

Surgical Product Catalog

The background of the cover is a close-up photograph of a surgical procedure. It shows a gloved hand holding a surgical instrument, with a patient's skin visible. Overlaid on this image are several semi-transparent blue geometric shapes: a large circle on the left, a horizontal bar across the top right, and a vertical bar on the right side. The overall color palette is dominated by light blues and whites, giving it a clean, clinical appearance.

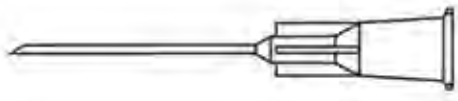

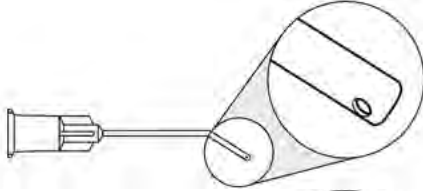

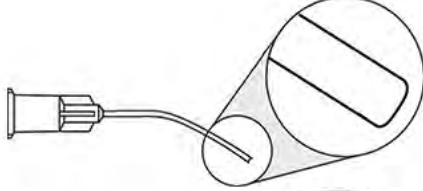

Cannulas & Cystotomes

A decorative horizontal bar with a blue gradient, transitioning from a darker blue on the left to a lighter blue on the right.

Femtosecond Cannula [Solomon]		
30 gauge hydrodissector, angled shaft, 7mm from bend to tip, sandblasted, oval-shaped tip. Disposable, sold 10 per box.		
AXI5227	Femtosecond Cannula	
Brody Femtosecond Dissecting Cannula		
The Brody Femtosecond Dissecting Cannula for laser-assisted cataract surgery is a disposable 25 gauge stainless steel cannula that both easily opens laser incisions and allows for fast, efficient injection of intraocular lidocaine and/or viscoelastic. This elegant device is placed either on a TB syringe filled with lidocaine or directly on the viscoelastic syringe (for those not using intraocular anesthetic). The shovel-like tip allows for easy and safe opening of both the sideport and the main incision. Single-use design removes the need for sterilization. Combination of spatula and cannula reduces the number of instrument hand-offs between scrub tech and surgeon, saving time and improving efficiency. Unique tip design with 25 gauge width reduces wound stretching when compared to other laser incision instrumentation.		
AX2000I	Femtosecond Dissecting Cannula Sold 10 per box.	
AX2000I-BULK	Femtosecond Dissecting Cannula Sold 100 per bag.	
AccuDrop Cannula		
AccuDrop is Accutome's dropleless therapy cannula. It was designed by Accutome for administration of dropleless cataract drug formulation. The AccuDrop Cannula is a blunt tip cannula that is designed to reduce zonular trauma. Sideport opening allows for gentle drug dispersion. Angled 90 degree shaft facilitates easier insertion into the anterior chamber to make a targeted drug delivery. Disposable, sold 10 per box.
