Forlong Medical Co., Ltd

CERTIFICATES

COMPANY PROFILE

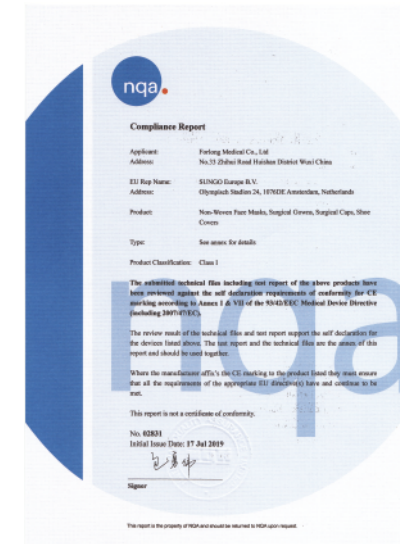

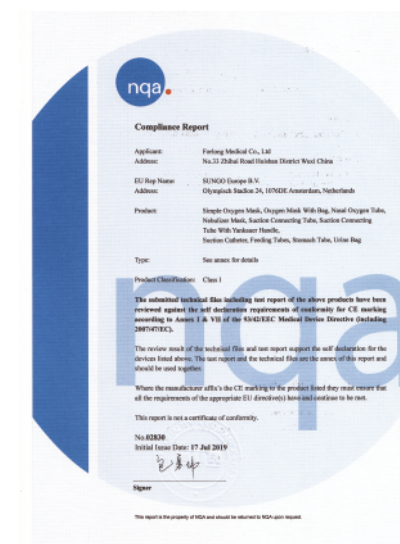

FORLONG medical is a company with 10-year experience in the medical device industry. Since the foundation in 2010 FORLONG has surmounted a variety of business, trading and economic upheavals in becoming the market leader in healthcare distribution in the world.

FORLONG offers a wide range of products including dressings, medical clothing, disposable medical devices for urology, gynecology, oxygen therapy and many other items. The company is still extending its product list in order to meet new market needs.

What distinguishes FORLONG from the competitors is strong ethics and continuous search for new solutions. In order to meet our clients' expectations, we are constantly reviewing our product range. All of our devices are selected very carefully with great attention paid to current needs, quality convenient availability. The company has the pleasure to cooperate with highly qualified health care specialists, who share with us their expertise and understanding of the latest trends in clinical practice.

We offer products under our own brand. Our team believe that maintaining fair and reliable relationships with our international partners is the key to turn a business opportunity into a major success story, therefore we regularly visit our customers and suppliers and handle challenges together.

Our mission, strategies and comprehensiveness guarantee successful and satisfactory cooperation.

BASIC MEDICAL DEVICES pp. 1-18

- 3 • OXYGEN THERAPY
- 4 • Oxygen mask with tubing
- 5 • Nebulizer mask
- 6 • Non-rebreather mask with tubing
- 7 • Multi-ven mask
- 8 • Nasal oxygen cannula
- 9 • silicone manual resuscitator

- 10 • ANAESTHESIA PRODUCTS
- 11 • Laryngeal mask silicone
- 12 • Laryngeal mask PVC
- 13 • endotracheal tube uncuffed
- 14 • endotracheal tube cuffed
- 15 • reinforced endotracheal tube cuffed
- 16 • dual-limb breathing circuit
- 17 • oropharyngeal airway/guedel airway
- 18 • air cushion anesthetic mask

UROLOGICAL CATHETERS AND URINE BAGS 19-27

- 20 • foley catheter 2-way silicone-coated latex
- 21 • foley catheter 3-way silicone-coated latex
- 22 • Foley Catheter 2-way 100% silicone
- 23 • Foley Catheter 3-way 100% silicone
- 24 • Nelaton catheter
- 25 • Urine bag
- 26 • Luxury urine bag with sample porting
- 27 • Urine bag with samport 2W

BASIC DISPOSABLE EQUIPMENT p.p 28-38

- 29 • Injection needle
- 30 • Single-use syringe 3-part
- 31 • Single-use syringe 2-part
- 32 • tuberculin syringe
- 33 • insulin syringe
- 34 • Single-use catheter syringes 3-part
- 35 • vaginal speculum
- 36 • SoftGrip Umbilical Cord Clamp
- 37 • cervical brush standard
- 38 • cervical brush special

INFUSION THERAPY 39-45

- 40 • EasyFLOW infusion set
- 41 • EasyFLOW blood transfusion set
- 42 • 3-way stopcock
- 43 • 3-way stop cock with extension tube
- 44 • IV cannula with injection valve
- 45 • DEHP-free

GENERAL SURGERY 46-51

- 47 • Surgical suction tube
- 49 • Surgical suction set
- 50 • Yankauer surgical suction cannula
- 51 • Suction catheter with vacuum control

MEDICAL DRESSINGS pp. 52-53

TRADITIONAL DRESSING MATERIALS 54-66

- 55 • Dressing gauze
- 55 • Gauze roll
- 56 • Gauze swabs
- 58 • Sterile gauze swabs
- 58 • Gauze lap sponge
- 60 • W.O.W gauze bandages
- 61 • Gauze ball
- 62 • Non-woven swabs
- 63 • Non-woven swab NONVI with Y-incision
- 64 • Cotton wool roll
- 65 • Zig-zag cotton wool
- 66 • Cotton ball

STABILIZING DRESSINGS 67-76

- 68 • Plaster of paris bandages
- 70 • Orthopedic cast padding
- 71 • Triangular sling
- 72 • Elastic tubular net bandage
- 73 • Crepe bandage
- 74 • High elastic bandage
- 75 • Conforming(PBT)bandage
- 76 • Non-woven cohesive elastic bandage

ADHESIVE TAPES AND PLASTERS WITH DRESSING 77-90

- 78 • Adhesive fabric tape
- 78 • Adhesive non-woven tape
- 79 • Adhesive silk tape
- 79 • Adhesive PE tape
- 80 • Adhesive perforated non-woven tape
- 81 • Fabric plaster with dressing
- 82 • Perforated Zinc Oxide Plaster
- 84 • adhesive non-woven dressing tape
- 86 • non-woven dressing with absorbent pad
- 87 • non-woven IV cannula dressing
- 88 • Non-woven eye dressing with absorbent pad
- 89 • paraffin gauze dressing
- 90 • Alcohol swabs

MEDICAL CLOTHING PP. 91-101

- 93 • Medical gown with elastic cuff
- 94 • Medical gown with knitted cuff
- 95 • Medical bouffant cap non-woven
- 96 • Medical Face Mask
- 97 • Shoe covers
- 98 • Surgical gown

OTHER PRODUCTS PP. 102-106

- 102 • automatic tourniquet
- 102 • Basic stethoscopes single-head
- 103 • Basic stethoscopes dual-head
- 103 • Sprague Rappaport stethoscope
- 103 • Premium stethoscope dual-head stainless steel
- 104 • Cardiology stethoscopes
- 104 • Dial blood pressure monitor for upperarm blood pressure monitoring
- 105 • wooden tongue depressor
- 105 • microscope slides
- 106 • PE apron non-sterile
- 106 • Electronic thermometer

Basic medical devices

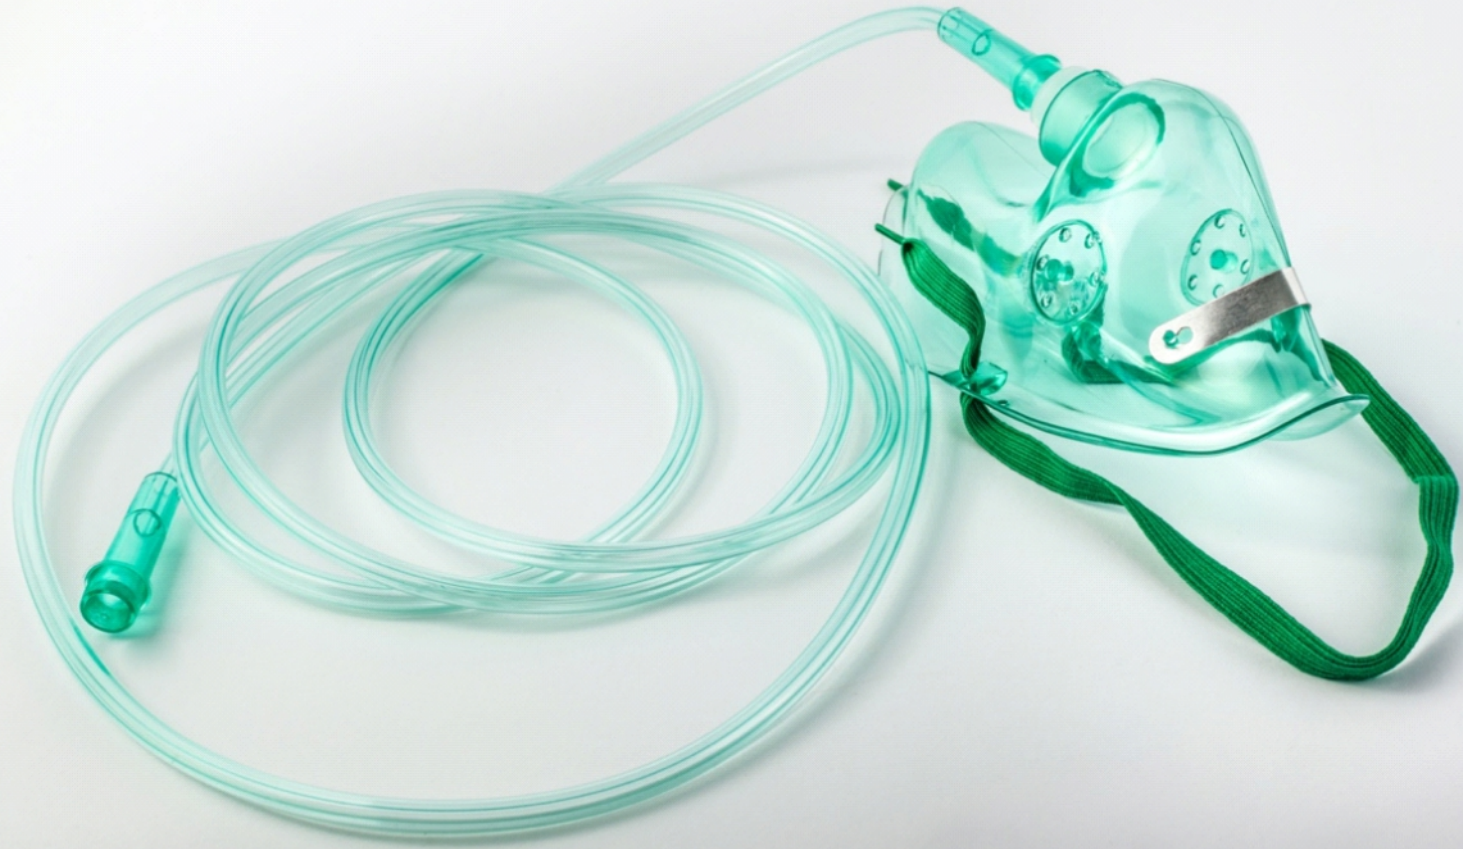

FORLONG prides itself with a long-lasting experience gained in the medical industry being a leading supplier of single use medical devices.

A wide range of products and complex solutions make it possible to successfully respond to our customer' needs and meet their expectations.

High standards of designs, production, storing and transportation allows to maintain quality, safety and comfort of use to both the medical personnel and patients.

A wide range of single use products include basic medical devices and those dedicated to specialized procedures.

FORLONG branded products find a wide application in urology, gynecology, oxygen and fluid therapy and others. They make it possible to perform medical procedures including patient diagnostics, prophylaxis, treatment and care.

OXYGEN THERAPY

Oxygen Mask

features

- made of transparent, non-toxic PVC
- adjustable nose metal plate and rubber fastening
- equipped with a 210 cm (+/- 5%) long tubing with universal connectors
- tubing with star cross-section that is resistant to bending
- revolving connector that allows adjusting to patient's position
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- designed to deliver oxygen with precise regulation of concentration, for medium oxygen concentration

Ref No.	Length of tubing	Size	Bulk packaging
OMS	210 cm +/- 5%	S	100 x 1 pc
OMM	210 cm +/- 5%	M	100 x 1 pc
OML	210 cm +/- 5%	L	100 x 1 pc
OMXL	210 cm +/- 5%	XL	100 x 1 pc

Nebulizer Mask

features

- made of transparent, non-toxic PVC
- adjustable nose metal plate and rubber fastening
- equipped with a 210 cm (+/- 5%) long tubing with universal connectors
- tubing with star cross-section that is resistant to bending
- 8 ml nebulizer (graduated every 1 ml)
- average size of the molecule at a flow of 6l / min - 3,23 µm
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- for producing aerosol containing a comminuted medicine, that can be delivered directly to the respiratory system
- as the patient breathes

Ref No.	Length of tubin	Size	Bulk packaging
NMS	210 cm +/- 5%	S	100 x 1 pc
NMM	210 cm +/- 5%	M	100 x 1 pc
NML	210 cm +/- 5%	L	100 x 1 pc
NMXL	210 cm +/- 5%	XL	100 x 1 pc

non-rebreather mask with tubing, sterile

features

- made of transparent, non-toxic PVC
- adjustable nose metal plate and rubber fastening
- equipped with a 210 cm (+/- 5%) long tubing with universal connectors
- tubing with star cross-section that is resistant to bending
- 1000 ml oxygen reservoir
- revolving connector that allows adjusting to patient' s position
- silicone valves on the connector and ventilation openings
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- designed to deliver oxygen with precise regulation of concentration, for high oxygen concentration

Ref No.	Length of tubing	Size	Bulk packaging
NOMS	210 cm +/- 5%	S	100 x 1 pc
NOMM	210 cm +/- 5%	M	100 x 1 pc
NOML	210 cm +/- 5%	L	100 x 1 pc
NOMXL	210 cm +/- 5%	XL	100 x 1 pc

Multi-vent Mask

features

- Made of transparent, non-toxic PVC
- Latex-free
- Adjustable nose metal plate and rubber fastening
- Equipped with a 210cm±5% long tube with universal connectors
- Equipment with 2 jets-white to set mid flow concentration (35% 40% and 50%) and green to set low concentration (24% 28% and 30%)
- EO sterilized
- Individual PE package with instruction manual inside

indication

- designed to deliver oxygen with precise regulation of concentration, regardless of way of patient's breathing

Ref No.	Length of tubing	Size	Bulk packaging
MUML	210 cm +/- 5%	L	100 x 1 pc
MUMXL	210 cm +/- 5%	XL	100 x 1 pc

Nasal oxygen cannula

features

- Made of medical grade PVC
- Very soft tips with smooth edges
- Fastening under the chin with a soft, sliding adjustment ring
- Various spacing of the nasal parts of the cannula depending on the size
- Universal connector compatible with any source of oxygen
- Available in 3 sized: for adults, for Children and infants
- With 140cm 200cm 300cm and 500cm tubes
- Latex free
- EO sterilized
- Individual PE package with instruction manual inside

indication

- designed to deliver oxygen through the nose

Ref No.	Length of tubing	purpose	Intermediate packaging	Bulk packaging
CTNN200	200 cm	For infants	1 pc	100 x1 pc
CTNZ200	200 cm	For children	1 pc	100 x 1 pc
CTND140	140 cm	For adults	1 pc	100 x 1 pc
CTND200	200 cm	For adults	1 pc	100 x 1 pc
CTND300	300 cm	For adults	1 pc	100 x 1 pc
CTND500	500 cm	For adults	1 pc	100 x 1 pc

silicone manual resuscitator

features

- Standard with air bag, silicone mask, oxygen tube.
- 100% medical grade silicone,
- latex-free;
- liquid material is softer, more resilient, higher transparency;
- can be reused by high temperature sterilization.
- set 60cm H₂O safety pressure limiting valve.
- Integral intake valve design, direct connection of air storage bag and oxygen tube.
- In addition to oxygen tubes, air bags and optional mouthpieces, oropharyngeal airway accessories, spheres, masks, and PC attachments can be sterilized at a high temperature of 134°C and can be reused.
- Use by a single patient.
- The non-slip effect of the rough surface of the recovery balloon can give the rescuer good operability.

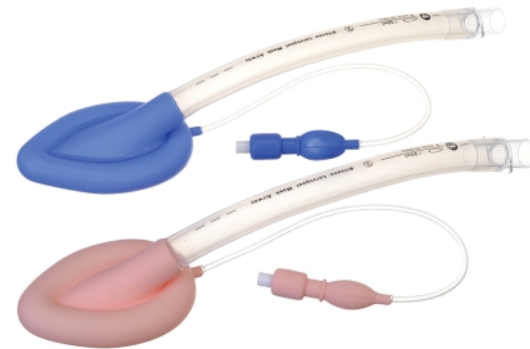

ANAESTHESIA PRODUCTS

laryngeal mask silicone sterile

features

- made of biocompatible silicone, which ensures excellent flexibility of the device
- elastic mask body with description (size, cuff volume, suggested patient' s weight)
- elliptic shape, flexible sealing cuff and universal, transparent connector: 15 mm
- single-use
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- device inserted through the mouth, up to the back of the throat, forms a seal at the top of the glottis in order to:
 - direct protecting the patient' s airway patency
 - artificial ventilation also during cardiopulmonary resuscitation
 - maintaining airway patency in: short-term surgical procedures, without the need of muscles relaxation, when endotracheal intubation is not necessary and under anesthesia for diagnostic procedures

Ref No.	Size	Weight of patient	Max. inflation	Intermediate packaging
LMS10	1	≤ 5 kg	4 ml	10 pcs
LMS15	1.5	5-10 kg	7 ml	10 pcs
LMS20	2	10-20 kg	10 ml	10 pcs
LMS25	2.5	20-30 kg	14 ml	10 pcs
LMS30	3	30-50 kg	20 ml	10 pcs
LMS40	4	50-70 kg	30 ml	10 pcs
LMS50	5	70-100 kg	40 ml	10 pcs

laryngeal mask PVC sterile

features

- made of medical PVC
- elastic mask body with description (size, cuff volume, suggested patient' s weight)
- elliptic shape, flexible sealing cuff and universal, transparent connector: 15 mm
- colour-coded valve protection makes it easy to quickly recognize size
- version with syringe and with lubricant contains in the packaging:
- lubricant (methylsilicone oil), which allows the outer surface of the cuff to be moisturized before insertion
- bypacked luer syringe, which allows the cuff to be filled with the minimum amount of air required to ensure an effective seal
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./rigid blister

indication

- device inserted through the mouth, up to the back of the throat, forms a seal at the top of the glottis in order to:
 - direct protecting the patient' s airway patency
 - artificial ventilation also during cardiopulmonary resuscitation
 - maintaining airway patency in: short-term surgical procedures, without the need of muscles relaxation, when endotracheal intubation is not necessary and under anesthesia for diagnostic procedures

LMP50	5	Dark blue	70-100 kg	40 ml	10 pcs

endotracheal tube uncuffed sterile

features

- made of flexible PVC
- radiopaque line over the entire tube length
- equipped with lateral Murphy eye
- graduated every 1 cm
- double depth marker to control the position of the tube
- tube size marked in 3 places (on the connector and in two places on the tube body)
- detachable connector with an outer diameter of 15 mm
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- for both oral and nasal intubation
- inserted into the trachea to prevent airway obstruction and respiratory failure

endotracheal tube cuffed sterile

features

- made of flexible PVC
- equipped with lateral Murphy eye and radiopaque line over the entire tube length
- graduated every 1 cm, double depth marker to control the position of the tube
- low-pressure, high-volume cuff
- tube size marked in 4 places (on the connector, on the pilot balloon and in two places on the tube body)
- detachable connector with an outer diameter of 15 mm
- pilot balloon with LOT and size indication
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- for both oral and nasal intubation
- inserted into the trachea to prevent airway obstruction and respiratory failure

reinforced endotracheal tube cuffed, sterile

features

- made of flexible PVC
- reinforcing within the wall of the entire tube
- equipped with lateral Murphy eye and radiopaque line over the entire tube length
- graduated every 1 cm, double depth marker to control the position of the tube
- tube size marked in 4 places (on the connector, on the pilot balloon and in two places on the tube body)
- detachable connector with an outer diameter of 15 mm
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- for both oral and nasal intubation
- inserted into the trachea to prevent airway obstruction and respiratory failure
- for intubation of the patient in an unusual position, with a high risk of kinking the endotracheal tube

corrugate breathing circuit sterile

features

- made of high quality EVA material, latex-free and phthalate-free
- 15F/22F connector fits compatible products
- expandable version characterized by shape memory
- equipped with latex-free breathing bag: 3l (for adults) or 1l (for children)
- additional expandable tube, length: 100 cm
- elbow with luer-lock port
- single-use
- EO sterilized
- individual packaging: foil

indication

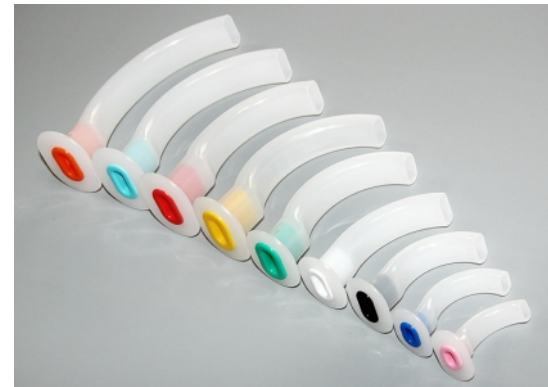

- for patient' s mechanical ventilation
- it enables transporting breathing mixture from equipment (ventilator, anesthesia machine) to respiratory protection device (e.g. tracheal tube, tracheostomy mask) and vice versa

Ref No.	purpose	capacity of bag	bulk packaging
OBWD1601L	For children	1 liter	40 x 1 pc
OBWD1603L	For adults	3 liter	40 x 1 pc

oropharyngeal airway/guedel airway sterile

features

- made of high-quality PE (polyethylene), free of PVC and phthalates
- distinct anatomic curve of the airway helps to create passage to the upper respiratory tract to allow for free flow of anaesthetic gases and air
- colour coded sizes
- numeric marking of the size on the airway
- single-use
- EO sterilized
- individual packaging: foil

indication

- device is used during artificial lung ventilation procedures
- ensure patency of the upper respiratory tract
- increases the effectiveness of the rescue action
- facilitates the stabilization of the endotracheal tube

air cushion anesthetic mask non-sterile

features

- due to the high quality of materials used, ventilation is conducted in an atraumatic and safe way for the patient
- anatomically shaped inflatable cuff, ensures perfect tightness of the mask with minimal pressure
- device, when applied to the face, tightly covers the patient' s mouth and nose without compressing the eyes
- clear shell provides continuous visual observation of the patient
- colour-coded retaining rings, easy for size recognition
- full size range allows to properly choose the size of the mask depending on the age of the patient
- all sizes are equipped with inflatable check valve to adjust air amount for best cushion fitting auto patient' s face
- single-use, non-sterile, latex and DEHP-free
- packaging: 1 pc. /medical foil

indication

- device intended for the administration of a gas mixture coming through devices for artificial ventilation
- enables performing medical procedures including artificial ventilation, administration of anesthetic gas and carrying out emergency treatment, of an unconscious patient

UROLOGICAL CATHETERS AND URINE BAGS

Foley Catheter 2-way, silicone-coated latex, sterile

features

- made of soft and flexible latex, that is resistant to bending and kinking
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- silicone-coated surface that allows atraumatic insertion of the catheter
- easy to fill and to empty, tear-resistant balloon of various capacities
- plastic or rubber valve to ensure balloon tightness
- CH 6, CH 8, CH 10 size has a nylon guide to facilitate catheterization
- contains latex, does not contain phthalates
- single-use
- EO sterilized
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- to drain urine from the bladder

With rubber valve

Foley Catheter

2-way,100% Silicone, Sterile

features

- made of soft and flexible silicone, that reduces the allergic reaction of the mucous membranes and increases the patient' s comfort
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- radiopaque line along the entire length of the catheter
- easy to fill and to empty, tear-resistant balloon of various capacities
- plastic valve to ensure balloon tightness
- CH 6, CH 8, CH 10 size has a nylon guide to facilitate catheterization
- available in version with 10 ml sterile water pre-filled syringe with 10% glycerin to seal the balloon
- separately packed Catheter Spigot inside the packaging
- latex-free, phthalate-free
- single-use
- EO sterilized
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil I

indication

- to drain urine from the bladder
- recommended for patients with blood clots or sediment in their urine otection device (e.g. tracheal tube, tracheostomy mask) and vice versa

foley catheter

3-way, 100% silicone, sterile

features

- made of soft and flexible silicone, that reduces the allergic reaction of the mucous membranes and increases the patient's comfort
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- additional inlet for flushing out the bladder
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- radiopaque line along the entire length of the catheter
- easy to fill and to empty, tear-resistant balloon
- plastic valve to ensure balloon tightness
- separately packed Catheter Spigot inside the packaging
- latex-free, phthalate-free
- single-use
- EO sterilized
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- to drain urine from the bladder
- recommended for patients with blood clots or sediment in their urine

Ref No.	length	balloon	size	color	Intermediate packaging

nelaton catheter

sterile

features

- made of soft and flexible PVC, that is resistant to bending and kinking
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- transparent tube allowing visual inspection of excreted urine
- colour-coded connectors for size recognition, numerical size identification
- on the packaging
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- to drain urine from the bladder

Urine Bag

features

- latex-free 2000 ml bag made of 0,22 mm thick PVC (double wall)
- double sealed PVC for maximum protection against tearing the bag
- effective non-return valve
- tight T-valve, that can be easily operated with one hand
- connecting tubing with universal stepped connector, standard tubing length
- 90 cm and 150 cm
- tubing made of material that is resistant to bending and kinking and which ensures
- a free and effective urine outflow
- precise, easy-to-read scale (every 100 ml), adequate for diuresis measurement
- strengthened holes for hanging, matching standard hangers
- white back wall making urine easy to notice
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./foil

indication

- or 24-hour extracorporeal collection of urine and other body fluids
- maximum time of use - 24 hours

Luxury Urine Bag With sample porting

features

- latex-free 2000 ml bag made of 0,40 mm thick PVC (double wall)
- effective non-return valve
- tight T-valve, that can be easily operated with one hand
- connecting tubing with universal stepped connector, standard tubing
- length 120 cm (other lengths available: 90 cm, 150 cm)
- tubing made of material that is resistant to bending and kinking and which ensures a free and effective urine outflow
- self-tightening port for sample taking
- precise, easy-to-read scale, adequate for diuresis measurement, with high
- measurement accuracy from 25 ml, every 50 ml from 50 ml to 200 ml
- and every 100 ml to 2000 ml
- strengthened holes for hanging, matching standard hangers
- white back wall making urine easy to notice
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- for extracorporeal collection of urine and other body fluids
- maximum time of use - 7 days

urine bag with sample port 2W, sterile

features

- latex-free 2000 ml bag made of medical grade PVC
- white back wall making urine easy to notice
- effective non-return valve
- tight T-valve, that can be easily operated with one hand and which
- can be folded and tucked in a hard sheath
- Pasteur type droplet chamber providing a „dry“ air barrier
- two hydrophobic air filters (in a bag and chamber), which prevent sucking,
- balancing the pressure inside the system
- 120 cm long, large diameter tubing, ensuring a free and effective urinary
- outflow with a universal stepped connector
- self-tightening port for sample taking at the end of tubing
- tubing equipped with a sliding clamp and a fastening pin to stabilize the tubing
- at the place where the tubing connects to the chamber, an additional reinforcing element prevents bending and kinking the tubing
- precise, easy-to-read scale, adequate for diuresis measurement, with high measurement accuracy, every 25 ml from 25 ml to 100 ml and every 100 ml from 100 ml to 2000 ml
- tag to describe the patient' s details and date
- integrated universal hanger system matching the round and square bed rails
- additional fixing with a string
- single use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- device is intended for 14-days urine collection in a closed system

Ref No.	capacity	Length of tubing	Intermediate packaging	Bulk packaging
WM2T2000120	2000 ml	120 cm	10 pcs	5 x 10 pcs

BASIC DISPOSABLE EQUIPMENT

Disposable Injection Needle

features

- sheath and the hub made of polypropylene
- thin walls assure adequate stream pace
- tip sharpened in three surfaces (back cut)
- bevel type: LB/BL standard long bevel
- small injection and sliding force
- surface of the tubes covered with a sliding agent (silicone)
- glued needle elements to prevent their separation (glue - epoxy resin)
- hubs colored in accordance with the ISO code allowing
- fast recognition of the needle size
- latex-free
- DEHP-free
- non-pyrogenic, non-toxic
- EO sterilized
- individual packaging: blister-pack

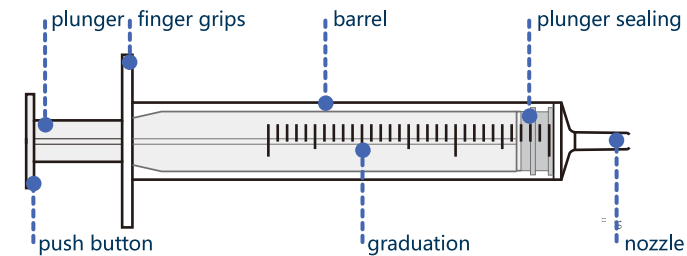

indication

- device designed for intravenous, intramuscular and hypodermic injections

Get To Know Our Syringes

construction of the syringe:

nozzle types:

luer slip, centric
tip of the syringe is pushed into the hub of the needle or other device (e.g. catheters) and twisted. It allows to remove the connection immediately if necessary

catheter tip 90°
type of connection used for rinsing (cleaning) catheters, stomach tubes and feeding purposes

luer slip, eccentric
eccentric location of the tip is used in procedures involving the administration of drugs and fluids where closer proximity to skin is necessary

catheter tip 45°
nozzle cut at 45 degrees increases the lumen surface

luer lock
designed to secure connection between the syringe and the device (needle, tube, catheter, stopcock, etc.). The tip is equipped with thread to screw in the syringe to prevent disconnection

insulin and tuberculin syringes
special design of the plunger seal reduces the drug/liquid residues

duoNEX

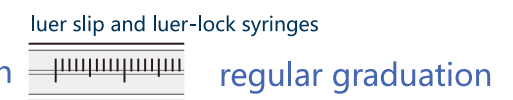

syringe type:

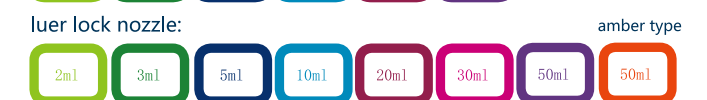

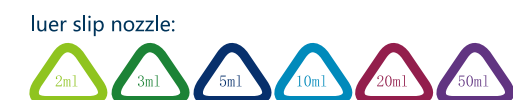

dicoNEX

graduation type:

package colour and shape code:

Single-use Syringe, 3-part

features

- transparent barrel allows full visual control of content
- luer slip/lock
- sealing in the form of double ring on plunger stopper situated
- on the top of plunger
- smooth plunger sliding thanks to rubber sealing
- limitation flange securing against accidental removal of plunger
- clear, legible and permanent black graduation facilitating dosage, adequately:
 - every 0,1 ml for capacity of 2 ml
 - every 0,2 ml for capacity of 3 ml
 - every 0,2 ml for capacity of 5 ml
 - every 0,2 ml for capacity of 10 ml
 - every 0,5 ml for capacity of 20 ml
 - every 1 ml for capacity of 50 ml
- single-use, non-pyrogenic, non-toxic
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- 3-piece syringe intended for drawing up and administering of medicines/liquids to patient and collecting body fluid samples from patient

single-use syringe, 2-part

features

- transparent barrel made of polypropylene allowing perfect visualization of the content
- green contrasting plunger
- luer slip/lock
- smooth plunger sliding
- limitation flange securing against accidental removal of the plunger
- name of the syringe and manufacturer' s logo placed on the barrel
- extended graduation
- clear, legible and permanent black graduation facilitating dosage, adequately:
 - every 0.1 ml for the volume of 2 ml
 - every 0.2 ml for the volume of 5 ml
 - every 0.5 ml for the volume of 10 ml
 - every 1 ml for the volume of 20 ml
- single-use
- non-pyrogenic, non-toxic
- DEHP-free
- latex-free
- EO sterilized
- packaging: 1 pc./blister-pack, 70/100 pcs/box

indication

- 2-piece syringe for intravenous, intramuscular and hypodermic injections
- indicated for drug withdrawal/application and body fluids samples collection

Ref No.	capacity	Intermediate packaging	Bulk packaging

tuberculin syringe, sterile

features

- with by packed needle 0,45 x 13 mm
- made entirely of polypropylene
- white contrasting plunger
- transparent barrel allows full visual control of content
- luer slip
- smooth plunger sliding thanks to rubber sealing
- limitation flange securing against accidental removal of plunger
- clear, legible and permanent black graduation every 0,05 ml that allows
- precise dosing of medicine/liquid
- special design of plunger stopper reduces the residual volume
- of medicine/liquid
- name of syringe and manufacturer' s logo placed on barrel
- single use
- non-pyrogenic, non-toxic
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- 3-piece syringe intended for precise drawing up and administering of medicines/liquids

Ref No.	capacity	Intermediate packaging	Bulk packaging
TU3P01ML	1 ml	100 pcs	36 x 100 pcs

Insulin Syringe

features

- transparent barrel made of polypropylene allowing perfect visualization of the content
- sealing in the form of a double ring on a plunger stopper situated on the top of plunger
- smooth plunger sliding thanks to rubber sealing
- limitation flange securing against accidental removal of the plunger
- special design of the plunger stopper reduces the residual volume of the drug/liquid
- clear, legible and permanent black graduation facilitating dosage
- fixed needle 27G~31G
- volume 0.3ml, 0.5ml, 1 ml
- single use
- non-toxic
- latex-free
- DEHP-free
- EO sterilized
- packaging: 1 pc/blister-pack/PE bag, 100 pcs/box

indication

- for insulin shots

Ref No.	capacity	version	Intermediate packaging	Bulk packaging
INU401ML	1 ml	U-40	100 pcs	32 x 100 pcs
INU1001ML	1 ml	U-100	100 pcs	32 x 100 pcs

Single-use catheter syringes, 3-part

features

- made of polypropylene
- transparent barrel made of polypropylene allowing
 - perfect visualization of the content
- size 50ml/60ml
- sealing in the form of a double ring on a plunger stopper
- situated on the top of plunger
- smooth plunger sliding thanks to rubber sealing
- limitation flange securing against accidental removal of the plunger
- catheter nozzle secured with a stopper
- clear, legible and permanent black graduation facilitating dosage
- graduated every 2 ml
- single use
- non-pyrogenic
- latex-free
- DEHP-free
- EO sterilized
- packaging: 1 pc/blister-pack/PE bag, 25 pcs/box

indication

- indicated for drug withdrawal/application and body fluids samples collection

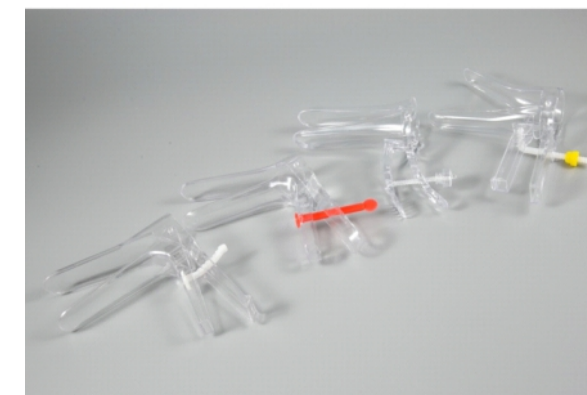

Vaginal speculum sterile

features

- upper and lower part made of polystyrene
- bolt made of polyethylene
- perfectly smooth and streamlined edges
- color coded bolts depending on the size
- for use no longer than 60 minutes
- single-use
- EO sterilized
- individual packaging: foil

indication

- gynecological examination of the cervix and vagina

SoftGrip Umbilical Cord Clamp Nylon sterile

features

- made of polypropylene
- safe clamping teeth with rounded edges do not cut the umbilical cord
- serrated clamping surface of the arms stabilize the clamp on the umbilical cord, after closing it is not possible to open the clamp again
- lock catch prevents accidental opening
- universal size
- single-use
- non-pyrogenic
- latex-free
- does not contain phthalates harmful to the child's health
- EO sterilized
- individual packaging: blister-pack

indication

- the device is designed for clamping the umbilical cord of a newborn in a labour ward in order to close the lumen of the umbilical blood vessels after cutting it off of the placenta

Ref No.	capacity	Intermediate packaging	Bulk packaging
SYCT50ML	50 ml	20 pcs	18 x 20 pcs
SYCT60ML	60 ml	20 pcs	18 x 20 pcs

cervical brush standard sterile

features

- straight, allows for obtaining samples from the cervical canal
- soft bristle tips to prevent cell samples from getting damaged
- optimal outreach thanks to the long handle
- single-use
- EO sterilized
- individual packaging: paper-foil

indication

- obtaining cell samples from the cervix in smear tests

cervical brush special sterile

features

- made of polyethylene
- broom type, allows for obtaining samples from the cervix, cervical canal and transformation zone
- soft bristle tips to prevent cell samples from getting damaged
- optimal outreach thanks to the long handle
- single-use
- EO sterilized
- individual packaging: paper-foil

indication

- obtaining cell samples from the cervix, cervical canal and transformation zone in smear tests

INFUSION THERAPY

easyFLOW Infusion Set Sterile

features

- made of high-quality latex-free materials
- sharp spike of the drip chamber with anti-slip surface that guarantees tight and reliable connection with fluid containers
- air-vent with anti-bacterial filter
- flexible droplet chamber, with/without Y site
- dropper: 20 drops = 1 ml +/- 0.1 ml, filter 15 µm protecting against larger particles
- min. 150 cm - long, soft, flexible drain, universal luer lock/slip needle
- both tips of the device additionally secured with protective caps
- non-pyrogenic, non-toxic
- single-use; EO sterilized
- PE bag/blister individual package

indication

- device for fluid transfer in infusion therapy

Ref No.	Length of tube	Intermediate packaging	Bulk packaging
INF150	150 cm	10 pcs	50 x 10 pcs
INF150Y	150 cm	10 pcs	50 x 10 pcs

easyFLOW Blood Transfusion Set Sterile

features

- 2-way sharp closure-piercing device of the drip chamber with anti-slip surface that guarantees tight and reliable connection with containers/bags
- air inlet with anti-bacterial filter and a coloured (red) flap
- pliable drip chamber
- dropper: 20 drops = 1 ml +/- 0,1 ml
- special blood filter with large area, pore size 200 µm
- min. 150 cm-long, soft, flexible tubing
- universal luer lock fitting at the end of tubing
- precise safe flow regulator with integrated holder for the closure-piercing device and with hook for securing the tubing
- name of the manufacturer placed on the flow regulator
- both tips of the device additionally secured with protective caps
- device available in a version containing phthalates and without phthalates
- single use
- non-pyrogenic, non-toxic
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- device used for the administration of blood and blood products

Ref No.	Length of tube	Intermediate packaging	Bulk packaging
BTS150	150 cm	10 pcs	50 x 10 pcs

3-way stopcock sterile

features

- made of polycarbonate
- transparent housing
- clear optical identifier of open/close position (marked flow directions), operating in 360 degrees
- consistent, straight flow channels and an optimal internal diameter ensure correct pressure measurement
- rotating luer-lock
- all inlets protected with stoppers
- resistant to lipids, latex and DEHP-free
- non-pyrogenic, non-toxic
- single-use, EO sterilized
- individual packaging: paper-foil

indication

- device designed for managing the flow of infusion fluids during administration
- allows to switch the infusion flow path
- for blood pressure monitoring, direct drug / fluid supply

Ref No.	color	Intermediate packaging	Bulk packaging
KT002	blue	50 pcs	20 x 50 pcs

3-way stopcock with extension tube, sterile

features

- three-way stopcock with an extension tube of various lengths (from 7 cm to 100 cm)
- transparent design
- rotating luer-lock
- clear optical identifier of open/close position (marked flow directions)
- made of polycarbonate
- all inlets protected with stoppers
- resistant to lipids, latex and DEHP-free
- non-pyrogenic, non-toxic
- single-use, EO sterilized
- individual packaging: paper-foil

indication

- device designed for managing the flow of infusion fluids during administration
- enables switching the infusion flow path
- for blood pressure monitoring
- for direct medicine/fluid supply

SANViflon I.V. Cannula sterile

features

- needle (stylet) made of stainless steel with back-cut blade
- cannula catheter made of Teflon (FEP), equipped with 4 radiopaque lines
- cannula equipped with wings and hand-closed cap of the upper port colour coded according to size
- handle that allows you to insert with one hand
- valve that prevents blood leakage to outside after inserting the cannula into the vessel
- flashback chamber secured with a luer lock cap
- available in various sizes from 14 G to 26 G
- single-use
- latex-free
- phthalate-free
- EO sterilized
- packaging: 1 pc. – hard blister (PVC + lacquered paper) with a colour print in accordance with the colour identification of the size

indication

- for cannulation of intravenous, peripheral vessels to:
- multiple injections of intravenous drugs
- intravenous infusion of solutions and parenteral nutrition suitable for peripheral veins
- maintain the patient's hydration and / or reduce dehydration if the patient is unable to take sufficient fluid orally
- blood transfusions and blood-like preparations
- ensuring vascular access in the event of the need for rapid drug delivery, especially during diagnostic and therapeutic procedures

Extension tube for infusion pump DEHP-free, sterile

features

- 45 cm or 150 cm long drain
- diameter of the drain – outer: 2,4 mm; inner: 1,24 mm
- luer-Lock tips – male and female
- made of PVC
- latex and DEHP-free
- single-use
- non-pyrogenic, non-toxic
- EO sterilized
- shelf life: 5 years
- individual packaging: blister-pack

indication

- device indicated for infusion therapy
- used to extend infusion line

GENERAL SURGERY

surgical suction tube sterile

features

- made of soft and flexible PVC
- along the tube a special longitudinal reinforcement to prevent bending and sucking of the tube
- perfectly smooth inner surface of tube prevents the sucked content from settling on the walls, ensuring correct and optimal flow
- connector type funnel-funnel cut-to-fit with the possibility of cutting in the marked places of the connector and matching to any type of medical suction device (for the diameter of 8 mm to 18 mm)
- funnel connector equipped with a special bending system, enabling convenient manipulation of the tube
- tube connectors compatible with the standard suction cannulas, enabling their reliable, effective and tight connection
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

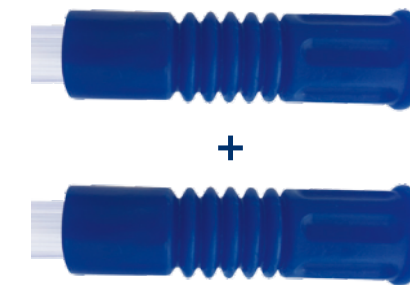

indication

- device designed for connecting the suction cannula to medical suction device
- Kapkon connector – designed to connect the catheter for aspiration
- of upper respiratory tract to medical suction device

surgical suction set with Yankauer cannula, bulb tip, sterile

CANNULA

completely transparent for full possibility of observing the sucked secretion
light and perfectly balanced handle ensures high comfort of work and reduces hand fatigue
perfectly smooth inner surface prevents blocking or retaining the sucked content, ensuring correct and optimal flow

cannula with double bend of curvature
universal stepped connector ensures tight connection with a wide range of suction connecting tubes

TUBE

made of soft and flexible PVC
along the tube a special longitudinal reinforcement to prevent bending and sucking of the tube
perfectly smooth inner surface of tube prevents the sucked content from settling on the walls, ensuring correct and optimal flow

connector type funnel-funnel cut-to-fit with the possibility of cutting in the marked places of the connector and matching to any type of medical suction device (for the diameter of 8 mm to 18 mm)

funnel connector equipped with a special bending system, enabling convenient manipulation of the tube
tube connectors compatible with the standard suction cannulas, enabling their reliable, effective and tight connection

features

- available with or without suction control
- single-use
- latex-free
- EO sterilized
- packaging: 1 set/double packaging: internal- foil, external- paper-foil

indication

- evacuating secretions and body fluids from the operating field in general surgery

Yankauer surgical suction cannula standard, sterile

features

- completely transparent for full possibility of observing the sucked secretion
- light and perfectly balanced handle ensures high comfort of work and reduces hand fatigue
- perfectly smooth inner surface prevents blocking or retaining the sucked content, ensuring correct and optimal flow

- universal stepped connector ensures tight connection with a wide range of suction connecting tubes

suction catheter with vacuum control sterile

features

- made of soft and flexible PVC, that is resistant to bending and kinking full control over the suction
- atraumatic, soft rounded, open tip
- tip with two alternating lateral eyes with smooth edges
- colour-coded connectors for size recognition, numerical size identification on the packaging
- single-use
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- device designed for suction of secretions from the upper respiratory tract

Medical dressings

Dressing materials have for years been the core of patient care. Constant development in this field causes more advanced products to appear next to the basic ones only. Dressing does not translate into using only the basic compresses and tapes any more. Naturally the function of each dressing depends on the requirements, overall patient health and the conditions in which the product is to be used.

The offer of FORLONG falls into a few categories and encompasses a complex range of solutions such as:

- gauze and non-woven dressings, compresses and drapes whose main function is to absorb the exudate and dress the wound in hospital and home care conditions,
- adhesive tapes made of various materials used for dressing and drain fixation as well as dressings with absorbent pads that enable fast dressing of minor injuries,
- special purpose dressings composing of solutions dedicated to specific conditions such as the dressing of post-operative wounds, cannula and drain fixation,
- supporting dressings- including products such as knitted and elastic bandages and tapes, stiffening dressings- including padding and POP bandages.

TRADITIONAL DRESSING MATERIALS

Dressing Gauze

features

- 100% hydrophilic cotton
- bleached with the use of hydrogen peroxide
- soft and very absorbent
- increase in absorption capacity with increasing number of gauze threads
- homogeneous structure through a strong twist of fibers eliminates the risk of loose fibers on the surface

indication

- general wound dressing in out-patient clinics, surgical sites, procedure department

dressing gauze, zig-zag folded non-sterile

W.O.W. Gauze Bandage

features

- 100% hydrophilic cotton
- bleached with the use of hydrogen peroxide
- Confined with zigzag frames
- Free of loose wires
- With selvages
- White color
- Used for fixing other dressings or for bandaging of body surfaces
- Allow skin transpiration

indication

- For support of a dressing or a splint, or to support a part of the body

STABILIZING DRESSINGS

Plaster of Paris Bandages

features

- made of cotton gauze coated with natural plaster of Paris on both sides
- on a plastic roll
- enable fast and durable immobilization
- before fixing need to be soaked in a container with water at 20oC temperature
- do not absorb X-rays

indication

- large and small immobilizing dressings in orthopedic, ambulatory and surgical procedures

Orthopedic Cast Padding

features

- very soft and fluffy
- adhere well and adjusts to the shape of the body
- coherent structure resistant to stratification makes it easier placement of the immobilizing dressing
- minimize the risk of skin abrasions and irritations under the P.O.P. bandage
- do not absorb moisture and thus do not allow for its contact with the skin
- hypoallergenic

indication

- as a protective layer put under plaster of Paris bandages
- in compression therapy as a padding under the bandages of various elasticity

orthopedic padding, natural

triangular sling

features

- triangle shaped sling made of non-woven or cotton
- thin, light and elastic - comfortable for the patient, adjusts to the shape of the body,
- possibility of connecting several slings to achieve bigger immobilization
- hypoallergenic

indication

- short-term immobilization and support of the upper limb in case of various injuries e.g. dislocation or fracture of collar bone, humerus, forearm or hand bone

Elastic tubular net bandage

features

- elastic net bandage in the form of a tube
- contains polyamide and elastomer
- high stretchability and strength of returning to pre-stretch state
- elastic and very soft
- easy and quick to use
- length before stretching:
- - 1 m, stretched: 2,5 m - 10 m, stretched: 25 m

indication

- fixation of all dressings on the patient' s body, replacing the traditional bandage
- the use of tubular net bandage reduces the time of wound dressing and makes it easier to fix the dressing to the patient' s body

crepe Bandage

This non-adhesive bandage is made of high-quality cotton yarns with spandex threads.

It's a common crepe bandage used for wrapping.

features

- Non-adhesive.
- Mono extensible.
- 95% Cotton and 5% Lycra / Polyester.
- Permeable to air;
- natural white, skin

indication

- Used as a support, fixation and resting bandage.

High Elastic Bandage

This non-adhesive bandage is made of high-quality fibers interwoven with rubber threads of high tensile strength, to provide controlled and consistent pressure.

features

- High quality cloth for longer wear
- Non-adhesive
- High compression for maximum support
- Long stretch
- material: rubber and polyester
- color: skin
- indication
- For support of a dressing or a splint, or to support a part of the body

Non-woven Cohesive Elastic Bandage

features

- adhesive to itself, non-sticky to hair or skin, hand tear, no pins or clips needed.
- non-woven material, most economic and widely used
- 18 colors for choose, design printed is available.
- length and width can be made as requirements.
- light weight, porous, allow skin to breath and comfortable to users
- protects primary dressings and provide compression.
- water resistant, will not lose by sweat or water.

indication

- Securing pads and dressings, protective bandaging, hold IV sets in place.
- Pressure bandage to promoted circulation and healing, sprains and strains.
- Compression bandage for hemostasis, varicosity, edema control.

ADHESIVE TAPES AND PLASTERS WITH DRESSING

Adhesive tape

features

- made of cotton fabric
- white
- spooled
- serrated edge
- good air and vapour permeability
- good adhesiveness
- elastic - comfortable for the patient, adjusts to the body shape and guarantees freedom of movement
- can be separated along and across, also without using scissors
- hypoallergenic
- non-sterile

indication

- stabilization, protection and fixation of non-adhesive primary dressings put directly on wounds or injured skin
- stabilization, protection and fixation of drains, cannulas and medical tubes

Plasters with dressing

features

- self-adhesive plasters with absorbent pads
- centrally situated absorbent pad absorbs a small and medium amount of exudate and protects from external factors
- absorbent pad coated with a polyethylene mesh that prevents sticking to the wound
- characterized by adequate air and water vapour permeability
- flexible, conforms to the body 's contours, guarantees freedom of movement
- silicone backing paper facilitates precise, painless and efficient application
- hypoallergenic

indication

- protection of small skin injuries, cuts, abrasions and lacerations

Dressing Tape

features

- made of hydrophobic non-woven
- covered with hypoallergenic acrylic glue
- micropores in the structure of the non-woven provide adequate vapor permeability, thanks to which a proper gas exchange between the dressing and the skin takes place
- flexible, conforms to the body 's contours, guarantees freedom of movement
- backing layer made of silicone paper
- backing paper with metric scale facilitates the division of the tape and precise, painless and efficient application
- packed in a cardboard box - a dispenser that allows dosing without removing the tape from the packaging

indication

- stabilization, protection and fixation of primary, non-adhesive dressings, applied directly to wounds and skin damages
- stabilization, protection and fixation of drains, catheters, medical tubes

non-woven IV cannula dressing elastopor IV

features

- centrally situated absorbent pad protects the non-woven material from sticking to the injection site
- non-woven lining should be placed under cannula' s wings, which prevents it from causing damage to the skin

indication

- dressing application around the inserted cannula
- stabilization, protection and fixation of intravenous cannulas

Non-woven eye dressing with absorbent pad Elastopor EYE

indication

- covering an eye and its area after ophthalmic procedures and surgical procedures
- sight correction in strabismus therapy

paraffin gauze dressing, sterile paraffiNET

features

- wide-mesh dressing made of cotton gauze covered with paraffin
- structure of the carrier material allows exudate to be freely drained to the covering secondary dressing
- covering with a layer of paraffin reduces risk of adhesion to the wound and allows a painless change of dressing
- neutral properties of paraffin allow for using the dressing in combination with other preparations containing medicinal substances or antiseptics
- can be shaped and cut according to the needs aseptically
- needs to be covered with a dressing with absorbent properties, e.g. compress, high-absorption dressing, polyurethane foam
- non-adhesive, necessary fixing with a tape, bandage or net tubular dressing
- hypoallergenic

indication

- keeping proper moisture in the wound
- preventing the wound edges from drying and maceration
- recommended for uninfected wounds
- dressing chronic wounds: bedsores, ulcers, etc.
- treating surgical wounds, burn wounds, places of injections, skin transplants and damaged skin
- protection against post radiation skin damage

Medical clothing

It is extremely important for us to offer our clients products that ensure high standard of working conditions and comfort of use.

In order to achieve this goal, we have created a line high quality products made of different types of non-woven materials:

- polypropylene non-woven

- SMS non-woven

- Spunlace non-woven

- Viscose non-woven

- Spunlace mesh non-woven

A combination of several factors such as optimal design, perfect fit, breathability and structure makes Forlong products comfortable and reliable.

A wide range of solutions will certainly meet our clients' individual preferences and secure both medical personal and patients' comfort and dignity.

medical gown with elastic cuffs, PP non-woven, non-sterile

features

OTHER PRODUCTS

Basic stethoscopes Single-head

features

- Single-head stethoscope feature a chrome-plated brass binaural, a light-weight anodized aluminum chest piece and 22 inch vinyl Y-tubing.
- A variety of colors for departmental coding or individual preference

Basic stethoscopes

Dual-head

features

- Dual-head stethoscopes feature a light-weight, anodized aluminum chest piece, a chrome-plated brass binaural and 22 inch vinyl Y-tubing.
- The dual-head chest piece features a bell that fits into small areas and detects faint, low-frequency sounds and a diaphragm which transmits higher frequency heart and lung sounds.
- A variety of colors for departmental coding or individual preference

Sprague Rappaport stethoscope

features

- The Sprague Rappaport stethoscope includes five interchangeable chest piece fittings to provide versatility for use on infants, children and adults.
- There are three bell sizes (adult, medium, and infant) and two diaphragm sizes (small and large).
- They feature chrome-plated binaural and 22-inch twin tubing, which provides separate sound pathways for outstanding acoustical clarity.
- Three different sized ear tip are provided for comfort.

Premium stethoscope

Dual-head stainless steel

features

- The dual-head stainless steel stethoscope uses a stainless steel binaural and chest piece for improved acoustic quality and increased durability.
- These stethoscopes are constructed with a 22-inch tubing

Cardiology stethoscopes

features

- The cardiology stethoscope is our highest level of quality stethoscope.
- Cardiology stethoscopes are a heavier model with longer tubing.
- These stethoscopes are constructed with a 28-inch tubing.

Dial blood pressure monitor for upperarm blood pressure monitoring

ARM CUFF:

- size 23-32 cm
- made of easytoclean nylon
- intended for manual inflation using a bulb pump
- equipped with twopart fixing Velcro, a buckle to thread the cuff through, and a place to hang the manometer
- the facing at the end of the cuff facilitates threading it through the buckle
- the patch on the cuff with an artery symbol (left arm, right arm) facilitates proper positioning of the cuff on the arm

MANOMETER:

- diameter 52 mm
- readable scale divided into 2 mm Hg
- equipped with a clamp allowing fixing the manometer to the cuff
- measurement range: 0-300 mmHg
- error range: ± 3 mmHg

BULB PUMP:

- equipped with a manual deflate valve
- not integrated with the manometer
- the bulb pump is detachable from the cuff tube

STETHOSCOPE:

- equipped with soft earpieces
- stethoscope tube in the form of a single T arm
- flat stethoscope resonator, unidirectional, 40 mm in diameter

wooden tongue depressor

features

- made of birch wood
- rounded edges preventing injuries
- long outreach thanks to appropriate length
- available in sterile (EO sterilization) and non-sterile version
- sterile depressor packed individually in paper pouch
- individual packaging of the sterile depressor: paper
- Size: 15cm*1.7cm

indication

- diagnostic examination of the oral cavity

microscope slides

non-sterile

features

- made of high-quality transparent glass
- smooth surface
- dimensions meet international standards
- flat, even and durable surface
- even specimens, good staining of preparations
- box wrapped in foil for additional protection against humidity
- dimensions: 76 mm x 26 mm x 1 mm
- non-sterile
- packaging: 50 pcs/double packaging: box and foil

indication

- designed for holding specimens for microscopic study

PE apron

non-sterile

features

- made of polyethylene
- transparent
