

- IT Operations & Technical Support in secure environments
- Cybersecurity Support: system monitoring, vulnerability identification, incident escalation
- Access Control & User Management in compliance-driven environments
- Experience in high-security facilities (nuclear, military, law enforcement, ISP, data centers)
- Documentation & Audit Support: incident reporting, traceability, compliance records
- Risk Awareness & Security Protocol Enforcement in mission-critical systems
- Infrastructure Support: networks, communication systems, and IT environments
- Team Leadership & Site Coordination (electrical & data infrastructure)
- Safety-Critical Operations (certified for high-risk industrial environments)

- Support implementation of cybersecurity best practices, including system hardening and access control
- Maintain documentation for IT procedures, incidents, and system changes for audit and compliance
- Collaborate with internal teams to ensure secure and reliable IT operations

Neotec BV, Kontich, Belgium
