July 8, 2024

To Whom It May Concern:

I am writing to recommend Esempla for their exceptional performance in the development and implementation of the Registry of Financial Statements (RFS) for the Government of Moldova (Contract No. 8007052, April 2022 - November 2022).

Esempla demonstrated remarkable expertise in creating a centralized system for managing financial statements, ensuring compliance with national and EU standards. Their innovative approach to automating business processes was evident in the comprehensive solution they delivered, which included modules for public access, data validation, secure storage, and interoperability with various government and external systems.

The technical environment they established was highly sophisticated, utilizing MCloud for infrastructure and integrating multiple Platform-as-a-Service components such as MConnect, MPass, MSign, MNotify, MLog, MCabinet, MPay, MPower, and POGD. The system's interoperability with approximately 20 external systems, including those of key financial institutions, was particularly impressive.

Esempla's team, led by Stefan Condrea, Dumitru Virtosu, Victor Tudor, Mihai Gaidau, and Nicoleta Ionas, exhibited exceptional project management skills and technical prowess. Their use of Agile methodology ensured iterative development and effective stakeholder engagement throughout the project lifecycle.

Esempla Systems' organizational performance was exemplary, with the project management team ensuring smooth execution of all phases, from infrastructure setup to post-implementation support. The business analysts provided invaluable insights, contributing to the system's alignment with stakeholder needs.

We highly recommend Esempla for their ability to deliver complex, high-value projects on time and within budget, while providing added value through their innovative and client-focused approach.
