REF.: Procurement of Automated Border Control (ABC, e-Gate)

CONFIRMATION OF PRODUCTION FACILITY LOCATED IN THE EUROPEAN UNION & CONFIRMITY WITH EUROPEAN UNION SAFETY STANDARDS

I hereby respectfully submit our formal explanation and legal justification in response to the tender requirement and confirm full compliance for the offered product — *Automated Border Control System (ABC, e-Gate)* — manufactured by Mühlbauer ID Services GmbH within the European Union.

Mühlbauer ID Services GmbH, Roding, Germany, acts as the manufacturer of the offered e-Gate systems and operates fully integrated in-house production capabilities for electronic and electrotechnical security systems. The manufacturing site is located at Josef-Mühlbauer-Platz 1, 93426 Roding, Germany, within the European Union and constitutes the sole production facility for the offered equipment. This ensures full control over design, manufacturing, testing, and quality assurance processes throughout the entire product lifecycle.

In direct fulfilment of the tender requirement, we explicitly confirm that the factory and production facility for the goods offered is located within the European Union (Germany). The production environment is embedded in certified management systems ensuring consistent quality, security, and process governance.

The organization operates under a Quality Management System certified according to ISO 9001:2015 ensuring structured control of design, production, verification, and continuous improvement processes. In addition, an Information Security Management System certified according to ISO/IEC 27001:2022, <https://muehlbauer.de//company/certificates/> is implemented to ensure secure handling of sensitive information, protection of technical data, traceability, and controlled access throughout development, production, FAT, and delivery phases.

As manufacturer, Mühlbauer ID Services GmbH places the product on the European Union market under its own name and brand and assumes full responsibility for conformity assessment, traceability, and CE marking obligations in accordance with Regulation (EC) No. 765/2008, <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:32008R0765> and the principles defined in the European Commission's Blue Guide 2022 [https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52022XC0629\(04\)](https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52022XC0629(04)).

Mühlbauer ID Services GmbH

The CE marking is applied only after successful conformity assessment and issuance of the EU Declaration of Conformity. The offered e-Gate system complies with all applicable EU safety and harmonization legislation, including

- Directive 2014/30/EU (EMC) <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:32014L0030>,
- Directive 2014/35/EU (Low Voltage Directive) <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:32014L0035>,
- Directive 2011/65/EU (RoHS) <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:32011L0065> and
- Regulation (EC) No. 1907/2006 (REACH) <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:32006R1907>.

Compliance is ensured through application of relevant harmonized European standards and structured engineering, verification, and validation processes integrated into the certified management systems referenced above.

We use components manufactured within the European Union and/or supplied by European suppliers and distributors, ensuring full alignment with EU regulatory requirements and traceability obligations. Each supplier provides the following documentation:

- EU Declarations of Conformity (DoC) under the applicable Directives (EMC/LVD);
- RoHS Declarations based on EN IEC 63000:2018 (technical documentation approach, without requiring destructive testing at system level);
- REACH compliance statements, including notifications under Article 33 regarding Substances of Very High Concern (SVHC), where applicable.

These documents are verified, archived, and correlated within the Technical Documentation File (TDF) at product level. The integration of certified components does not alter their compliance characteristics; by design, the final system retains full safety, EMC, and environmental conformity.

The EU Declaration of Conformity is issued by the manufacturer and confirms compliance with all applicable EU legal requirements. Supporting technical evidence, including design documentation, risk assessments, EMC and electrical safety validation, and references to harmonized standards, is maintained within the Technical Documentation File (TDF). This file constitutes the consolidated compliance record for the product and is made available during the Factory Acceptance Test (FAT) at the manufacturing facility in Roding.

All test and validation reports are generated in accordance with the specific project configuration and are included within the Technical Documentation File. These documents are controlled under strict confidentiality measures aligned with ISO/IEC 27001:2022 and are made available to the contracting authority during FAT in accordance with applicable contractual and legal requirements.

Based on the above, we confirm that the production facility is located within the European Union (Germany), that the offered system fully complies with all applicable EU safety standards and CE marking requirements, and that all required conformity documentation is maintained and available within the Technical Documentation File.

I hereby certify that the information provided is complete, accurate, and truthful, and that the offered product complies with all applicable European Union directives and regulations.
